**business class seat air india:** *Creating Value for Leaders* Gautam Mahajan, 2023-06-08  
Creating value is the foundation of all business. It's what sets you apart from your competition, secures long-term customers, and brings distinct meaning to your brand and your stakeholders. Without creating value for your business, your unique offering will be seen as just another commodity in the eyes of your target market. Creating value is in every business leader's vocabulary and uppermost in their overall strategy. In fact, creating value is the purpose of a company according to the Business Roundtable and the World Economic Forum. That is another key reason why more people want to understand and utilise value creation for their benefit and the good of their stakeholders. Many companies and leaders seek to create value but do not know how to. As a result, they create and destroy value unconsciously. This book shows you how to create value consciously. To create long-term value, organizations need to put in place the mindset, capabilities, and relationships that enable them to meet the needs of their customers and stakeholders. This book makes value creation understood and used by executives and leaders more effectively. The book describes value creation in its various nuances, how it arises, how it is used, and the width and scope of value creation, from how it impacts a company and how that company can become more successful by creating value for customers and other stakeholders. The author also provides tips for CEOs, managers, HR, and other professionals on how to succeed in value creation as a long-term strategy and in day-to-day work. **business class seat air india: Food in the Air and Space** Richard Foss, 2014-12-11 In the history of cooking, there has been no more challenging environment than those craft in which humans took to the skies. The tale begins with meals aboard balloons and zeppelins, where cooking was accomplished below explosive bags of hydrogen, ending with space station dinners that were cooked thousands of miles below. This book is the first to chart that history worldwide, exploring the intricacies of inflight dining from 1783 to the present day, aboard balloons, zeppelins, land-based aircraft and flying boats, jets, and spacecraft. It charts the ways in which commercial travelers were lured to try flying with the promise of familiar foods, explains the problems of each aerial environment and how chefs, engineers, and flight crew adapted to them, and tells the stories of pioneers in the field. Hygiene and sanitation were often difficult, and cultural norms and religious practices had to be taken into account. The history is surprising and sometimes humorous—at times some ridiculous ideas were tried, and airlines offered some strange meals to try to attract passengers. It's an engrossing story with quite a few twists and turns, and this first book on the subject tells it with a light touch.

**business class seat air india: The Dismantling of India** TJS George, 2022-10-03 In October 1947, two months after Independence, TJS George arrived in Bombay. He was nineteen years old, with a degree in English Literature. He sent out job applications—to the Air Force and to the city's English-language newspapers. Only one organization cared to reply, The Free Press Journal. The editor was known to hire anyone who asked for a job, but most new hires were sacked in a fortnight. George was put on the news desk as a sub-editor and eventually became an assistant editor. In Patna, as editor of The Searchlight, he was arrested by the chief minister for sedition. He spent three weeks in Hazaribagh Central Jail. In Hong Kong, he worked for the Far Eastern Economic Review as regional editor; in New York he was a writer for the United Nations population division; and, back in Hong Kong, in 1975, he founded Asiaweek. Six years later, he returned to India and settled in Bangalore. He began a column for Indian Express that ran without a break for twenty-five years, until 2022. His seventy-five years of journalism, concurrent with India's development as an independent nation, make for a unique understanding of events and personalities. Acclaimed for his widely historical, pan-Asian vision, George brings this far-flung experience to a compulsively readable new book, The Dismantling of India. It is the story of India told in 35 concise biographies, beginning with Jamsetji Tata and ending with Narendra Modi.
