best entrepreneur business schools: Entrepreneurship and the Creative Economy

Colette Henry, Anne de Bruin, 2011-01-01 Creative industries are becoming increasingly important to the economic and social wealth of most economies. They are also inherently linked to entrepreneurship and this book provides thoughtful and comprehensive insights into the role of creative industries in contemporary economies and to the interface between creative firms and entrepreneurship. The book draws upon cutting edge research to illustrate and explain the diversity and nature of creative industries and to provide informed discussion on key topics relevant to developing theory and understanding of this vital sector. This book is a must for anyone interested in understanding and learning more about the opportunities which creative industries have created for entrepreneurship and the benefits which an entrepreneurial mind-set can offer to the creative industries.- Eleanor Shaw, University of Strathclyde, UK 'The creative industries have long been a hotbed of entrepreneurial activity. For decades vaudeville, theater, movies, art, and music have exemplified the key aspects of entrepreneurship, and the participants in these industries search for novelty and create innovations. But despite the fact that some countries have industrial policies to focus on creative arts, this is a little studied area of entrepreneurship. Colette Henry and Anne de Bruin offer one of the first academic books that showcases research in the creative industries. This volume presents a solid theoretical foundation and offers fascinating chapters that consider a variety of topics such as regional strategies, education, creative expression and the evolution of industry.'

E. Dennis, Sharon P. Smith, 2006-06-30 Ultimately, finding the best and most appropriate business school requires more than following trends and assessing rankings. Dennis and Smith offer an approach that is designed to help prospective MBA students cast their nets widely, thinking more expansively, creatively, and strategically, with both short- and long-term implications in mind. Discussing the pros and cons of a formal business education (in the context of evolving attitudes toward management and the role of the MBA in developing successful leaders), the authors help readers identify their underlying motivations for pursuing an MBA, learn how to read between the lines of the popular rankings, and utilize the concept of return on investment (ROI) to evaluate programs on the basis of their contribution to long-term professional and personal goals. At a time

when one-fourth of all master's degrees conferred are in business, Finding the Best Business School for You offers practical insights for making wise decisions and getting the most out of the MBA experience. The truth is that, in response to changes in the global business environment, many schools are redesigning their curricula, forging closer ties with businesses, and giving students more freedom to customize their degrees. Some of the most innovative programs are being designed at public universities and other institutions out of the spotlight.

best entrepreneur business schools: *Creativity and Entrepreneurial Performance* W. Edward McMullan, Thomas P. Kenworthy, 2014-10-18 The essential problem in entrepreneurship is improving the performance of entrepreneurs. The most important theories will be the ones that most enable us to predict and then ultimately influence entrepreneurial performance. This book develops a new and more accurate theory of entrepreneurial performance based in entrepreneurial creativity. The field of entrepreneurship has a long tradition of expecting entrepreneurial performance to be influenced by creativity, tracing back even before the pioneering work of Joseph Schumpeter (1883 to 1950), who defined entrepreneurship as creative-destruction—creating the new by supplanting or destroying the old. Subsequently, psychologist Robert Sternberg defined creativity as broadly encompassing creative aspects of personality, motivation, intellect, thinking style and relevant knowledge. Using Sternberg's definition of creativity, the authors reviewed the evidence directly linking entrepreneurial creativity and entrepreneurial performance, concluding that the linkage is both statistically and practically significant. In order to scientifically tie entrepreneurship to creativity the book pursues a number of major objectives: In parts one and two, the authors remind us of our scientific challenge in the light of the depressing levels of performance typically to be found in the real world of entrepreneurship and explores the limitations of the dominant paradigms driving research in the field of entrepreneurship today. In part three, they bring together existing evidence to demonstrate the predictive and explanatory powers of creativity in relation to entrepreneurship. In part four, they further explore correlations between creativity and entrepreneurial performance at the individual and macro or society, levels. In summary, the book offers a bold predictive theory linking entrepreneurial creativity to entrepreneurial performance, however neither as boldly as a definitional linkage nor as timidly as one in a hundred or so factors potentially explaining entrepreneurial performance. This result is a general scientific theory that offers a serious challenge to entrepreneurial scholars who are pursuing other means for understanding the causality of entrepreneurial performance.
