business class on emirates airlines: Designing Future-Oriented Airline Businesses Nawal K. Taneja, 2016-04-22 Designing Future-Oriented Airline Businesses is the eighth Ashgate book by Nawal K. Taneja to address the ongoing challenges and opportunities facing all generations of airlines. Firstly, it challenges and encourages airline managements to take a deeper dive into new ways of doing business. Secondly, it provides a framework for identifying and developing strategies and capabilities, as well as executing them efficiently and effectively, to change the focus from cost reduction to revenue enhancement and from competitive advantage to comparative advantage. Based on the author's own extensive experience and ongoing work in the global airline industry, as well as through a synthesis of leading business practices both inside and outside of the industry, Designing Future-Oriented Airline Businesses sets out to demystify numerous concepts being discussed within the airline industry and to facilitate managements to identify and articulate the boundaries of their business models. It provides material from which managements can set about answering the key questions, especially with respect to strategies, capabilities and execution, and pursue an effective redesign of their business. As with the author's previous books, the primary audience is senior-level practitioners of differing generations of airlines worldwide as well as related businesses. The material presented continues to be at a pragmatic level, not an academic exercise, to lead managements to ask themselves and their teams some critical thought-provoking questions.

business class on emirates airlines: The End of Airports Christopher Schaberg, 2015-11-19 If air travel was once the bold future, it has now settled into a mundane, on-going present. We no longer expect romantic experiences or sublime views, but just hope that we get from here to there with minimal hassle. In The End of Airports, Christopher Schaberg suggests that even as the epoch of flight approaches a threshold of banality, there are still mysteries to be unraveled around our aircraft and airfields. Drawing from his own experiences working at an airport, as well as interpreting these spaces from the perspective of a cultural critic, Schaberg explores the secret lives of jet bridges, seating areas, concourses, and tarmac vehicles, showing how the ordinary objects of flight call for wonder and inquiry. The End of Airports is not an obituary-it's more like an ode to terminals in the digital age.

business class on emirates airlines: Dubai Pranay Gupte, 2011 In just two decades, Dubai has reinvented itself from a small, poor and quiet fishing village to a dazzling city with a vibrant urban life. How did this happen? Home to more than 200 nationalities particularly those from the Indian subcontinent the emirate's choice to welcome expatriates has paid off. Cultivating an open and welcoming culture, Dubai manages to attract people from all over the world, heartily embracing any entrepreneurial contribution they wish to make. The emirate is now also known for its cosmopolitan melting-pot culture, and its enabling environment to conduct business, and this, along with the tax-free system and hassle-free infrastructure, makes it a much sought- after site for multinational enterprises who want a base in Asia. Unlike the Gulf emirates that can count on petroleum wealth, Dubai has wound its way to prosperity by planning carefully and executing those plans methodically. Its airline and luxury construction have made it a popular destination for luxury tourism. Projects like the Burj al-Arab, the Palm Jumeriah and the Burj Khalifa, along with events like the world's richest horserace the Dubai World Cup and the Dubai Shopping Festival, have sustained tourist interest and focused the world's attention on the emirate.

business class on emirates airlines: *Memoirs of a Deployed Airman* Patrick B. Monahan, 2009 Almost as if it were a dream, day number 360 came and I was transported into another world. The flights were long, but within just a couple of days, I found myself back at my original starting point-Salt Lake City, Utah. Before arriving in Salt Lake City though, I was greeted by my parents and my in-laws at Baltimore-Washington International (BWI) airport. As I scrambled through the baggage claim area and customs, I made my way towards my release from the regimented deployment world. Both sets of parents were poised and ready to greet me and my friends returning from overseas. Upon catching a glimpse of me, they popped out of their seats and began waving small American flags in my general direction. It was very nice to see them and it was a nice patriotic sight. I arrived at the airport at approximately midnight and I was hungry, so we all went out to eat at an all night diner in Arlington, Virginia. It was about 0300 in the morning when we finished up our meal and headed back to my in-laws house to sleep. I caught an 1800 flight the next day which brought me to Salt Lake City at approximately 2300 that night. The second leg of my flight from

Phoenix, Arizona was very comfortable and relaxing. Wearing my DCUs, one of the flight attendant's decided to move me to First Class. Not only did this provide me with more comfort, but it also provided me an opportunity to sit next to her husband who had joined her on the flight. I had a really nice conversation with the flight attendant's husband throughout the flight. Then, as we landed in Salt Lake City, the flight attendant announced to all of the people on the flight that I had just returned home from the war in Afghanistan. Everyone began to clap and I received the honor of being the first person off of the airplane. I then began my mad dash towards my family. People noticed that I was in uniform, holding two little bears (one for each of my girls), and I was practically running, so everyone pretty much got out of my way. Within minutes, I saw Melanie holding a Welcome Home poster and my girls waving small American flags. It was a very impressive and precious sight. I scooped up both of my daughters in my hands and I embraced the whole family. The nice thing was that Suzanna didn't cry...everyone seemed to at least have some idea who I was this time. In fact, Annabelle wouldn't hardly let me go out of her sight for the next few days. I learned several days later that Annabelle had a lot of trouble sleeping while I was gone...which was attributed to me not being there and her not knowing when I would come home. This latter fact is what changed my mindset from wanting to go back to the combat zone any time soon. While I was gone, I made the most of my deployment and I even learned to enjoy many aspects of the adventure. However, when you see the effects of being gone on the homefront, nothing else seems to matter but family. Would I go again? Absolutely. But, I would certainly wait for my number to come up or for someone to come asking for my assistance a little more passionately. When I arrived at my actual home in the Ogden, Utah area, I quickly noticed several decorations on the property. I hadn't expected such extravagance, but I was certainly impressed by what I saw. As I walked around the house and the yard in my civilians clothes the next day, surrounded by my family, I finally felt like I was home.

business class on emirates airlines: Airline Industry Nawal K. Taneja, 2016-06-23 Many business sectors have been, and are being, forced to compete with new competitors-disrupters of some sort-who have found new ways to create and deliver new value for customers often through the use of technology that is coupled with a new underlying production or business model, and/or a broad array of partners, including, in some cases, customers themselves. Think about the disruption created by Apple by the introduction of the iPod and iTunes, and by Netflix within the entertainment sectors using partners within the ecosystem; think of Uber that didn't build an app around the taxi business but rather built a mobility business around the app to improve customer experience. Airline Industry considers whether the airline industry is poised for disruptive innovations from inside or outside of the industry. Although airlines have a long history of continuous improvements and innovation, few of their innovations can be classified as disruptive innovations. The few disruptive innovations that did emerge were facilitated, for example by new technology (jet aircraft) and government policy (deregulation). Now there are new forces in play-customers who expect to receive products that are more personalized and experience-based throughout the entire journey, new customer interfaces (via social media), advanced information systems and analytics, financially powerful airlines based in emerging nations, and the rise of unencumbered entrepreneurs who think differently as well as platform-focused integrators.

business class on emirates airlines: Crucifixion? Yes! Darvin Babiuk, 2023-06-11 People's lives can change by the smallest of circumstances, turning left at an intersection instead of right, sitting beside an unknown person in a crowded lecture hall, filling in at work for a colleague while they go on vacation. My life changed when in my last semester of Graduate study, I saw an ad posted by the Japanese government to come work in the Land of the Rising Sun. The idea was that I'd have a bit of an adventure, make some money, and take the time to consider whether I wanted to get a Doctorate degree or not. Three decades years later, I was still doing it, finding a fertile niche working in post-secondary institutions and as a trainer for Oil and Gas operations in the Middle East, Central Asia and North Africa. As the Japanese proverb goes, I'd already eaten the poison, so I might

as well lick the plate. I've lived under absolute monarchies, constitutional monarchies, a number of Presidents-for-Life, civil wars, foreign military occupations and outright terrorist dictatorships. Along the way, I've played Duck, Duck, Goose with Japanese elementary school students; become a bit of a media celebrity for no earthly reason other than the accident of my birthplace; witnessed the aftermath of a crucifixion in Yemen; seriously thought I was about to be kidnapped for ransom; had three colleagues shot dead a football field away from where I was standing; was within spitting distance of where modern drone warfare was born, and commuted to work in an armoured convoy of Toyota Land Cruisers, wearing full body armour and accompanied by up to a half dozen armed private security members. So it began playing Duck, Duck, Goose and progressed to trying to avoid the terrorism, revolutions and uprisings.
