best nyc business schools: *Finding the Best Business School for You* Everette E. Dennis, Sharon P. Smith, 2006-06-30 Ultimately, finding the best and most appropriate business school requires more than following trends and assessing rankings. Dennis and Smith offer an approach that is designed to help prospective MBA students cast their nets widely, thinking more expansively, creatively, and strategically, with both short- and long-term implications in mind. Discussing the pros and cons of a formal business education (in the context of evolving attitudes toward management and the role of the MBA in developing successful leaders), the authors help readers identify their underlying motivations for pursuing an MBA, learn how to read between the lines of the popular rankings, and utilize the concept of return on investment (ROI) to evaluate programs on the basis of their contribution to long-term professional and personal goals. At a time when one-fourth of all master's degrees conferred are in business, *Finding the Best Business School for You* offers practical insights for making wise decisions and getting the most out of the MBA experience. The truth is that, in response to changes in the global business environment, many schools are redesigning their curricula, forging closer ties with businesses, and giving students more freedom to customize their degrees. Some of the most innovative programs are being designed at public universities and other institutions out of the spotlight.

best nyc business schools: New York University's Stern School of Business Abraham L. Gitlow, 1995-06 American business schools from their inception in the 1880's, have grown dramatically both in quality and in numbers. Regarded as late as the 1950's as essentially vocational schools whose role in academia was still to be resolved, they are now among the most respected professional schools in the university community. In recent decades, this increase in prestige has been matched by the growth of both Bachelor's and MBA programs. The forces and events shaping this dramatic rise in importance have been recounted by Dean Emeritus of New York University's Stern School of Business, Abraham L. Gitlow. He brings his 45 years of experience as a faculty member at the Stern School to bear as he analyzes the educational and philosophical issues and tensions that marked the history of the school, and of American higher education in general, in the twentieth century.

best nyc business schools: Managing Elites Debra J. Schleef, 2006 How does one become a member of an elite profession? *Managing Elites* examines how elites-in-training contest, rationalize and ultimately enthusiastically embrace their dominant positions in society. Using interviews with 79 law and MBA students, the author argues that elite socialization requires both accommodation and resistance to professional ideologies. Students develop a collective cynicism about elements of their education, learning that their discipline imparts esoteric knowledge - but also claiming that they didn't learn anything. They struggle with the idea that fellow students are all equally intelligent and therefore deserving of elite status, and the continuing emphasis on activities that sort students. Students resist that paths to success promoted by school cultures-investment banking, consulting, or becoming partner in a large law firm. Such cynicism is indeed ultimately revealed to be temporary, as most students end up in full support of these jobs of least resistance. Their critiques do, however, create tensions: between competition and cooperation, between the individual and the collective, and between egalitarianism and elitism. Part of elite socialization is learning to deal with these tensions, or more specifically, to hold contradictory ideals at the same time.
