anatomy gym south beach: Making the American Body Jonathan Black, 2020-04-01 If you thought the fitness craze was about being healthy, think again. Although Charles Atlas, Jack LaLanne, Jim Fixx, Jane Fonda, Richard Simmons, and Jillian Michaels might well point the way to a better body, they have done so only if their brands brought in profits. In the first book to tell the full story of the American obsession with fitness and how we got to where we are today, Jonathan Black gives us a backstage look at an industry and the people that have left an indelible mark on the American body and the consciousness it houses. Spanning the nation's fitness obsession from Atlas to Arnold, from Spinning to Zumba, and featuring an outrageous cast of characters bent on whipping us into shape while simultaneously shaping the way we view our bodies, Black tells the story of an outsized but little-examined aspect of our culture. With insights drawn from more than fifty interviews and attention to key developments in bodybuilding, aerobics, equipment, health clubs, running, sports medicine, group exercise, Pilates, and yoga, *Making the American Body* reveals how a focus on fitness has shaped not only our physiques but also, and more profoundly, American ideas of what fitness is.

anatomy gym south beach: Watching TV Harry Castleman, Walter J. Podrazik, 2024-12-16 Castleman and Podrazik present a season-by-season narrative that encompasses the eras of American television from the beginning in broadcast, through cable, and now streaming. They deftly navigate the dizzying array of contemporary choices so that no matter where you start on the media timeline, Watching TV provides the context and background to this multi-billion-dollar enterprise. Drawing on decades of research, the authors weave together personalities, popular shows, corporate strategies, historical events, and changing technologies, enhancing the main commentary with additional elements that include fall prime time schedule grids for every season, date box timelines, highlighted key text, and selected photos. Full of facts, firsts, insights, and exploits from now back to the earliest days, Watching TV is the standard chronology of American television, and reading it is akin to channel surfing through history. The fourth edition updates the story into the 2020s and looks ahead to the next waves of change. This new edition is the first to also be available in a digital format.

anatomy gym south beach: Paleozoic-Mesozoic Geology of South Island, New Zealand Subduction-related Processes Adjacent to SE Gondwana A.H.F. Robertson, 2019-05-09 This volume presents a set of research papers that provide new data and interpretations of the Permian-Triassic terranes of SE Gondwana, now exposed in South Island, New Zealand. Following an introduction for general readers, a historical summary and a review of biostratigraphy, the individual papers primarily focus on the Permian magmatic arc of the Brook Street Terrane, the classic Permian Dun Mountain ophiolite and the Permian-Triassic Maitai Group sedimentary succession. The new results emphasize the role of subduction and terrane displacement adjacent to the Permo-Triassic Gondwana margin, and present fundamental insights into three crustal processes: subduction initiation, supra-subduction zone oceanic crust genesis and forearc basin evolution. The volume concludes with a wide-ranging summary and synthesis of the regional Cambrian to Early Cretaceous tectonostratigraphy of New Zealand's South Island in relation to the wider areas of Zealandia, East Australia and West Antarctica. The volume will interest geoscientists, including stratigraphers, sedimentologists, palaeontologists, igneous petrologists, geochemists, geochronologists and economic geologists, and is aimed at professional geologists and advanced

students of geology.
