business class new york london: Driving Airline Business Strategies through Emerging Technology Nawal K. Taneja, 2017-03-02 In the rapidly evolving airline industry, new technologies play an increasingly critical role in the delivery of real and perceived value in reducing costs, enhancing revenue, and improving customer service and customer safety/security. This book focuses at a senior executive level, examining the key forces affecting the airline business and their potential in terms of short and long-term strategies. The author discusses the role of emerging technology on the airline industry, defined very broadly and including computers, information, databases, aircraft, telecommunications, Internet, wireless, speech recognition, face recognition, etc. His argument is that technology should not only be an enabler of business strategy but crucially the driver of business strategy. The central theme is the vital interaction between technology and business strategy across a wide spectrum of functions - executives sharing their insights of what is needed in terms of revolutions in consumers, technologies, and productivities. What has held airlines back are not so much legacy systems but legacy mindsets, organizational structures and processes, as well as the intelligent selection, investments, and implementation of value-adding technologies. The book is the outcome of the author's own experience while working with a number of airlines and his participation in many discussions with practitioners in the airline and technology firms.

business class new york london: Transculturalism and Business in the BRIC States Yvette Sánchez, Claudia Franziska Brühwiler, 2016-03-03 Transculturalism and Business in the BRIC States, edited by Yvette Sánchez and Claudia Franziska Brühwiler, is the first handbook on the BRIC States that offers a transcultural perspective, which goes beyond the typical 'how to' manuals or economic projections and provides an understanding of transculturalism as it is studied and practiced in the respective countries themselves. This unique reference book also offers insights into the relations between the corresponding states and the challenges facing those trying to foster more intense business exchanges. The reader learns to interpret cross-cultural issues from the perspectives of the BRIC states themselves and gains insight into the way scholars in the BRIC area reflect on transculturalism. Moreover, it introduces the reader to fresh visualizations that help consider transculturalism beyond the known categories. The book will appeal, on the one hand, to

practitioners who are active in the BRIC states and wish to better grasp the challenges to business relations, as well as the intra-area dynamics and, on the other hand, to scholars in transcultural studies and international management, due to its insider approach. Since the book combines theoretical concepts with a clear geographic focus and a critical approach to traditional models, it is suitable for both academic audiences as well as for practitioners who appreciate a sound theoretical base and a fresh take on a subject.

Offering a sweeping transatlantic perspective, this book explains the current obsession with automobiles by delving deep into the motives of early car users. It provides a synthesis of our knowledge about the emergence and persistence of the car, using a broad range of material including novels, poems, films, and songs to unearth the desires that shaped our present "car society." Combining social, psychological, and structural explanations, the author concludes that the ability of cars to convey transcendental experience, especially for men, explains our attachment to the vehicle.

business class new york london: *Business and Society* Doctor Kean Birch, Mark Peacock, Richard Wellen, Caroline Hossein, Sonya Scott, Alberto Salazar, 2017-01-15 Corporations dominate our societies. They employ us, sell to us and influence how we think and who we vote for, while their economic interests dictate local, national and global agendas. Written in clear and accessible terms, this much-needed textbook provides critical perspectives on all aspects of the relationship between business and society: from an historical analysis of the spread of capitalism as the foundation of the 'corporate' revolution in the late nineteenth century to the regulation, ethics and exclusionary implications of business in contemporary society. Furthermore, it examines how corporate power and capitalism might be resisted, outlining a range of alternatives, from the social economy through to new forms of open access or commons ownership.

business class new york london: The Origins of Postcommunist Elites Gil Eyal, 2003 How is it that Czechoslovakia's separation into two countries in 1993 was accomplished so peacefully -- especially when compared with the experiences of its neighbors Russia and Yugoslavia? This book provides a sociological answer to this question -- and an empirical explanation for the breakup of Czechoslovakia -- by tracing the political processes begun in the Prague Spring of 1968. Gil Eyal's main argument is that Czechoslovakia's breakup was caused by a struggle between two fractions of what sociologists call the new class, which consisted primarily of intellectuals and technocrats. Focusing on the process of polarization that created these two distinct political elites, Eyal shows how, in response to the events of the ill-fated Prague Spring, Czech and Slovak members of the new class embarked on divergent paths and developed radically different, even opposed, identities, worldviews, and interests. Unlike most accounts of postcommunist nationalist conflict, this book suggests that what bound together each of these fractions -- and what differentiated each from the other -- were not national identities and nationalist sentiments per se, but their distinctive visions of the social role of intellectuals. business class new york london: The British Business Elite John Fidler, 2024-11-01 First published in 1981, *The British Business Elite* is a study of the attitudes to class, status and power of top businessmen in Great Britain, based upon first-hand interviews with chairmen, chief executives and other directors of Britain's largest industrial, banking and insurance companies: men of genuine wealth and power. Dr Fidler produces important empirical data in a field of study which has been plagued with problems of access; a field in which much of the theory has been based on assumptions. The book includes a careful examination of the background and career of those interviewed; a discussion of the way in which businessmen see the objectives of their companies, particularly relevant to the long-standing debate over the ownership and control of corporations; their views of class and status and of the power of businessmen in Britain. Finally, Dr Fidler considers the implications of the research for future theory and investigation.

business class new york london: The Marwari Heritage D.K. Taknet, IntegralDMS, 2016-07-22 From the early Vedic period, the Vaishyas, the oldest mercantile community of India, generated wealth for the nation through their remarkable efforts. Their Marwari offshoots were appointed by many rulers as ministers, advisors and diwans and were recognised as the first philanthropists in India. *The Marwari Heritage* takes the reader on a voyage of discovery of the Marwaris who migrated from Rajputana, Haryana, Malwa and its adjoining regions to other parts of India. They braved trials and tribulations in unchartered territories, supporting others of their community, never losing faith in their ability to succeed, and focused on their goal, they became the uncrowned kings, first of trade and business, and later of industry. They joined the freedom struggle with a true spirit of patriotism, philanthropy and active political involvement. Many courted imprisonment and even achieved martyrdom. Today, the roots of the Marwari community are deeply enmeshed in the social, cultural and economic fabric of India. Their innate psyche of giving back to society has seen them donate generously to education, empowerment of women and vocational training leading to employment. Shedding some traditions and retaining many, they have stepped into the modern age, achieving an enviable cultural mix. At the helm of most successful entrepreneurial enterprises, their focus on innovation and technological advancement has resulted in governments of several countries seeking their advice on economic growth. Of the many who have left an indelible mark on the history, socio-political and economic foundations of the country, this book is enriched with rich cameos of some of these 'greats' and the reader derives insights into numerous newly discovered and hitherto unrecorded facts. The younger generation of Marwaris continue to dream big and build on the foundations their forefathers planted. They continue to grow from strength to strength, marching towards new horizons. The plethora of welfare schemes and trusts responsible for development of the nation's needy continue to be monitored with precision. Meticulously researched over five years and richly illustrated with over 100 rare, coloured photographs, paintings, and 600 black and white photographs, illustrations and rare documents published for the first time, readers have much to feast their eyes on. This pictorial book also serves as an inspiration to any and everyone who dares to dream and reach for the skies.

business class new york london: Full Upright and Locked Position: The Insider's Guide to Air Travel Mark Gerchick, 2013-06-10 Sit back, relax, and enjoy the flight, our pilots still intone. But who are they kidding? Former FAA chief counsel and senior aviation policy official Mark Gerchick unravels the unseen forces and little-known facts that have reshaped our air travel experience since September 11, 2001. With wry humor and unique insight, Gerchick takes us past the jargon, technicalities, and all-is-well platitudes to expose the new normal of air travel: from the packed planes and myriad hassles of everyday flying to the alchemy of air fares, the airlines' endless nickel-and-dimeing, and the elusive hope of escape from steerage. We find out what pilots do in the cockpit, what's really worth worrying about when it comes to airline safety, and why we get sick on planes. Meanwhile, Gerchick ponders the jarring disconnect between our quaint expectations of service with a smile and the grim reality of cramped seats, no-free-lunch, and watch-yer-knees. With sympathy for both fliers and airlines, Gerchick shows how the new business-all-business airline industry has finally learned to make money, even in the face of crushing fuel costs, and get millions

of travelers where they're going every day safely and quickly. From his singular vantage point as former aviation regulator and policymaker, Gerchick gives us a straightforward insider's view of how hard it is for government to improve the traveler's lot by explaining the vagaries of consumer protection rules as well as the political realities and the economic forces at work. While Gerchick offers reasons to hope for a better future in air travel, he presents an unvarnished look at what we can expect—good and bad—when we take to the skies. Some of it will reassure you, some will make you cringe, but all will open your eyes to what it means to fly today.
