boeing 777 business class turkish airlines: Airline Industry Nawal K. Taneja, 2016-06-23 Many business sectors have been, and are being, forced to compete with new competitors-disrupters of some sort-who have found new ways to create and deliver new value for customers often through the use of technology that is coupled with a new underlying production or business model, and/or a broad array of partners, including, in some cases, customers themselves. Think about the disruption created by Apple by the introduction of the iPod and iTunes, and by Netflix within the entertainment sectors using partners within the ecosystem; think of Uber that didn't build an app around the taxi business but rather built a mobility business around the app to improve customer experience. Airline Industry considers whether the airline industry is poised for disruptive innovations from inside or outside of the industry. Although airlines have a long history of continuous improvements and innovation, few of their innovations can be classified as disruptive innovations. The few disruptive innovations that did emerge were facilitated, for example by new technology (jet aircraft) and government policy (deregulation). Now there are new forces in play-customers who expect to receive products that are more personalized and experience-based throughout the entire journey, new customer interfaces (via social media), advanced information systems and analytics, financially powerful airlines based in emerging nations, and the rise of unencumbered entrepreneurs who think differently as well as platform-focused integrators.

boeing 777 business class turkish airlines: Havayollarında hizmet: konfor, faaliyet ve performans ilişkisinin değerlendirilmesi Dr. Tüzün Tolga İNAN, 2019-10-20 17 Aralık 1903 tarihinde Wright Kardeşlerin ilk başarılı motorlu uçuş denemesiyle başlayan sivil havacılık tarihi günümüzde dünyanın en büyük endüstrilerinden biri haline gelmiştir. Her ne kadar 2003 yılına kadar ülkemiz için sivil havacılık büyük bir aşama kaydetmese de, 2003 yılından sonra milat niteliğinde gelişmeler gerçekleşmiştir. Doktor ünvanını aldığım halen sivil havacılık alanında lisanslandırmaya sahip tek Üniversite olan Anadolu Üniversitesi ile başlayan sivil havacılık alanında ihtisas veren Üniversite ve Meslek Yüksekokulları, özellikle 2011 yılından itibaren sayıca üst limitlere ulaşmıştır. Ancak unutmamak gerekir ki, havacılık bir nevi aşkla ifa edilmesi gereken bir meslektir. İçerisinde pilotaj, hat ve bakım teknisyenliği, uçuş hareket yöneticiliği (dispeçerlik), uçuş ve misafir kontrol uzmanlığı, kabin, hareket, yolcu hizmetleri ve kargo memurluğu olmak üzere birçok iş tanımı bulundurmaktadır. Kendim için düşündüğüm zaman bana havacılığı sevdiren kişi babam olmuştur. Özellikle sektörel olarak 30 yılın üzerinde Türk Hava Yolları tecrübesinin bulunması ve beni havacılık alanında doktora yapmaya itmesi kariyerim için en önemli adımlardan bir tanesi oldu. Tabii herşey burada anlatmak istediğim kadar güllük gülistanlık olmamakla birlikte, vardiyalı çalışma düzeni ve yoğun tempo havacılığın olmazsa olmazıdır. Bu nedenle öğrencilere ve bu alanda kariyer yapmak isteyenlere tavsiyem, havacılığın para için yapılacak bir meslek olmadığının bilincinde olmaları gerektiğidir. Bu kitabı yayımlama sebeplerimden bir tanesi de kamuoyu tarafından bilinmeyen ya da bilindiği zannedilen bu endüstride hizmet-konfor ve performans parametrelerinin ne olduğunun ve bir havayolu şirketini hangi ölçüde etkilediğini göstermek istememdir. Bu kitap umarım hem akademik hem de sektörel camiada tüm havacılık çalışanlarına ve havacılık sevdalarına faydalı olacak bir eser olacaktır. Unutmamak gerekir ki burada önemli olan konu 5 yıllık değerler ile 2016 yılında hangi verilerin elde edildiği değil, bu verilerin havacılık şirketleri için öneminin farkına varılması olacaktır.
