wall chart of human anatomy: The Complete Book of Dowsing & Divining Peter

Underwood, 1980-08 This comprehensive volume on dowsing and divining - from the twig and the pendulum to motorscopes and bare hands - traces the story of these fascinating and enigmatic phenomena from its origins in the world of fairy tales and mythology to recent theories that the enigma can be explained in terms of present-day psychology. The force present in the act of dowsing and divining can be compared to the sensitivity of men and women suffering from rheumatism who feel, in advance, changes of weather. Theories that have been brought forward to explain its presence include suggestion, radiation, colour, the existence of a sixth sense, and changes in the earth's magnetic field. As there are many possible explanations there are also many types and applications of dowsing and divining: map dowsing; being eggs; radiesthesia; the diagnosis and cure of disease; locating missing persons; forces, fields and rays; and detecting thieves. The author tells of dowsers past and present: Robert Leftwich who located abandoned tunnels and other underground hazards; Major Harold Spary who dowsed for the Royal Aircraft Establishment and the Royal Engineers during World War II; William Young who charged £200 a day in 1971 for dowsing; Tom Lethbridge who investigated Viking graves on Lundy Island; Henry Gross who discovered Bermuda's first natural wells. Even today large building and contracting firms employ resident site engineers who use sophisticated sets of divining rods. The book introduces us, in lucid and readable style, to the fascinating world of dowsing and divining, and gives the reader full instructions on how to attempt to become one of this international community.

wall chart of human anatomy: GAME OF PAWNS Louis Romano, 101-01-01 The head of the biggest NYC crime family, Carmine Miceli, Jr., is taken in on racketeering charges. His life-long friend, Gino Ranno, is forced to become the head of the family he has so desperately tried to keep at arm's length in this 3rd book of Louis Romano's Gino Ranno, mob series (FISH FARM, BESA). The first order of business: The Russian mob. Infringing on the illegal profits made on the streets through prostitution, insurance scams, and the drug world, the Russians are also engaged in harvesting young female body parts through surgeons who are secretly on their payroll to be sold onto the black market to the highest bidder. As Gino and the Albanian mafia join forces to end these brutal murders, a well-to-do American family find themselves in a quandary when their college-aged son is in desperate need of a kidney transplant and they are offered one for a price. How far will they go to save their son? Drawn into their high stakes game... A GAME OF PAWNS ... Gino soon comes to the heart-pounding realization that his life and a slew of people he's known for years are dependent upon him to keep them safe and any of his decisions now will determine whether he, his friends, and associates live or die. The Gino Ranno series: The streets of NYC are getting increasingly narrow as the different nationalities of mob families are wanting more than their fair share of illegal, money-making activities. In FISH FARM it was the mafia vs the Colombian drug lords, then in the 5-time award-winning BESA the Albanians start an inner mob war when one of their own is shot during a drug deal gone bad, and now the Russians, who think they can muscle their way into Gino's backyard. Louis Romano's extensive hands-on research for GAME OF PAWNS has been compared to a Patricia Cornwell novel for its accuracy
