black owned business in baltimore: Businessman First Maurice W. Dorsey, 2014-03 More than his ad, More Parks' Sausages, Mom, Please! Henry G. Parks Jr. was a man before his time. Pioneering in the American free-enterprise system, he embarked on a journey leading to a multimillion-dollar industry. He was born in Atlanta, Georgia, to domestic parents and a paternal grandmother, who instilled Christian values and taught him the Bible. A few months after his birth, Parks Sr. relocated his family to Dayton, Ohio, the first state across the Mason-Dixon Line, seeking better job opportunities. During the depression and two more children, times were hard, and Parks Senior's wife joined him in the workforce. Together, they were able to hold the family together. Henry and his sisters attended segregated primary schools and integrated high schools. Henry read profusely and studied hard, graduating from Roosevelt High School with honors but to the resentment of his dad. The family had no idea Henry Jr. had plans to attend college. He worked a year at several jobs, one at the same hotel where his father worked as a bartender, washing dishes and taking out the trash. He saved his money and entered Ohio State University College of Commerce, never knowing at matriculation that the money he worked so hard to earn and was sending home for his parents to save for him was being spent to support the family household. Without money to pay tuition, he pursued scholarships and more work. He matriculated in 1935. After many endeavors in business, a numbers runner in Baltimore forwards the capital and also becomes a silent partner. Henry Junior's idea for a pork sausage manufacturing plant became a reality in 1951. Henry opened the H. G. Parks Inc. trading as Parks Sausage. With strong, aggressive leadership, brilliant marketing and advertising, Henry Jr. built a business that never had a losing year. Henry's success caught the attention of some of the leading corporate boards in this country along with national organizations and city, state, and federal leaders. They sought to bring him aboard to share his knowledge, leadership skills, and ability with other leading American businesses, government, and nonprofit leaders.

black owned business in baltimore: *Unlocking the Potential of Post-Industrial Cities* Matthew E. Kahn, Mac McComas, 2021-02-23 How can urban leaders in Baltimore, Cleveland, Detroit, Philadelphia, Pittsburgh, and St. Louis make the smart choices that can lead their city to make a comeback? The urban centers of New York City, Seattle, and San Francisco have enjoyed tremendous economic success and population growth in recent years. At the same time, cities like Baltimore and Detroit have experienced population loss and economic decline. People living in these cities are not enjoying the American Dream of upward mobility. How can post-industrial cities struggling with crime, pollution, poverty, and economic decline make a comeback? In *Unlocking the Potential of Post-Industrial Cities*, Matthew E. Kahn and Mac McComas explore why some people

and places thrive during a time of growing economic inequality and polarization—and some don't. They examine six underperforming cities—Baltimore, Cleveland, Detroit, Philadelphia, Pittsburgh, and St. Louis—that have struggled from 1970 to present. Drawing from the field of urban economics, Kahn and McComas ask how the public and private sectors can craft policies and make investments that create safe, green cities where young people reach their full potential. The authors analyze long-run economic and demographic trends. They also highlight recent lessons from urban economics in labor market demand and supply, neighborhood quality of life, and local governance while scrutinizing strategies to lift people out of poverty. These cities are all at a fork in the road. Depending on choices made today, they could enjoy a significant comeback—but only if local leaders are open to experimentation and innovation while being honest about failure and constructive evaluation. *Unlocking the Potential of Post-Industrial Cities* provides a roadmap for how urban policy makers, community members, and practitioners in the public and private sector can work together with researchers to discover how all cities can solve the most pressing modern urban challenges.

black owned business in baltimore: *The Land Was Ours* Andrew W. Kahrl, 2012-03-19 Main description: Driving along the coasts of the American South, we see miles of luxury condominiums, timeshare resorts, and gated communities. Yet, a century ago, a surprising amount of beachfront property in the Chesapeake, along the Carolina shore, and around the Gulf of Mexico was owned and populated by African Americans. In a pathbreaking combination of social and environmental history, Andrew W. Kahrl shows how the rise and fall of Jim Crow and the growing prosperity of the Sunbelt have transformed both communities and ecosystems along the southern seaboard. Kahrl traces the history of these dynamic coastlines in all their incarnations, from unimproved marshlands to segregated beaches, from exclusive resorts for the black elite to campgrounds for religious revival. His careful reconstruction of African American life, labor, and leisure in small oceanside communities reveals the variety of ways African Americans pursued freedom and mobility through the land under their feet. *The Land Was Ours* makes unexpected connections between two seemingly diverse topics: African Americans' struggles for economic empowerment and the ecology of coastal lands. Kahrl's innovative approach allows him fresh insights into the rise of African American consumers and the widespread campaigns to dispossess blacks of their property. His skillful portrayal of African American landowners and real-estate developers rescues the stories of these architects of the southern landscape from historical neglect. Ultimately, Kahrl offers readers a thoughtful, judicious appraisal of the ambiguous legacy of racial progress in the Sunbelt.

black owned business in baltimore: *My People, My Time* Deborah McCrayer, 2021-03-05 The African American people fought for the basic right afforded to us by the constitution to live free, then to be seen as equals in a world that often dismisses us. We have overcome many obstacles placed in front of us. While we can quickly recognize problems caused by others such as police and rightly seek justice, the biggest impediment we have yet to overcome is our intentional destruction of our people based on greed, success, money, and drugs. We, as a people, need to be like-minded and like-looking. We need to balance our beliefs and integrate faith into real life. In times of trouble, we lose perspective. Bad things happen to good and bad people; good things happen to good and bad people, but with the good and bad, we must find common ground for all to flourish. Inside, you will discover documented events in African American history and one woman's personal journey through two turning points that would have a profound impact on her people. This book is meant to remind us of the path we have journeyed and ask us to look, as a race, where are we headed and will the road we are on get us there. Together, we are strong. Our strength cannot be stolen but can be surrendered by our lack of action. We determine our destiny!

black owned business in baltimore: *Finding Your Roots, Season 2* Henry Louis Gates Jr., 2016-01-28 Who are we, and where do we come from? The fundamental drive to answer these questions is at the heart of *Finding Your Roots*, the companion book to the hit PBS documentary series. As scholar Henry Louis Gates Jr. clearly demonstrates, the tools of cutting-edge genomics and deep genealogical research now allow us to learn more about our roots and look further back in time than ever before. In the second season, Gates's investigation takes on the personal and genealogical histories of more than twenty luminaries, including Ken Burns, Stephen King, Derek Jeter, Governor Deval Patrick, Valerie Jarrett, and Sally Field. As Gates interlaces these moving stories of immigration, assimilation, strife, and success, he provides practical information for amateur genealogists just beginning archival research on their own families' roots and details the advances in genetic research now available to the public. The result is an illuminating exploration of who we are, how we lost track of our roots, and how we can find them again.

black owned business in baltimore: *Business in Black and White* Robert E. Weems, 2009-02-01 *Business in Black and White* provides a panoramic discussion of various initiatives that American presidents have supported to promote black business development in the United States. Many assume that U.S. government interest in promoting black entrepreneurship began with Richard Nixon's establishment of the Office of Minority Business Enterprise (OMBE) in 1969. Drawn from a variety of sources, Robert E. Weems, Jr.'s comprehensive work extends the chronology back to the Coolidge Administration with a compelling discussion of the Commerce Department's "Division of Negro Affairs." Weems deftly illustrates how every administration since Coolidge has addressed the subject of black business development, from campaign promises to initiatives to downright roadblocks. Although the government's influence on black business dwindled during the Eisenhower Administration, Weems points out that the subject was reinvigorated during the Kennedy and Johnson Administrations and, in fact, during the early-to-mid 1960s, when "civil rights" included the right to own and operate commercial enterprises. After Nixon's resignation, support for black business development remained intact, though it met resistance and continues to do so even today. As a historical text with contemporary significance, *Business in Black and White* is an original contribution to the realms of African American history, the American presidency, and American business history.

black owned business in baltimore: **The Big Cheat** David Cay Johnston, 2021-11-30 Pulitzer Prize-winning reporter and dean of Trumpologists David Cay Johnston reveals years of eye-popping financial misdeeds by Donald Trump and his family. While the world watched Donald Trump's presidency in horror or delight, few noticed that his lifelong grifting quietly continued. Less than forty minutes after taking the oath of office, Trump began turning the White House into a money machine for himself, his family, and his courtiers. More than \$1.7 billion flowed into Donald Trump's bank accounts during his four years as president. Foreign governments rented out whole floors of his hotel five blocks from the White House while lobbyists conducted business in the hotel's restaurants. Payday lenders and other trade groups moved their annual conventions to Trump golf resorts. And individual favor seekers joined his private Mar-a-Lago club with its \$200,000 admission fee in hopes of getting a few minutes with the President. Despite earning more than \$1 million every day he was in office, Trump left the White House as he arrived—hard up for cash. More than \$400 million in debt comes due by 2024, and Trump still lacks the resources to pay it back. "Few people are as well positioned to write an exposé of the former president as Johnston" (*The Washington Post*), and *The Big Cheat* offers a guided tour of how money flowed in and out of Trump's hundreds of enterprises, showing in simple terms how a corrupt president used our government for his benefit, even putting national security at risk. Johnston details the four most recent years of the corruption that has defined the Trump family since 1885 and reveals the costs of Trump's extravagant lifestyle for American taxpayers.
