business class royal air maroc: Airline Choices for the Future Kostas Iatrou, Mauro Oretti, 2016-03-16 *Airline Choices for the Future: From Alliances to Mergers* offers an up-to-date assessment of the industry as it stands today, delivering a comprehensive insight into how the world of airline alliances is changing, and how the merger phenomenon is likely to fit into the new scenario. The purpose of this book is twofold. Firstly, it outlines the evolution and the reasons behind alliances between international air carriers, the alliances' track records and the way they have affected airlines and the air transport industry. Secondly, drawing on past and more recent developments in the industry, it examines the experiences airlines involved in cross-border mergers have gone through and the advantages and difficulties they have come across. Alliances and mergers are presented from both the airline and the consumer perspective. The book provides a balanced account of where mergers and alliances have taken the industry to date, bridging the gap between merger theory and implemented practices and strategies. It also identifies the challenges alliances and cross-border mergers have faced and highlights the key forces affecting airline development. Theoretical evidence is supplemented by data collected via surveys and interviews with airline executives, aviation experts, consultants and regulatory bodies.

Despite regional competition from Senegal and Ghana in terms of investment attractiveness, Côte d'Ivoire is likely to regain its place as an economic centre if it can successfully revise its hard and soft infrastructure. Although progress has been made, the possibility of political unrest remains, prompting concerns over the presidential elections set for October 2015. The preservation of peace and economic recovery will depend on the outcome of the elections and the ability of the new government to continue the reconciliation agenda.
