better business scam tracker: Fraud Edward J. Balleisen, 2018-12-18 A comprehensive history of fraud in America, from the early nineteenth century to the subprime mortgage crisis In America, fraud has always been a key feature of business, and the national worship of entrepreneurial freedom complicates the task of distinguishing salesmanship from deceit. Barnum through the eras of Charles Ponzi and Bernie Madoff. This unprecedented account describes the slow, piecemeal construction of modern institutions to protect consumers and investors—from the Gilded Age through the New Deal and the Great Society. better business scam tracker: *Dark Psychology* Wesley Felt, How do you encourage someone to eagerly make a purchase from you? How can you ensure the sale? The most effective way to gain someone's trust and motivate them to buy from you or join your team is to carefully enter the conversation already happening in their mind. By doing so, you help your prospect see the value of your service through the information you provide, leading them to recognize their need for what you offer. I once heard a quote that says, People don't like to be sold to, but they pretend to buy. Numerous sales skills and manipulation techniques exist for building trust with potential customers superficially. However, the most powerful way to influence and persuade is by understanding their thoughts, feelings, desires, and the problems they seek to solve, particularly in your area of expertise. Unless you possess mind-reading abilities, the best approach is to ask open-ended, empowering questions. This helps build rapport and engages in meaningful discussion to guide them toward the desired outcome, linking their needs with the benefits and features of your product, service, and your why. People have a deep-seated love for stories, something we've been exposed to since childhood. The most effective way to inspire rather than coerce is by sharing your personal story—why you are in the business and the benefits you, your family, and your clients have experienced. It may seem cliché, but being a product of the product and offering relevant testimonials that align with the answers you obtained from your open-ended questions can be powerful.
