business quote for women: *Women and Global Entrepreneurship* Maura McAdam, James A. Cunningham, 2021-04-05 Entrepreneurship in context has been described as the third wave in entrepreneurship research. Accordingly, specific socio-economic, political, market, and institutional contexts are key to fostering, enabling, and enacting entrepreneurial activity and behaviours. These contexts shape everyday entrepreneurship experiences. This book is based on the premise that how gender is articulated within the entrepreneurial debate has to acknowledge context. However, context is not a construct that only applies to those economies and situations that differ from the presumed norm of Western developed nations. Adopting a more critical appraisal of how context is positioned within current theorizing around gender and entrepreneurial behaviours offers potential to progress debate whilst acknowledging that competing and contrasting contextual influences require clearer recognition. This book, therefore, has the potential to unearth credible and robust approaches to further examining contextualisation and women entrepreneurship that advances new insights. By exploring and examining how contextual influences shape women's entrepreneurship, this book challenges the assumption that women entrepreneurship is the same throughout the world. It will be of value to researchers, academics, and students with an interest in entrepreneurship, political economy, economics, and public policy.

business quote for women: **The Business of Women's Empowerment** Sofie Tornhill, 2019-08-29 With catchphrases like "smart economics" and "the business case for gender equality," global corporations are increasingly involved in gender and development politics in the Global South. This book focuses on an emblematic example of this tendency to interrogate the proposed win-win relationship between corporate profit opportunities and the economic advancement of women in marginalized economic positions. The Coca-Cola Company's 5by20 program has won broad recognition for its global reach and ambitious goal: to economically empower five million female micro-entrepreneurs across its supply chain before the end of 2020. Based on situated engagements with program implementers and participants in Mexico and South Africa, the study moves beyond the unequivocally positive effects conveyed by the program's rhetoric. It examines the appropriation of social values to strengthen the brand; the use of self-help psychology to enhance entrepreneurial conduct and exempt weak economic results; and the recasting of women's precarious labor in terms of entrepreneurship - which conceals structural causes of poverty and impediments of sustainable business development. Providing unique insights into the premises and effects of corporate solutions to gender inequality in the Global South, the book contributes to debates on the relations between neoliberal capitalist expansion and feminist emancipatory endeavors.

business quote for women: *Women and Entrepreneurship in India* Harpreet Kaur, 2021-09-23 The Indian Constitution is the largest written constitution that guarantees equality to women and empowers the State to take affirmative actions in favour of women. India has adopted International conventions for protection of rights of women and granting them equality and ratified the Convention on Elimination of All Forms of Discrimination Against Women (CEDAW) in the year 1993. The National Policy for Women Empowerment was presented in 2001, the goal of that policy to bring about the advancement, development and empowerment of women and enable women to become financially independent. Currently, India is the only country where the economic gender gap is

larger than the political gender gap. Women are required to understand their own potential and overcome social barriers. With constant support of the government, change in stereotype mindset and skill development in women, India will continue witnessing gradual increase in women entrepreneurship in future. The aim of this book is to show the latest state of knowledge on the topic of women entrepreneurship, the role of women in business and women empowerment in India. Many aspects relating to role of women in business, sustainable business development and aspects going beyond economic empowerment of women are discussed in addition to presenting legal and regulatory frameworks. This book will be of interest to researchers, academics, policymakers, and students in the fields of entrepreneurship, empowerment, gender studies, and law.

The authors make use of both survey data and qualitative analysis to understand why and how trade can create more jobs for women, and how the jobs created are contributing to women's empowerment. They propose strategies and policies for ensuring that women can benefit from trade. After providing the context for the research and reviewing the literature on trade and gender in the introductory chapter, the second chapter analyzes survey data collected for this project. This is followed by a qualitative analysis of the six country cases in the next two chapters: Cambodia and Vietnam (Chapter 3), followed by Ghana, Madagascar, Nigeria and Senegal (Chapter 4). The final chapter concludes with a summary of our findings and policy recommendations.

business quote for women: De Gruyter Handbook of Women Entrepreneurs in Emerging Economies Helle Neergaard, Maribel Guerrero, Breda Kenny, 2024-12-02 Whilst women-owned businesses have a significant positive impact on poverty reduction and social exclusion, we know far too little about women's entrepreneurship in an emerging economy context. This handbook aims to fill that void by giving voice to women entrepreneurs who are far too often overlooked or even invisible. The chapters offer varied perspectives on the challenges that women entrepreneurs in emerging markets experience, foremost among these the lack of resources, education, and access to finance, as well as gender-related inequalities, and the impact of social expectations. The handbook portrays how, despite these challenges, women use creative and work-around strategies to access resources, build networks and grow their businesses. De Gruyter Handbook of Women Entrepreneurs in Emerging Economies brings together contributions from leading experts in the field and is a must-read for academic scholars and postgraduate students interested in gender and entrepreneurship diversity.

business quote for women: *Women Entrepreneurs and the Myth of 'Underperformance'* Shumaila Yousafzai, Alain Fayolle, Adam Lindgreen, Colette Henry, Saadat Saeed, Shandana Sheikh, 2018-02-23 'A must read for all entrepreneurship scholars because it helps us to understand and appreciate the real and many roles of women entrepreneurs, their relevance and importance to societies across the World, as well as the challenges and issues women entrepreneurs can face. An exciting and interesting read which presents us with critical questions for the future - thank you.' - Sarah Jack, Lancaster University Management School, UK Taking a fresh look at how performance is defined by examining the institutional power structures and policies, eminent scholars herein explore ways to overcome constrained performance and encourage women's entrepreneurial activities through a variety of methodological approaches and geographical contexts. Significantly, this book adds a critical perspective to defining 'success' and 'performance', shattering misconceptions of underperformance in women-owned enterprises. The contributing authors raise questions on the limiting concept of the 'entrepreneur' and have valuable insights into policies to facilitate female entrepreneurs. Instead of taking a one-sided and narrow approach with regards to understanding the entrepreneurship performance phenomenon, this book argues that future researchers should take a fresh look at business performance, considering structural constraints, definitions of success and other socio-political factors. Scholars in the fields of entrepreneurship, gender studies, and institutional theory, as well as those who have a general interest in critical research, will benefit from this progressive step in entrepreneurship research. business quote for women: *The Perennials* Mauro F. Guillén, 2023-08-22 Get the best from accelerating social change with the new book from the bestselling author of 2030 and "acclaimed thought leader" (Kirkus), Mauro Guillén. Adam Grant praises how the book invites us to rethink our careers, our families, and our future plans." Find out why business leaders and bestselling authors around the world are calling the book sharply relevant and necessary (William P. Lauder), insightful and deeply researched (Richard Florida), and A must read (Mohammed A. El-Erian). In today's

world, the acceleration of megatrends – increasing longevity and the explosion of technology among many others – are transforming life as we now know it. In *The Perennials*, bestselling author of 2030 Mauro Guillén unpacks a sweeping societal shift triggered by demographic and technological transformation. Guillén argues that outmoded terms like Boomers, Gen X, Millennials, and Gen Z have long been used to pigeonhole us into rigid categories and life stages, artificially preventing people from reaching their full potential. A new postgenerational workforce known as “perennials” – individuals who are not pitted against each other either by their age or experience – makes it possible to liberate scores of people from the constraints of the sequential model of life and level the playing field so that everyone has a chance at living a rewarding life. Guillén unveils how this generational revolution will impact young people just entering the workforce as well as those who are living and working longer. This multigenerational revolution is already happening and Mauro Guillén identifies the specific cultural, organizational and policy changes that need to be made in order to switch to a new template and usher in a new era of innovation powered by the perennials.

business quote for women: Understanding Women's Entrepreneurship in a Gendered Context Shumaila Yousafzai, Alain Fayolle, Saadat Saeed, Colette Henry, Adam Lindgreen, 2021-05-14 Women entrepreneurs are indeed a formidable force of economic growth and social change, though we still often question the how and why. For the readers who seek to understand the spectrum of gender influences in the context of entrepreneurship, *Understanding Women's Entrepreneurship in a Gendered Context: Influences and Restraints* widens the contextual focus of women's entrepreneurship and entrepreneurship research by providing powerful insights into the influences and restraints within a diverse set of gendered contexts including social, political, institutional, religious, patriarchal, cultural, family and economic, in which female entrepreneurs around the world operate their businesses. From recognition of a seventh-century businesswoman in Mecca to the construction of a gendered scientific Business Model Canvas, this collection of studies will inspire readers to think differently about theory, patriarchy, trade systems, adoption or transformation and strategies to create inclusive entrepreneurial ecosystems. In doing so, the contributing authors demonstrate not only the importance of studying the contexts in which women's entrepreneurial activities are shaped, but also how female entrepreneurs, through their endeavours, modify these contexts. This book will be of great value to scholars, students and researchers interested in women's entrepreneurship, entrepreneurial ecosystems, gender hierarchy and the transition to gender equality. It was originally published as a special issue of *Entrepreneurship & Regional Development*.
