business class turkey: *The Mobilization of Political Islam in Turkey* Banu Eligür, 2010-04-12
The Mobilization of Political Islam in Turkey explains why political Islam, which has been part of Turkish politics since the 1970s but on the rise only since the 1990s, has now achieved governing power. Drawing on social movement theory, the book focuses on the dominant form of Islamist activism in Turkey by analyzing the increasing electoral strength of four successive Islamist political parties: the Welfare Party; its successor, the Virtue Party; and the successors of the Virtue Party: the Felicity Party and the Justice and Development Party. This book, which is based on extensive

primary and secondary sources as well as in-depth interviews, provides the most comprehensive analysis currently available of the Islamist political mobilization in Turkey.

business class turkey: A Neoclassical Realist Approach to Turkey under JDP Rule Göktuğ Sönmez, 2020-02-24 This book addresses the shift in Turkish foreign policy in the post-Cold War era from a neoclassical realist point of view. In its analysis of Turkey's pursuit of 'an activist grand strategy', it focuses on the interplay between international and domestic factors. It puts forth its argument through analysis of Turkey's bilateral relations with Iran, Israel and the European Union. It offers comprehensive examinations of international relations theory and neoclassical realism (NCR). The book not only makes sense of Turkish foreign policy under the JDP rule, but also provides a comprehensive analysis of NCR's explanatory power. It will primarily appeal to scholars on Turkey, international relations theory, realism, and Middle Eastern politics and students studying these areas, as well as think-tankers, journalists and researchers.

business class turkey: Political Economy of Development in Turkey Emre Özçelik, Yonca Özdemir, 2022-03-10 Adopting a political-economy perspective, this book is an original collection of research chapters that focus on Turkey's economic-development experience from the nineteenth century to the present. It provides a systematic and chronological examination of Turkey's major historical dynamics in the economic and socio-political spheres. The chapters are organized according to the consecutive phases of Turkey's political-economic development. Each chapter not only reflects on the country-specific aspects of those development phases, but also clarifies the dependence of domestic-policy orientations on the dynamics of the world economy. As such, the book provides a historically-conscious, political-economic account of Turkey's dependent-development experience. The book serves as a quality reference on the political economy of modern Turkey, bringing together fourteen prominent experts as contributing authors who have devoted their intellectual lives to the understanding and explanation of political-economic dynamics in both Turkey and the world. All contributors write on a historical period of the Turkish economy in which they are most specialized. This aspect of the book is a momentous advantage in the field of Turkey's political economy, enabling the highest degree of academic expertise to concentrate in each chapter.

business class turkey: The Fall of the Turkish Model Cihan Tugal, 2016-02-23 The brief rise and precipitous fall of "Islamic liberalism" Just a few short years ago, the "Turkish Model" was being hailed across the world. The New York Times gushed that prime minister Recep Tayyip Erdogan and his Justice and Development Party (AKP) had "effectively integrated Islam, democracy, and vibrant economics," making Turkey, according to the International Crisis Group, "the envy of the Arab world." And yet, a more recent CNN headline wondered if Erdogan had become a dictator." In this incisive analysis, Cihan Tugal argues that the problem with this model of Islamic liberalism is much broader and deeper than Erdogan's increasing authoritarianism. The problems are inherent in the very model of Islamic liberalism that formed the basis of the AKP's ascendancy and rule since 2002—an intended marriage of neoliberalism and democracy. And this model can also only be understood as a response to regional politics—especially as a response to the "Iranian Model"—a marriage of corporatism and Islamic revolution. The Turkish model was a failure in its home country, and the dynamics of the Arab world made it a tough commodity to export. Tugal's masterful explication of the demise of Islamic liberalism brings in Egypt and Tunisia, once seen as the most likely followers of the Turkish model, and provides a path-breaking examination of their regimes and Islamist movements, as well as paradigm-shifting accounts of Turkey and Iran.

business class turkey: Secularism and Muslim Democracy in Turkey M. Hakan Yavuz, 2009-02-19 The Islamist Justice and Development Party swept to power in Turkey in 2002. Since then it has shied away from a hard-line ideological stance in favour of a more conservative and democratic approach. This book asks whether it is possible for a political party with deeply religious ideology to liberalise and entertain democracy?

business class turkey: Etatism and Diplomacy in Turkey Dilek Barlas, 2023-11-20 This timely volume deals with Turkey's etatist policy and foreign relations in the early years after the fall

of the Ottoman empire. It elucidates the symbiotic relationship between Turkey's internal developments and its international strategies, filling a gap in modern Turkish history by systematically researching an era which is practically untouched. The first part of the book examines the theory and politics of etatism, while the second part, on Turkish diplomacy of the interwar period, is especially important for diplomatic historians.

business class turkey: Four Studies on the Economic Development of Turkey John F. Kolars, Dankwart A. Rustow, Frederic C. Shorter, Oktay Yenai, 2013-07-04 First Published in 1967. This volume brings together four studies that seek to update the known images of the Ottoman Turks and of a Republican Turkey. For an understanding of present-day Turkey, the traditional sources are central, but they no longer stand alone or even unchallenged. Today, scholars are bringing the perspectives and tools of economics, sociology, anthropology, politics, cultural geography, and other social disciplines to the study of Turkey. Their findings are broadening and deepening knowledge concerning Turkey's history and her present position.

business class turkey: Islamization of Turkey under the AKP Rule Birol Yesilada, Barry Rubin, 2013-09-13 This book examines the decade in office of the Justice and Development Party (AKP) and its efforts to transform the Turkish republic toward a more Islamist-oriented system. If it succeeds, Turkey's dramatic shift will be the most important change in the Middle East power balance since the 1979 Iranian revolution and will have equally devastating effects on Western interests. For more than 80 years Turkey has been ruled by the secular democratic structures created by Kemal Ataturk. Now, however, the rise of the Justice and Development Party (AKP) and its series of electoral victories are creating a new system. Whilst portraying itself as a centre-right reform party, the AKP has been accused of having an Islamist agenda. After almost a decade in power, there is serious evidence that this claim is true. At home, the AKP has been changing basic Turkish attitudes and institutions, from buying up a large portion of the country's media to revising its laws, and even taking the lead in the writing of a new constitution. Internationally, Turkey has moved away from the West and Israel toward Iran and radical Islamist groups. While its intentions—and ability to fulfil them—are still unclear, the AKP has been leading the most important transformation of Turkey since the formation of the republic after World War I. This book systematically examines the AKP's ideology, support base, actions in office, and goals. This book was published as a special issue of the Turkish Studies.

business class turkey: Democracy, Identity and Foreign Policy in Turkey F. Keyman, S. Gumüşçu, Sebnem Gumuscu, 2015-12-04 Through critical analysis of Turkey's transformation under the AKP, this book explores the relationship between domestic transformations and global/regional dynamics. It also discusses the relationship between the Turkish transformation and the Arab uprisings and the implications of the Turkish case for regime transitions in the Arab world.

business class turkey: Winning Turkey Philip H. Gordon, Omer Taspinar, 2009-11-01 Turkey has always been a crossroads: the point where East meets West, Europe meets Asia, and Christianity meets Islam. Turkey has also been a close and important American ally, but a series of converging political and strategic factors have now endangered its longstanding Western and democratic

orientation. In *Winning Turkey*, two leading analysts explain this worrisome situation and present a plan for improving it. The stakes are clear. Turkey is the most advanced democracy in the Islamic world, bordering a number of the world's hotspots, including Iraq, Iran, and the Caucasus. It occupies the corridor between Western markets and Caspian Sea energy reserves. A stable, Western-oriented Turkey moving toward EU membership would provide a growing market for exports, a source of needed labor, a positive influence on the Middle East, and an ally in the war on terror. The picture has darkened, however, as rising anti-Americanism, deflated hopes for EU accession, civil-military tensions, and terrorist threats have destabilized an already volatile Turkish political system. *Winning Turkey* designs a plan to ease tensions in this critical part of the world. In addition to proposing a grand bargain between Turkey and the Kurds, it advocates greater support for increased liberalism and democracy, a renewed commitment by both Europe and Turkey to promote EU membership, a historic compromise with Armenia, and greater Western engagement with Turkish Cypriots.

business class turkey: State of Exception in the Mediterranean Nikos Moudouros, 2020-09-22 This book examines the evolution of the state of exception in which the Turkish Cypriot community has developed and how its relationship with Turkey has been transformed. It aims at a comprehensive understanding of the circumstances which led to the emergence of a Turkish Cypriot state of exception, as well as the procedures which led to the strengthening of resistance against its normalization. For a more comprehensive decoding of the aforementioned, this book studies the presence of Turkey in the everyday life of Turkish Cypriots in the framework of colonial politics. It examines in detail the transformation of the Cypriot space as it resulted from the pursuit for normalization of the state of exception. At the same time, however, this research underlines the ways in which the Turkish Cypriot opposition hinders the normalization of the state of exception through an alternative political program against the partition of Cyprus. The book aims to contribute to the broader academic research on states of exception and non-recognized state structures, through analyzing the ruptures caused in the hegemonic project. The research concerns the 1964-2004 period and is mainly, but not entirely, based on a large volume of primary sources.

business class turkey: The political economy of Turkey's integration into Europe Elif Uzgören, 2025-03-11 This book examines Turkey's integration with Europe within structural dynamics of globalisation from a critical political economy perspective. Critical approaches have been sidelined within European Studies. Turkish enlargement is not an exemption. The analyses are based on original data generated by 109 interviews conducted in 2010, 2017 and 2023 with five categories of actors: representatives of capital and labour, political parties, state officials, and struggles around ecology, patriarchy and migration. It argues that the pro-membership was hegemonic in the 2000s which was contested by two rival class strategies, Ha-vet and neo-mercantilism. In the 2010s, pro-membership is no longer hegemonic within rising critical tone of social forces supporting rival class strategies. Unevenness of Turkey's trajectory of integration to Europe is likely to be consolidated through market integration and management of migration through transactional approach.

business class turkey: Collective and State Violence in Turkey Stephan Astourian, Raymond Kévorkian, 2020-11-01 Turkey has gone through significant transformations over the last century—from the Ottoman Empire and Young Turk era to the Republic of today—but throughout it has demonstrated troubling continuities in its encouragement and deployment of mass violence. In particular, the construction of a Muslim-Turkish identity has been achieved in part by designating “internal enemies” at whom public hatred can be directed. This volume provides a wide range of case studies and historiographical reflections on the alarming recurrence of such violence in Turkish history, as atrocities against varied ethnic-religious groups from the nineteenth century to today have propelled the nation’s very sense of itself.
