business degree wgu: Learning Online Barbara Means, Marianne Bakia, Robert Murphy, 2014-04-03 At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, Learning Online provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. Learning Online synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas, and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, Learning Online draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work concludes with a call for an online learning implementation research agenda, combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices.

business degree wgu: *Building Better Universities* Jos Boys, 2014-11-13 Building Better Universities provides a wide-ranging summary and critical review of the increasing number of groundbreaking initiatives undertaken by universities and colleges around the world. It suggests that we have reached a key moment for the higher education sector in which the services, location, scale, ownership, and distinctiveness of education are being altered dramatically, whether universities and colleges want it or not. These shifts are affecting traditional assumptions about both the future 'shape' of higher education institutions, and the roles of—and relationships between—learners, teachers, researchers, managers, businesses, communities and other stakeholders. Building Better Universities aims to bridge the gap between educational ideas about what the university is, or should be 'for', and its day-to-day practices and organisation. It roams across strategic, operational, and institutional issues; space planning and building design; and technological change, in order to bring together issues that are often dealt with separately. By analysing the many challenges faced by higher education in the contemporary period, and exploring the various ways universities and colleges are responding, this powerful book aims to support a 'step-change' in debates over the future of higher education, and to enable senior managers and faculty to develop more strategic and creative ways of enabling effective twenty-first-century learning in their own institutions.

business degree wgu: Piece to Text on the Monument and One: Letters with the International Body Managers Kiyoung Kim, 2018-08-17 The aims of this book is clear and straightforward. It was motivated to convert an inhumane or insipid experience with the various sources of global ranking into the kind of humanly and cultural experience within our daily lifestyle. Their outlook from presentation is masked with the number purely and perhaps through a myriad of complicated data or ranking information. The concept or self-identification within the experience or exposure would be less substantial or hard to get palpable. My attempt to improve this aspect of contemporary practice certainly will fall short, but you can sense in some paragraphs or titles. I wrote this small piece of book in the end to take care of human integrity and stories for advancing the inherence and liveliness of interested actors or consumers despite all the wind-heads from the turf of existing ranking sources.
