### What is an Associate in Science in Business Administration?

An Associate in Science in Business Administration is a two-year degree program designed to provide students with fundamental knowledge and skills in various aspects of business. This program typically covers essential areas such as management principles, accounting, marketing, and finance. The degree is particularly beneficial for individuals seeking to enter the business field quickly or enhance their current skill set for career advancement.

The curriculum is structured to prepare students for entry-level positions in business or for further studies in a bachelor's degree program. Students engage in both theoretical and practical applications of business concepts, equipping them with the tools needed to succeed in a competitive environment.

## Core Curriculum of an Associate in Science in Business Administration

The core curriculum of an Associate in Science in Business Administration encompasses a range of subjects that provide a solid foundation in business practices. Typically, the coursework includes both general education courses and specialized business courses.

#### **General Education Courses**

General education courses are essential components of the degree, aimed at developing critical thinking, communication, and analytical skills. Common general education subjects include:

- English Composition
- Mathematics
- Social Sciences
- Humanities
- Computer Literacy

### **Business-Specific Courses**

In addition to general education requirements, students will take specialized business courses. These courses may cover topics such as:

- Principles of Management
- Financial Accounting
- Marketing Fundamentals
- Business Law
- Economics

These courses are designed to foster a comprehensive understanding of business

operations and strategies, preparing students for real-world applications.
