avianca business: Strategic Airline Retailing and Solutions Nawal K. Taneja, 2023-11-07 While airlines have been looking into the next generation of retailing practices for several years, developments since the beginning of 2020 have accelerated the need to take retailing to a new paradigm. A singular focus now is the ever-changing demands of the current and next generation of customers and employees and managing their values. Examples of customer needs include a mobile-first approach, rich content, augmented and personalized end-to-end services with seamless, consistent, and contextualized experiences. While these concepts of retailing are not new, the

challenge has been in bringing them to reality due to (a) the constraints of legacy systems and processes while transitioning to next-generation retailing systems, (b) the inaccessibility of real-time data coming from a wide variety of sources such as online shopping, social media, and operations, (c) the inability to monitor real-time behavior of customers and employees, (d) the lack of effective collaboration and cooperation within the travel ecosystem, and (e) the increasing lack of trust on the part of customers. This book provides a framework and technologies to convert retailing concepts—from shopping to fulfillment—into reality by (a) renovating an airline's core and ancillary products, (b) progressing faster on digital and organizational transformation journeys to make better data-based decisions about retailing, (c) getting better at managing customer value by knowing who the customers are, (d) empowering, supporting, and listening to employees to meet their expectations, (e) asking the right questions to solve complex retailing problems relating to customers, competitors, and stakeholders, and (f) questioning common-held beliefs about the airline business. This book is indispensable for all airline executives and senior managers, as well as airline and airport commercial managers. It will also be enormously beneficial for retailers dealing with airlines and airports.

avianca business: A Business History of Latin America Andrea Lluch, Martín Monsalve Zanatti, Marcelo Bucheli, 2024-11-14 This edited volume constitutes the first available comprehensive business history of Latin America available in English. It offers a unique synthesis of the development of capitalism in Latin America that takes into consideration the complexities of each country, while simultaneously understanding broader commonalities. With chapters written by a group of internationally renowned senior scholars with a long trajectory in business historical research, the volume is divided into two major areas. First, the development of capitalism in some of the major economies of the region (Argentina, Brazil, Chile, Colombia, Mexico, and Peru) through the lens of management strategic decisions and entrepreneurial activity. And second, the long-term evolution of factors affecting the region's particular evolution of capitalism and business systems. They include the rise of environmentally sustainable businesses; the impact of crime on entrepreneurial activity; the evolution of family firms, the changing strategies of multinational corporations in the region; the evolution of business groups; the role of female entrepreneurs; and the challenges for conducting business in a region with poor infrastructure. This insightful collection serves both as a straightforward introduction for those looking for a broad understanding of the region and for those interested in conducting comparative studies between Latin America and other areas of the world. It will be of direct appeal to researchers and advanced students of business and economic history and international business in particular.

avianca business: Aviation Law: Cases, Laws, and Related Sources Paul B. Larsen, Joseph Sweeney, John Gillick, 2022-06-08 In our post-9/11 world, the laws of aviation are under intense scrutiny. From torts law and victim compensation to passenger screening, pilots with guns, and international aviation agreements, the practice of aviation law is burgeoning. The book, **AVIATION LAWS: Cases, Laws, and Related Sources**, fills a gap in legal literature. It is directed to both practicing lawyers and to law students. The book introduces all the major areas of air law: International air law regime, crimes involving aircraft, economic regulation of domestic and international air carriage, litigation management, domestic and international liability regimes, governmental immunity from liability, airport law, airline travel restrictions, airport law, insurance, NTSB accident investigation, aircraft financing, FAA regulation of air safety, and airline labor relations. These subjects are presented not only in explanatory text, but also in cases and related source materials. The most important texts are annexed. The authors, Professors Larsen and Gillick, have regularly taught the course in Air Law at Georgetown University Law Center for more than 30 years. They have long time hands-on experience at the Department of Transportation and in private practice. Professor Sweeney, John D. Calamari Distinguished Professor of Law, has taught the course at Fordham University Law School for 30 years. He also has extensive transportation practice background. avianca business: Brazilian Civil Aviation Law Delphine Defossez, Inez Lopes, 2025-10-15
Brazilian aviation law is often a mystery for people outside Brazil. Despite being based on German and Italian law, Brazilian law does not resemble any other legal system; for instance, it took nearly a decade and the Brazilian Federal Supreme Court to finally acknowledge that the Montreal Convention prevails over the national consumer code. This book introduces Brazilian aviation law to professionals by laying out and discussing the applicable laws and competent authorities on essential elements of civil aviation to help professionals navigate this system. Brazilian aviation law has been through a process of major transformation, the latest occurring in December 2021 with the view to change half of the current Brazilian aeronautical code. Until 2005, the aviation sector was mainly regulated by the Aviation Civil Department (DAC), which was a department directly subordinated to the Ministry of Aeronautics and mainly comprised of military personnel. Although Brazilian aviation has been demilitarised through the creation of the National Civil Aviation Agency (ANAC) by the Federal Law No. 11.182 of 2005, its military past still influences the current regime and air traffic control remains part of the Ministry of Defence. Understanding the various agencies in charge of civil aviation and laws governing important aspects of this area is essential; consequently, this book discusses the laws applicable to competition, consumers, airport and aircraft operation, safety and accident investigations, and environmental concerns. Written in a format to meet the needs of lawyers, academics, and aviation professionals, the book explains the key concepts and laws applicable to aviation in Brazil. Each chapter explores an essential area of aviation law to present readers with an insider's understanding of the whole system to facilitate business relations with Brazil.

avianca business: Competitive Dynamics Of Air Transport In Brazil: 2008-2014 Luiz Fernando Abel, 2021-06-04 Commercial aviation in Brazil has been facing great changes in the past years, from the regulatory point of view to a competition perspective, given the increase in demand, revision of past legislation and the rise of new players in this market. The airline business has showed to be very dynamic in Brazil, with the rise and fall of a number of companies. One of them specifically, called VARIG - Portuguese acronym for Viação Aérea Rio-Grandense -, which stopped operating domestic and international routes in 2006, changed the market significantly, since it was the longest standing air company in the country and also the market leader. This scenario of disruption, after VARIG's bankruptcy, gave room to the consolidation of other major companies already operating at that time - TAM and Gol -, as well as the emergence of Avianca Brazil and Azul, which absorbed part of the increasing demand for air transport in the country and placed this market into a new era of competition. All these factors combined with the flexibility given, due to revision of legislation - referring to prices and alliances, for example -, have transformed the way business in the industry are run. Hence the changes in the way air companies operate nowadays and provide different types of services. Thus, the purpose of this work is to understand what are the competitive advantages of the Brazilian airline companies to face the local competition, given the changes between 2008 and 2014 in this sector's environment. In addition, this work aims to identify competitive changes with possible new entrants to this market in the future.
