business ct gov: **101 Businesses You Can Start with Less Than One Thousand Dollars** Heather L. Shepherd, 2007 According to a study by the U.S. Department of Health and Human Services, people starting their working careers will face the following situation when they retire age at age 65: they will have annual incomes between \$4,000.00 and \$26,000.00. According to the Social Security Administration, today's retirees can only count on corporate pensions and Social Security for 61 percent of their income at retirement. The remainder must come from other sources. If the same holds true in the future, today's workers need to accumulate enough in personal savings to make up a 39 percent shortfall in their retirement income. The solution for many after they have played enough golf and caught enough fish will be to start a small part-time business. Detailed in this new book are over 100 business ideas that can be started for very little money and yet may provide retired people with a lot more money than they would earn being paid by the hour. This is a collection of businesses selected especially for retirees who are interested in augmenting their income. These businesses can be started with minimum training and investment and are all capable of producing extra income.

business ct gov: Tapping State Government Information Sources Lori L. Smith, Daniel C. Barkley, Daniel D. Cornwall, Eric W. Johnson, J. Louise Malcomb, 2003-11-30 Each state government produces large varieties and quantities of useful information that are largely unknown outside their state of origin. This book leads the public to the most useful information sources produced by each state, as well as to depository libraries that will facilitate more effective research. For each of the 50 states, important publications are detailed, along with information on how to obtain them. The publications' topics range from crime statistics to vital statistics, business statistics, health information, statistical abstracts, education directories, state budgets, economic indicators, state laws and legal information, and more. Tapping State Government Information Sources has a broader focus than previously published books in this subject area, most of which have focused solely on depository laws, useful state publications, or indexes to state publications. This book covers all three. The first chapter describes print and electronic sources that provide information about all 50 states. Each state's resources are then described in individual chapters. When possible, information about how to order a copy of the source is given, as are Web addresses for titles that are available online. At the beginning of each state chapter, the state's legal definition of public document or its equivalent is given, which may be of interest to librarians in states that are reexamining their own depository laws.

business ct gov: Cannabis Laboratory Fundamentals Shaun R. Opie, 2021-03-09 The legislative requirement for cannabis to undergo laboratory testing has followed legalization of medical and recreational use in every U.S. state to date. Cannabis safety testing is a new investment opportunity within the emerging cannabis market that is separate from cultivation, processing, and distribution, allowing individuals and organizations who may have been reluctant to enter previously a new entry route to the cannabis space. However, many of the costs, timelines, operational requirements, and compliance issues are overlooked by people who have not been exposed to regulated laboratory testing. Cannabis Laboratory Fundamentals provides an in-depth review of the key issues that impact cannabis testing laboratories and provides recommendations and solutions to avoid common - but expensive - mistakes. The text goes beyond methodology to include sections on economics, regulation, and operational challenges, making it useful for both new and experienced cannabis laboratory operators, as well as all those who want to understand the opportunities and risks of this industry.

business ct gov: *Prison Librarianship Policy and Practice* Suzanna Conrad, 2016-11-10

Prisoners are in a grey area regarding library services. Prison libraries violate many tenets of librarianship, with the justification of maintaining order. The field is de-professionalized--many positions are filled by persons without degrees in library science, and corrections administrators often write policy for services. Critics cite the need to implement public library service models despite practical difficulties. This book investigates state, national and international policies on prison libraries, reviews literature on the topic and describes partnerships between prisons and public libraries. Results from a national survey and follow-up interviews are included, providing a full narrative of policy outcomes in U.S. prisons.

business ct gov: An Introduction to Internet-Based Financial Investigations Kimberly Goetz, 2016-04-08 Increasingly, employees of regulatory bodies, law enforcement agencies and others who are not trained forensic accountants or experienced investigators find themselves responsible for conducting what amount to financial investigations. An engineer who oversees the cleanup of a toxic waste site might need to track down the former owners of the site to find the polluter. Perhaps the applicable licensing agency receives a complaint that an attorney mishandled a client's money. Maybe it's the attorney who needs help finding the assets with which a client's former spouse has absconded. Training in investigation techniques tends to be very limited for many employees. Training on how to find information without incurring significant expense is virtually nonexistent. This book helps fill the void. An Introduction to Internet-Based Financial Investigations will help anyone who conducts financial investigations as part of their job to reduce their dependence on trial and error by showing them where and how to look. Using clear sections describing how to approach an investigation, including the ethical perspective; what to look for and what you find; what free and low cost internet resources are available to support investigations; and how to assemble and present the results of investigations, Kimberly Goetz guides students and beginning investigators through the complex world of financial investigations.
