algebra my pride: The Memory Index Julian Ray Vaca, 2022-08-09 In this electric speculative YA sci/fi novel, the world treats memories like currency, so dreams can be a complicated business. Perfect for fans of Neal Stephenson and Philip K. Dick. In an alternative 1987, a disease ravages human memories. There is no cure, only artificial recall. The lucky ones—the recollectors—need the treatment only once a day. Freya Izquierdo isn't lucky. The high school senior is a "degen" who needs artificial recall several times a day. Plagued by blinding half-memories that take her to her knees, she's desperate to remember everything that will help her investigate her father's violent death. When her sleuthing almost lands her in jail, a shadowy school dean selects her to attend his Foxtail Academy, where five hundred students will trial a new tech said to make artificial recall obsolete. She's the only degen on campus. Why was she chosen? Freya is nothing like the other students, not even her new friends Ollie, Chase, and the alluring Fletcher Cohen. Definitely not at all like the students who start to vanish, one by one. And nothing like the mysterious Dean Mendelsohn, who has a bunker deep in the woods behind the school. Nothing can prepare Freya and her friends for the truth of what that bunker holds. And what kind of memories she'll have to access to survive it. "Vaca's debut is a thrilling and often unsettling examination of the elusive nature of memory and truth. The Memory Index will leave you breathlessly turning pages until its satisfying conclusion." -Jonathan Evison, New York Times bestselling author of Small World Get hooked on The Memory Index Duology: Book 1: The Memory Index Book 2: The Recall Paradox (coming Spring 2023)

algebra my pride: Once Upon a Time (bomb) Manlio Argueta, 2007 Once Upon a Time (Bomb) is a charming memoir of a young boy growing up in El Salvador. It tells the story of Alfonso Duque the Thirteenth, a youngster from a poverty-stricken family and a budding poet. Surrounded by hovering women-his mother, aunts, grandmothers, and sisters-little Alfonso still manages to enjoy boyish pranks and endure scraped elbows, knees, and ego while also discovering the pleasures of reading. The womenfolk laughingly describe him on his 'throne' atop the trees or back in the outhouse, where he often escapes to read. This work of innocence is set against a darker backdrop of the growing violence in the Salvadoran countryside and the news coming from the fronts of the Second World War. Argueta incorporates many of the best-loved local folktales into the narrative, the Siguanaba, Chinchintora the Snake, Theodora the Coyote, some of them personalized or hilariously adapted by the women to fit their own circumstances. In the book, the author works through memory, re-encounters a nostalgic past, re-creates

algebra my pride: Origins Amin Maalouf, 2024-07-02 Origins, by the world-renowned writer Amin Maalouf, is a sprawling, hemisphere-spanning, intergenerational saga. Set during the last quarter of the nineteenth century and the first quarter of the twentieth—in the mountains of Lebanon and in Havana, Cuba— Origins recounts the family history of the generation of Maalouf's paternal grandfather, Boutros Maalouf. Maalouf sets out to discover the truth about why Boutros, a poet and educator in Lebanon, traveled across the globe to rescue his younger brother, Gabrayel, who had settled in Havana. What follows is the gripping excavation of a family's hidden past. Maalouf is an energetic and amiable narrator, illuminating the more obscure corners of late Ottoman nationalism, the psychology of Lebanese sectarianism, and the dynamics of family quarrels. He moves with great agility across time and space, and across genres of writing. But he never loses track of his story's central thread: his quest to lift the shadow of legend from his family's past. Origins is at once a gripping family chronicle and a timely consideration of Lebanese culture and politics.

algebra my pride: Of Dreams & Coveralls James Garland Powell, 2009-02-26 James Powells earliest memories are of airplanes. His imagination was fueled by gasoline-powered models; balsa-wood gliders; and stories of military aircraft. Amazing, though, James never believed he would have the opportunity to fly in an airplane. While stumbling through school unsure of a career, James took a dollar ride in a Cessna 150. After a thirty-minute flight, he had an epiphany. As they taxied in, Jamess heart and mind were still in the air. Eureka! Ive found it, he said to himself. This is what I want to do. I am going to fly airplanes. Powells path from that day forward was straight and narrow: he joined the military and successfully graduated from the Air Forces pilot training class at Columbus Air Force Base in Mississippi. But that was just the first step in what became a career as a professional aviator. In this moving memoir of hard work and dogged determination, Powell recounts the rocky road he traveled on his way to becoming a commercial pilot. Despite the diversion of a teenage marriage and divorce, and friends ridicule, Jamess determination never wavered. Read how author James Powell used his gift of tenacity, believing he could do anything if he worked long and hard enough in Of Dreams and Coveralls.

Highley, 2014-09-18 The MATT ARCHER SERIES Omnibus includes Matt Archer: Monster Hunter (MA1), Matt Archer: Monster Summer (Novella, MA1.5), Matt Archer: Blade's Edge (MA2), and Matt Archer: Legend (MA3), along with exclusive, brand new short stories, and interviews with the author and characters. About the MATT ARCHER series: Monster Hunter (Matt Archer #1) Fourteen-year-old Matt Archer spends his days studying Algebra, hanging out with his best friend and crushing on the Goddess of Greenhill High, Ella Mitchell. To be honest, he thinks his life is pretty lame until he discovers something terrifying on a weekend camping trip at the local state park. Monsters are real. And living in his backyard. But that's not the half of it. After Matt is forced to kill a strange creature to save his uncle, he finds out that the weird knife he took from his uncle's bag has a secret, one that will change Matt's life. The knife was designed with one purpose: to hunt monsters. And it's chosen Matt as its wielder. Now Matt's part of a world he didn't know existed, working with a covert military unit dedicated to eliminating walking nightmares. Faced with a prophecy about a looming dark war, Matt soon realizes his upcoming Algebra test is the least of his worries. His new double life leaves Matt wondering which is tougher: hunting monsters or asking Ella Mitchell for a date? Blade's Edge (Matt Archer #2) When Matt Archer was fourteen, he discovered monsters are real. As if that wasn't enough to go on for a few decades, Matt also found out that he'd been chosen to hunt those monsters--with a sentient, supernatural knife. Now fifteen, Matt has spent the last year working with a clandestine military unit, trying to rid the world of monsters, demons and other vicious creatures, all while keeping it a secret from nearly everyone he knows back home in Billings. Including his mom. Add in a new girlfriend, family secrets, sibling drama and enough homework to sink an aircraft carrier, and Matt's life has become more complicated than he ever imagined. Worse, the knife-spirit has developed some very definite opinions about Matt's personal life and it interferes in his business whenever it wants. More and more, Matt's coming to realize that sharing brain-space with a spirit kind of sucks. When stories of decimated towns and hordes of zombies start pouring into the Pentagon from Afghanistan, Matt knows he'll be called up soon. Between the new mission and the

knife's increasing control over his mind, Matt wonders if he'll survive long enough to take his driver's exam. Legend (Matt Archer #3) When Matt Archer was fourteen, he was chosen—by a magic, spirit-inhabited knife—to hunt monsters with a special paranormal division of the Army. When he was fifteen, he was thrown into a global war the rest of the world didn't know existed. Now Matt's sixteen and the war has cost him more than he ever thought it would. He's also learned that the knife-spirits have an agenda he doesn't totally agree with. The only problem? The spirits have the upper hand, and they plan to control the fight—and Matt. Then things get worse: the next lunar eclipse cycle is starting, a prominent physicist has gone missing, and Matt's best friend is thinking about quitting the team. If he loses Will—after everyone else he's lost—Matt's not sure how he'll fight alone. As the source of his nightmares starts to creep out of the shadows, Matt knows he'll need all the help he can get…because being alone could prove deadly.
