How—and why—did revolutionary companies like Google, Apple, Cisco, and Southwest Airlines come about? The growth and success of such companies seems extraordinary, if not impossible, yet it has happened repeatedly despite the advance and proliferation of businesses to the point where it would seem that everything's already been done. It's the specific business plans and mindsets of the people behind these rare transformative companies that enable these stunning achievements. In *Built for Change: Essential Traits of Transformative Companies*, the author reveals what distinguishes these unique enterprises from the multitudes striving for success in a fiercely competitive world. This book will fascinate and benefit small business owners, entrepreneurs, and CEOs of large corporations, as well as venture capitalists, institutional fund managers, angel investors, and university professors and business students. **best dell laptop business: Corporate China 2.0** Qiao Liu, 2016-12-23 This book argues that the rise of great firms - those with sustainable high return on invested capital (ROIC) - will lay the foundation for China's successful economic transformation. Drawn from the author's research on corporate finance and the Chinese economy, the author maintains that being big could be easy but means little for corporate China, especially in the context of China's transition from an investment-led economy to an efficiency-driven one. The work discusses both internal and external impediments that lead to lack of great companies in China and suggests institutional conditions which foster the rise of great companies in China, including, reversing the government's obsession with GDP, reforming the financial system, and promoting entrepreneurship. Policy makers, investors, corporate executives, and MBA students and scholars will appreciate case studies of Huawei, Alibaba, Xiaomi, and Lenovo, among others, that illustrate the endeavors made by Chinese entrepreneurs at the grassroots level and highlight what makes successful companies in China.
