**citi card business card:** Plastic Capitalism Sean H. Vanatta, 2024-05-21 How bankers created the modern consumer credit economy and destroyed financial stability in the process American households are awash in expensive credit card debt. But where did all this debt come from? In this history of the rise of postwar American finance, Sean H. Vanatta shows how bankers created our credit card economy and, with it, the indebted nation we know today. America's consumer debt machine was not inevitable. In the years after World War II, state and federal regulations ensured that many Americans enjoyed safe banks and inexpensive credit. Bankers, though, grew restless amid restrictive rules that made profits scarce. They experimented with new services and new technologies. They settled on credit cards, and in the 1960s mailed out reams of high-interest plastic to build a debt industry from scratch. In the 1960s and '70s consumers fought back, using federal and state policy to make credit cards safer and more affordable. But bankers found ways to work around local rules. Beginning in 1980, Citibank and its peers relocated their card plans to South Dakota and Delaware, states with the weakest consumer regulations, creating on-shore financial havens and drawing consumers into an exploitative credit economy over which they had little control. We live in the world these bankers made.

**citi card business card: Store Cards Market Investigation** Great Britain: Competition Commission, 2006-04-21 In light of the concerns that have been raised about the lack of transparency of credit card charges in the UK, particularly in relation to interest rates charged for store card credit, this matter was referred by the Office of Fair Trading to the Competition Commission in March 2004. The Commission's inquiry focuses on two key aspects: store card credit services to retailers and related insurance services; and consumer credit through store cards and related insurance services. These cards offer a method of payment and credit option which are retailer-specific, and are mostly operated by department stores and clothing retailers. The investigation is based on data relating to the period from 1999 to 2003 (supplemented by relevant information for 2004 and projections for 2005 and 2006) and focuses on the functioning of the market as a whole rather than on the conduct of individual companies. Issues examined include: relevant economic markets and the wider regulatory framework; proposals to reform the legislation governing the credit market and statutory issues; factors that prevent, restrict or distort competition; detrimental effects on customers; and options for remedial action. The report finds that the interest rates charged on store cards are too high (generally annual percentage rates (APRs) of

between 10 to 20 per cent above required levels), resulting in an estimated cost for consumers of at least £55 million a year and possibly significantly more. A number of remedies are identified that store card credit providers should make, including warning cardholders on monthly statements that cheaper credit may be available elsewhere; providing more and clearer information on all monthly statements; offering an option to pay by direct debit; and offering payment protection insurance separately from other elements of store card insurance.

Who would not be interested in getting an interest-free loan for 12 months for any type of purchase just for taking a few minutes to complete a credit card balance transfer offer? Obviously, just about every consumer is interested in saving money and getting freebies! Hence, the universal appeal of this book cannot be overstated. Today, the average American household has 12.7 credit cards. Banks spend billions enticing consumers with rebates, freebies, low-introductory rate offers, and airline miles. Learn how to take full advantage of these offers, without paying for them through brutally high interest rates, fees, and penalties! Arnold offers specific advice targeted to young consumers who are being aggressively targeted by credit card marketers; retirees facing credit discrimination; Americans recovering from bankruptcy or other debt problems; and even consumers with great credit. You'll learn the techniques he has personally used to escape credit card debt, creatively finance his wedding, car, and home purchases, and earn thousands in credit card perks every year.
