We have all heard the stories. There are likely going to be some changes and effects of the Y2K that strike randomly in the communities around us in the coming months. The Y2K is not a singular day event, it is a series of events and risks that coincide during a six-month period with interrelated consequences dispersed across an 18-month period. The government, business, and banking communities seem to be going through the paces of readiness and testing, but what about the rest of us? What can we do to prepare and avert the certain inconveniences and randomly dispersed more serious impacts that are likely to come? Y2K and the American Dream focuses on the preparedness of the individual and their families. It's purpose is not to advocate reactionary panic, but to induce sound, financial, and practical readiness in a timely fashion to assure minimal impact by the fallout of the event itself. The Millennium is methodically divided into four "Millennium Periods" and six specific "Millennium Impact Categories." The chapters detail those periods and categories and leads to a "preparation checklist" that assesses specific risks that must be addressed in each category and in each period in order to minimize overall Y2K impact.
