january 2017 algebra 2 regents: Unshackled Clint Bolick, Kate J. Hardiman, 2021-01-01 Clint Bolick and Kate J. Hardiman begin with a thought experiment: how would we structure a 21st-century K&-12 school system if we were starting from scratch, attending to contemporary parental needs and harnessing the power of technology? Maintaining that the status quo is unacceptable, they take a forward-thinking look at how choice, competition, deregulation, and decentralization can create disruptive innovation and reform education for all students. The US Supreme Court proclaimed 65 years ago in *Brown v. Board of Education* that our schools must provide equal educational opportunities, but as Bolick and Hardiman argue we have yet to make good on that promise. School systems are bound to antiquated structures, outdated technology, and bureaucratic systems that work for adults, not children. The COVID-19 pandemic has highlighted how ossified the traditional public school system has become. Today's ruptures in traditional learning create opportunity for reinvention. *Unshackled* explains that technology can redefine the ways students learn in and out of the classroom and highlights the benefits of expanding educational freedom so that families are able to choose an education that fits their child's needs.

Empathic Teaching: Promoting Social Justice in the Contemporary Classroom is written for those who are committed to employing social justice practices in the classroom. The intent is to educate the next generation to value tolerance and to have respect and empathy for others in society. While this tome will largely focus on understanding the role that equity should play in P-12 education, it will do so with an acute awareness that there are myriad factors that influence student engagement and the motivation to learn. Although some of the subjects under consideration have been written about elsewhere broadly, this tome will offer a unique contribution by examining each from a social equity perspective. As schools move to ensure a more inclusive and well-rounded student body, this book will be a substantial asset to anyone interested in advancing a social justice agenda.

january 2017 algebra 2 regents: Schooled and Sorted Thurston Domina, Andrew M. Penner, Emily K. Penner, 2023-06-22 We tend to view education primarily as a way to teach students skills and knowledge that they will draw upon as they move into their adult lives. However, schools do more than educate students—they also place students into categories, such as kindergartner, English language learner, or honor roll student. In *Schooled & Sorted*, Thurston Domina, Andrew M. Penner, and Emily K. Penner, explore processes of educational categorization in order to explain the complex relationship between education and social inequality—and to identify strategies that can help build more just educational systems. Some educational categories have broadly egalitarian consequences. Indeed, Domina, Penner, and Penner argue that when societies enroll young people in school, making them students, they mark them as individuals who are worthy of rights. But other educational categories reinforce powerful social categories—including race, gender, and class—and ultimately reproduce social and economic inequality in society. Elite colleges, tracked high schools, and elementary school gifted programs provide not only different educational experiences, but also create merit and inequality by sorting students into categories that are defined by the students who are excluded. *Schooled & Sorted* highlights that many of the decisions that define educational categories occur in school-based committee meetings and other relatively local settings. The local nature of these decisions provides many opportunities to define educational categories differently, and for school communities to bring about change. *Schooled & Sorted* is an illuminating investigation into the ways sorting within schools translates into inequality in the larger world. While some educational categorization may be unavoidable, the authors suggest ways to build a more equitable system—and thus a more equitable society.

january 2017 algebra 2 regents: Preparing and Sustaining Social Justice Educators Annamarie Francois, Karen Hunter Quartz, 2022-10-18 Preparing and Sustaining Social Justice Educators spotlights the challenging and necessary work of fostering social justice in schools. Integral to this work are the teachers and school leaders who enact the principles of social justice—racial equity, cultural inclusivity, and identity acceptance—daily in their classrooms. This volume makes the case that high-quality public education relies on the recruitment, professional development, and retention of educators ready to navigate complex systemic and structural inequities to best serve vulnerable student populations. Annamarie Francois and Karen Hunter Quartz, along with contributing scholars and practitioners, present an intersectional approach to educational justice. The approach is grounded in research about deeper learning, community development, and school reform. Throughout the book, the contributors detail professional activities proven to sustain social justice educators. They show, for example, how effective teacher coaching encourages educators to confront their explicit and implicit biases, to engage in critical conversations and self-reflection, and to assess teacher performance through a social justice lens. The book illustrates how professional learning collaborations promote diverse, antiracist, and socially responsible learning communities. Case studies at three university-partnered K-12 schools in Los Angeles demonstrate the benefits of these professional alliances and practices. Francois and Quartz acknowledge the difficulty of the social justice educator's task, a challenge heightened by a K-12 teacher shortage, an undersupplied teacher pipeline, and school closures. Yet they keep their sights set on a just and equitable future, and in this work, they give educators the tools to build such a future.
