aaa anatomy jobs: *Anatomy of a Lynching* James R. McGovern, 2013-10-07 A sensitive and forthright analysis of one of the most gruesome episodes in Florida history... McGovern has produced a richly detailed case study that should enhance our general understanding of mob violence and vigilantism. -- *Florida Historical Quarterly* [McGovern] has succeeded in writing more than a narrative account of this bloodcurdling story; he has explored its causes and ramifications. -- *American Historical Review* A finely crafted historical case study of one lynching, its antecedents, and its aftermath. -- *Contemporary Sociology* First published in 1982, James R. McGovern's *Anatomy of a Lynching* unflinchingly reconstructs the grim events surrounding the death of Claude Neal, one of the estimated three thousand blacks who died at the hands of southern lynch mobs in the six decades between the 1880s and the outbreak of World War II. Neal was accused of the brutal rape and murder of Lola Cannidy, a young white woman he had known since childhood. On October 26, 1934, a well-organized mob took Neal from his jail cell. The following night, the mob tortured Neal and hanged him to the point of strangulation, repeating the process until the victim died. A large crowd of men, women, and children who gathered to witness, celebrate, and assist in the lynching further mutilated Neal's body. Finally, the battered corpse was put on display, suspended as a warning from a tree in front of the Jackson County, Florida, courthouse. Based on extensive research as well as on interviews with both blacks and whites who remember Neal's death, *Anatomy of a Lynching* sketches the social background of Jackson County, Florida -- deeply religious, crushed by the Depression, accustomed to violence, and proud of its role in the Civil War -- and examines which elements in the county's makeup contributed to the mob violence. McGovern offers a powerful dissection of an extraordinarily violent incident.

aaa anatomy jobs: Buyology Martin Lindstrom, 2010-02-02 NEW YORK TIMES BESTSELLER • "A fascinating look at how consumers perceive logos, ads, commercials, brands, and products."—Time How much do we know about why we buy? What truly influences our decisions in today's message-cluttered world? In Buyology, Martin Lindstrom presents the astonishing findings from his groundbreaking three-year, seven-million-dollar neuromarketing study—a cutting-edge experiment that peered inside the brains of 2,000 volunteers from all around the world as they encountered various ads, logos, commercials, brands, and products. His startling results shatter much of what we have long believed about what captures our interest—and drives us to buy. Among the questions he explores: • Does sex actually sell? • Does subliminal advertising still surround us? • Can "cool" brands trigger our mating instincts? • Can our other senses—smell, touch, and sound—be aroused when we see a product? Buyology is a fascinating and shocking journey into the mind of

today's consumer that will captivate anyone who's been seduced—or turned off—by marketers' relentless attempts to win our loyalty, our money, and our minds.
