anatomy boot camp: *Summer versus School* James Pedersen, 2015-01-22 As American educational reformers continue to find innovative ways to address the global achievement gap, many experts seem to agree that increasing instructional time is a viable option. In addition to extending

the school day, some educational leaders have looked to modifying the traditional academic calendar to address some of the academic losses that occur when students have 8-10 weeks of summer vacation each year. Re-examining how students spend their summer vacation, although considered by many to be a cultural taboo, may be the answer to addressing global competition and decreasing the national achievement gap. The need for a two month break from schools harkens back to a pre-industrial time that no longer is pertinent for our students. Although an answer may be staring us in the face, are we willing to give up on the American tradition of summer vacation all in the name of reform and student success?

anatomy boot camp: *A Passionate Psychoanalyst* Joseph Abrahams M.D., 2007-07-13

Ascertaining the genre of this volume has been difficult. It is much more than memoir, book of poetry, case study, dream journal, and travelogue. It is all that, plus their integration into a creative product. It begins before the author's birth, when enterprising Grandfather Joseph Abrahams came to America, soon to meet a mysterious death. The extended family to follow prospered, and his grandson Joseph likewise pursued the American dream, first in Texas, then New England, New York, and during the war years, much of America. In the course of a career in psychoanalysis, he ventured into study of his own inner world for understanding of his life drives. There analysis of his dreams have been central, then a bent for poetry. The result is this volume, centering about a protracted rendezvous with death, surfacing with an epic poem, entitled, *A Passionate Psychoanalyst*.

Alan helped his father bury deceased nuns and seal their graves in a crypt underneath the monastery. Normal kids brought toys or pet hamsters to Show and Tell. Alan brought rosary beads. But he's starting to think he might just have to settle for normal-ish.
