concierge services business: *The Oil & Gas Year Brazil 2019* The Energy Year, 2019-09-09 Oil and gas production is expected to increase over the coming decade, with the ANP projecting an output of 5.5 million bopd by 2027-2028. Furthermore, 44 offshore production systems are expected to come on line by 2030. Brazil has started to attract the attention of oil majors across the globe and will continue to be a regional investment hub for years to come. As such, the report covers the laws and regulations of the new administration that will shape the local investment environment. This third edition also delves into other attractive business opportunities in Brazil's conventional offshore and onshore basins. Less than 30,000 wells have been drilled in the country's oil and gas history, compared to almost double that in Argentina and more than 100 times that in the USA. The ANP recognises the need to incentivise E&P in areas the prolific Pre-Salt Polygon. Despite the progress being made in the development of Brazil's oil and gas industry, challenges loom overhead. Environmental issues will come to the fore as some segments of society contest the new administration's move to a more laissez-faire market approach, particularly in areas near the Amazon rainforest. The government is under pressure to tackle these issues and push forward the industry's development. Extensive in-depth analysis is supported by comprehensive maps, illustrations and graphs to create a market guide essential for players seeking to either expand their operations or enter the Brazilian oil and gas market.
