business economics uchicago: Wall Street's War on Workers Les Leopold, 2024-02-22
2024 Foreword INDIES Book of the Year Awards Finalist for Political and Social Sciences "This book gave me a new lens to see the world."—Robert Krulwich, former co-host of WNYC's Radiolab
Addressing the pressing issues affecting everyday Americans during an election year is essential—and one of our nation's most profound challenges is the devastating impact of mass layoffs. Layoffs upend people's lives, cause enormous stress, and lead to debilitating personal debt. The societal harm caused by mass layoffs has been known for decades. Yet, we do little to stop them. Why? Why do we allow whole communities to be destroyed by corporate decision-makers? Why do we consider mass layoffs a natural, baked-in feature of modern financialized capitalism? And what are our elected officials going to do about it? In *Wall Street's War on Workers*, Les Leopold, co-founder of the Labor Institute, provides a clear lens with which we can see how healthy corporations in the United States have used mass layoffs and stock buybacks to enrich shareholders at the expense of employees. With detailed research and concise language, Leopold explains why mass layoffs occur and how our current laws and regulations allow companies to turn these layoffs into short-term financial gains. Original and insightful, *Wall Street's War on Workers* places US labor practices in the broader context of our social and political life, examining the impact financial strip-mining and legalized looting are having on party politics, destroying the integrity of democratic institutions. Leopold expertly lays out how the proliferation of opioids coupled with Wall Street's destruction of jobs in West Virginia, Pennsylvania, Michigan, and Wisconsin have led to widespread mass layoff fatalism. Democrats have unarguably lost the longstanding support of millions of urban and rural workers, and Leopold points out how party leaders have been wrong about the assumption that the white working class is becoming less progressive and motivated to abandon the Democratic Party by reactionary positions on divisive social issues. With deep analyses, stark examples, and surprisingly simple proactive steps forward, Leopold also asserts that: Surviving and thriving in a competitive global economy does not require mass layoffs. A new virulent, financialized version of American capitalism is policy driven. To end mass layoffs, Wall Street's domination of our economy must end. The accepted "wisdom" about white working-class populism is wrong. Ending stock buybacks and changing corporate officers' pay structures could eliminate mass layoffs. Mass layoffs are not the result of inevitable economic "laws" or new technologies like artificial intelligence. Both groundbreaking and urgent, *Wall Street's War on Workers* not only offers solutions that could halt mass layoffs but also offers new hope for workers everywhere. "Leopold offers a contrarian yet compelling take on America's 'white working class' . . . [and says] Democrats in 2024 ignore this massive, potentially sympathetic voting bloc at their peril."—Booklist (starred review) "*Wall Street's War on Workers* the book neither party wants you to read . . . [It] penetrates one of the chief media deceptions of the 21st century, namely that working-class voters are driven by racism and xenophobia, and not by a more simple, enraging motive: they've been repeatedly ripped off, by the wealthy donors to both parties."—Matt Taibbi

business economics uchicago: Handbook on the Economics of Retailing and Distribution Emek Basker, 2016-01-29 This Handbook explores and critically examines current research in economics and marketing science on key issues in retailing and distribution. Providing a rich perspective for the discussion of public policy, contributions from several disciplines and continents range from the history of chains and the impact of multinational retailers on international trade patterns to US merger policy in the retail context, the rise of the Internet, and consumer-to-consumer sales. The chapters address methodological issues such as the structural estimation of entry games between retailers, productivity measurement when both inputs and output are not fully observable, and demand estimation with variable assortment. Policy issues explored include mergers, zoning, and the regulation of buyer power, while other chapters address some of

the recent exciting developments in technology, retail formats, and data availability. The book goes on to study the changes in online retailing and 'big data', and to examine competition in specific retail sectors including gasoline stations, automobile dealerships, supermarkets, and 'big box' retail. This state-of-the-art Handbook is an essential reference for students and academics of economics and marketing science, and offers an outsider's perspective to specialists in operations research, data analytics, geography, and sociology.

business economics ouchicago: From Political Economy to Economics through Nineteenth-Century Literature Elaine Hadley, Audrey Jaffe, Sarah Winter, 2019-09-26 Focusing on the transition from political economy to economics, this volume seeks to restore social content to economic abstractions through readings of nineteenth-century British and American literature. The essays gathered here, by new as well as established scholars of literature and economics, link important nineteenth-century texts and histories with present-day issues such as exploitation, income inequality, globalization, energy consumption, property ownership and rent, human capital, corporate power, and environmental degradation. Organized according to key concepts for future research, the collection has a clear interdisciplinary, humanities approach and international reach. These diverse essays will interest students and scholars in literature, history, political science, economics, sociology, law, and cultural studies, in addition to readers generally interested in the Victorian period.

business economics ouchicago: Meals Matter Michael Symons, 2020-06-02 Until the early nineteenth century, political philosophy and economics were dining companions. Both took up fundamental questions of how we should feed one another. But with the rise of corporate capitalism, modern economics lost sight of its primary task and turned away from the complexities of real people's sustenance in favor of the single-minded pursuit of money. In *Meals Matter*, Michael Symons returns economics to its roots in the distribution of food and the labor required. Setting the table with vivid descriptions of conviviality, he offers a gastronomic rebuttal to the narrow worldview of mainstream economics. Engaging with a wide variety of thinkers—including Epicurus, Enlightenment philosophers such as Thomas Hobbes and John Locke, the gastronome Jean Anthelme Brillat-Savarin, and economic theorists from François Quesnay and Adam Smith through the neoliberals—Symons traces how we went astray and how we can find our way back to a more caring, sustainable way of life. He finds hope for shared "table pleasure" in institutions like community gardens, street markets, and banquets and in eating fresh, local, and "slow" food. An innovative, historically based argument at the intersection of food history and social thought, *Meals Matter* challenges us to reject the economics of greed in favor of a community-based economics of sharing and gastronomic enjoyment.

business economics ouchicago: Liberalism in Neoliberal Times Alejandro Abraham-Hamanoiel, Des Freedman, Gholam Khiabany, Kate Nash, Julian Petley, 2017-06-09 An exploration of the theories, histories, practices, and contradictions of liberalism today. What does it mean to be a liberal in neoliberal times? This collection of short essays attempts to show how liberals and the wider concept of liberalism remain relevant in what many perceive to be a highly illiberal age. Liberalism in the broader sense revolves around tolerance, progress, humanitarianism, objectivity, reason, democracy, and human rights. Liberalism's emphasis on individual rights opened a theoretical pathway to neoliberalism, through private property, a classically minimal liberal state, and the efficiency of "free markets." In practice, neoliberalism is associated less with the economic

deregulation championed by its advocates than the re-regulation of the economy to protect financial capital. Liberalism in Neoliberal Times engages with the theories, histories, practices, and contradictions of liberalism, viewing it in relation to four central areas of public life: human rights, ethnicity and gender, education, and the media. The contributors explore the transformations in as well as the transformative aspects of liberalism and highlight both its liberating and limiting capacities. The book contends that liberalism—in all its forms—continues to underpin specific institutions such as the university, the free press, the courts, and, of course, parliamentary democracy. Liberal ideas are regularly mobilized in areas such as counterterrorism, minority rights, privacy, and the pursuit of knowledge. This book contends that while we may not agree on much, we can certainly agree that an understanding of liberalism and its emancipatory capacity is simply too important to be left to the liberals Contributors Alejandro Abraham-Hamanoiel, Patrick Ainley, Abdullahi An-Na'im, Michael Bailey, Haim Bresheeth, Başak Çalı, David Chandler, William Davies, Costas Douzinas, Natalie Fenton, Des Freedman, Roberto Gargarella, Priyamvada Gopal, Jonathan Hardy, John Holmwood, Ratna Kapur, Gholam Khiabany, Ray Kiely, Monika Krause, Deepa Kumar, Arun Kundnani, Colin Leys, Howard Littler, Kathleen Lynch, Robert W. business economics uchicago: City Development and Internationalization in China

Qianyi Wang, Kee Cheok Cheong, Ran Li, 2019-11-20 This book explores how history shapes city development, assesses the role of government at national and sub-national levels through case studies of three secondary cities, Quanzhou, Yiwu and Nannin, and provides a link between city development and internationalization. In doing so, the book highlights alternative paths to development and internationalization that have received little attention in mainstream discussions. The case studies in the book provide insights into the development and internationalization of cities, linking them to historical, social, institutional and economic factors—narratives that bridge the two themes of city development and internationalization. Strong analyses are accompanied by photographs and charts that allow the reader to learn about Chinese cities beyond the major urban areas in China, garner better understanding of the role of the Chinese state, and appreciate the relevance of “city-specific assets” for city planning.

Francis Donbesuur, Kwabena Frimpong, Robert Opoku, Marcia Mkansi, Stella Nyongesa, 2025-10-23 Inclusive Entrepreneurship in Africa offers a timely and essential examination of how diversity, equity, and inclusion are reshaping the continent's entrepreneurial landscape. Bringing together cutting-edge research, lived experiences, and practical strategies, this book highlights the untapped potential of women, refugee communities, and marginalised groups across Africa and the Global South. Organized into three thematic parts, the book explores the lived realities and innovation

potential of women and refugee entrepreneurs; the performance and strategic advantages of gender-diverse entrepreneurial teams; and the role of inclusive design in building trusted, sustainable ventures. Each chapter offers new insights into how systemic barriers can be overcome through inclusive practices, stakeholder engagement, and culturally grounded entrepreneurship. Far from treating inclusion as a peripheral issue, this volume positions it as central to Africa's entrepreneurial future. *Inclusive Entrepreneurship in Africa* is a powerful call to action for scholars, policymakers, investors, and practitioners to build more equitable ecosystems where all entrepreneurs – regardless of gender, background, or ability – can thrive and contribute to sustainable development across the continent.
