business class to manila: The Mastermind Evan Ratliff, 2019-01-29 The incredible true story of the decade-long quest to bring down Paul Le Roux—the creator of a frighteningly powerful Internet-enabled cartel who merged the ruthlessness of a drug lord with the technological savvy of a Silicon Valley entrepreneur. “A tour de force of shoe-leather reporting—undertaken, amid threats and menacing, at considerable personal risk.”—Los Angeles Times NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The New York Times Book Review • NPR • Evening Standard • Kirkus Reviews It all started as an online prescription drug network, supplying hundreds of millions of dollars' worth of painkillers to American customers. It would not stop there. Before long, the business had turned into a sprawling multinational conglomerate engaged in almost every conceivable aspect of criminal mayhem. Yachts carrying \$100 million in cocaine. Safe houses in Hong Kong filled with gold bars. Shipments of methamphetamine from North Korea. Weapons deals with Iran. Mercenary armies in Somalia. Teams of hit men in the Philippines. Encryption programs so advanced that the government could not break them. The man behind it all, pulling the strings from a laptop in Manila, was Paul Calder Le Roux—a reclusive programmer turned criminal genius who could only exist in the networked world of the twenty-first century, and the kind of self-made crime boss that American law enforcement had never imagined. For half a decade, DEA agents played a global game of cat-and-mouse with Le Roux as he left terror and chaos in his wake. Each time they came close, he would slip away. It would take relentless investigative work, and a shocking betrayal from within his organization, to catch him. And when he was finally caught, the story turned again, as Le Roux struck a deal to bring down his own organization and the people he had once employed. Award-winning investigative journalist Evan Ratliff spent four years piecing together this intricate puzzle, chasing Le Roux's empire and his shadowy henchmen around the world, conducting hundreds of interviews and uncovering thousands of documents. The result is a riveting, unprecedented account of a crime boss built by and for the digital age. Praise for The Mastermind “The Mastermind is true crime at its most stark and vivid depiction. Evan Ratliff's work is well done from beginning to end, paralleling his investigative work with the work of the many federal agents developing the case against LeRoux.”—San Francisco Book Review (five stars) “A wholly engrossing story that joins the worlds of El Chapo and Edward Snowden; both disturbing and memorable.”—Kirkus Reviews (starred review)

business class to manila: Life of a Double Agent Kenneth J. Kerr, 2013-03-28 Jim Hunt grew up in a small town near Rehoboth Beach, Delaware. He was always tall for his age. He played basketball and baseball in high school, and was a good student. He entered the University of Delaware and studied Chemical Engineering. During his junior year in college, the CIA recruited him to monitor the radical groups on campus that were a growing concern in the U.S. government during the 1960s. After graduation from college, Jim entered the U.S. Army as a 2nd Lieutenant and attended officers training in the Chemical Corps. He was assigned to Ft. Lewis, Washington and was immediately transferred to the Corps of Engineers, which was staffing several units for deployment

to Vietnam. While at Ft. Lewis, Jim was recruited by a Chinese intelligence agency, with the full knowledge and support of the CIA. Thus began his life as a double agent. In Vietnam, Jim Hunt uncovered an operation by the North Vietnamese to assassinate Bob Hope, and participated in the take down of the assassin. After the Army, Jim joined The Dow Chemical Company, but maintained his relationships with the Chinese intelligence agency and the CIA. He helped uncover a network of Chinese spies, working out of the Chinese Embassy in Washington D.C. that were receiving information from dozens of U.S. contacts in industry and academia. His career at Dow Chemical eventually took him to Hong Kong where he and his family lived for almost a decade. He became involved in an operation where the Chinese were buying top-secret computer software from a senior official at the U.S. National Security Agency (NSA). While in Hong Kong, he recruited his Chinese handler with the Ministry of State Security (MSS) to work for the CIA. After a successful career with Dow Chemical, he retired and joined a smaller company in San Diego named Renewable Power Company. They were involved in the alternative energy business and were actively developing power plant projects in several Asian countries. While working on a project in the Philippines, two of Renewable Powers employees were kidnapped on the island of Mindanao by the MILF, a Muslim terrorist group. Jim Hunt had to use all his skill and resources to gain the freedom of his fellow employees. His final operation before retiring was to recruit a senior official of Chinas MSS to work for the CIA. After retirement from the CIA, the Chinese MSS, and Renewable Power Company, Jim Hunt and his wife moved to Hilton Head Island, SC for a restful retirement. Jim missed the action and decided to join the Peace Corps. He was assigned to Russia, and after a ten-week training program in Moscow, moved to Krasnoyarsk, Russia for a two-year assignment teaching business courses at a university in the middle of Siberia. When the CIA learned of his assignment, they brought him back for one more mission, to penetrate the Russian secret city, K-26, located several miles outside Krasnoyarsk, where the Russians operated nuclear reactors to produce weapons grade plutonium.

business class to manila: Southeast Asian Responses to Globalization Francis Loh Kok Wah, Joakim Öjendal, 2005 It is now apparent, especially in the aftermath of the regional financial crisis of 1997, that globalization has been impacting upon the Southeast Asian economies and societies in new and harrowing ways, a theme of many recent studies. Inadvertently, these studies of globalization have also highlighted that the 1980s and 1990s debate on democratization in the region - which focused on the emergence of the middle classes, the roles of new social movements, NGOs and the changing relations between state and civil society - might have been overly one-dimensional. This volume revisits the theme of democratization via the lenses of globalization, understood economically, politically and culturally. Although globalization increasingly frames the processes of democracy and development, nonetheless, the governments and peoples of Southeast Asia have been able to determine the pace and character - even the direction of these processes - to a considerable extent. This collection of essays (by some distinguished senior scholars and other equally perceptive younger ones) focuses on this globalization-democratization nexus and shows, empirically and analytically, how governance is being restructured and democracy sometimes deepened in this new global era. A historical review introduces the volume while an analytical assessment of the ten case-studies concludes it.

A lot of confusion, a lot of humor, a lot of broken dreams and broken promises, an occasional triumph . . . 1978—A chance meeting on a remote military airbase between two Green Berets involved in the same operation leads to a partnership that will last over forty years. Four years after that meeting, Nick Brokhausen and Jeff Miller leave the service within a few weeks of each other and begin an odyssey that takes them to dozens of countries on five continents. Along with a small coterie of fellow former Special Operations and intelligence community veterans like Penguini, Max, Reek, The Spider Woman, and a score of others—some heroes and some villains—they undertake a variety of missions for the government, other governments, large multinational corporations mostly in the aerospace or resource development industries, and occasionally just for suffering individuals who cannot find help anywhere else. In the process they lay the groundwork for an entire new industry of private military contractors. Two men sadly just a bit ahead of their time. Every episode in this book actually happened. business class to manila: Passionate Revolutions Talitha Espiritu, 2017-04-15 In the last three decades, the dictatorship of Ferdinand Marcos has commanded the close scrutiny of scholars. These studies have focused on the political repression, human rights abuses, debt-driven growth model, and crony capitalism that defined Marcos' so-called Democratic Revolution in the Philippines. But the relationship between the media and the regime's public culture remains underexplored. In *Passionate Revolutions*, Talitha Espiritu evaluates the role of political emotions in the rise and fall of the Marcos government. Focusing on the sentimental narratives and melodramatic cultural politics of the press and the cinema from 1965 to 1986, she examines how aesthetics and messaging based on heightened feeling helped secure the dictator's control while also galvanizing the popular struggles that culminated in "people power" and government overthrow in 1986. In analyzing news articles, feature films, cultural policy documents, and propaganda films as national allegories imbued with revolutionary power, Espiritu expands the critical discussion of dictatorships in general

and Marcos's in particular by placing Filipino popular media and the regime's public culture in dialogue. Espiritu's interdisciplinary approach in this illuminating case study of how melodrama and sentimentality shape political action breaks new ground in media studies, affect studies, and Southeast Asian studies.

business class to manila: *Why Civil Resistance Works* Erica Chenoweth, Maria J. Stephan, 2011 For more than a century, from 1900 to 2006, campaigns of nonviolent resistance were more than twice as effective as their violent counterparts in achieving their stated goals. By attracting impressive support from citizens, whose activism takes the form of protests, boycotts, civil disobedience, and other forms of nonviolent noncooperation, these efforts help separate regimes from their main sources of power and produce remarkable results, even in Iran, Burma, the Philippines, and the Palestinian Territories. Combining statistical analysis with case studies of specific countries and territories, Erica Chenoweth and Maria J. Stephan detail the factors enabling such campaigns to succeed and, sometimes, causing them to fail. They find that nonviolent resistance presents fewer obstacles to moral and physical involvement and commitment, and that higher levels of participation contribute to enhanced resilience, greater opportunities for tactical innovation and civic disruption (and therefore less incentive for a regime to maintain its status quo), and shifts in loyalty among opponents' erstwhile supporters, including members of the military establishment. Chenoweth and Stephan conclude that successful nonviolent resistance ushers in more durable and internally peaceful democracies, which are less likely to regress into civil war. Presenting a rich, evidentiary argument, they originally and systematically compare violent and nonviolent outcomes in different historical periods and geographical contexts, debunking the myth that violence occurs because of structural and environmental factors and that it is necessary to achieve certain political goals. Instead, the authors discover, violent insurgency is rarely justifiable on strategic grounds.
