### **best manufacturing software small business: Logistics and Manufacturing Outsourcing**

James A. Tompkins, Steven W. Simonson, Bruce W. Tompkins, Brian E. Upchurch, 2005 This is unlike any outsourcing book you have seen because it is specifically designed for logistics and manufacturing executives. To successfully outsource today, you need to gain a core competency in outsourcing, avoid setbacks, and understand how to keep the outsourcing relationship robust. Most organizations do not have outsourcing as a core competency, and this is why so many outsourcing relationships fail. Altogether, the four authors of this book have nearly 100 years of solid experience in logistics and manufacturing outsourcing. They have seen outsourcing from all angles'either as providers, consultants, clients, attorneys or expert witnesses'and it is not always a pretty picture. This expertise makes the authors uniquely qualified to teach companies how to harness the real power behind outsourcing.
