Cob business embodies the philosophy of utilizing local resources and skills to create products or services that serve the community while minimizing environmental impact. This approach often aligns with sustainable development goals, focusing on reducing waste, promoting social equity, and enhancing community resilience.

Cob businesses typically engage in various sectors, including agriculture, crafts, food production, and renewable energy. They emphasize local labor, fair wages, and ethical practices, fostering a sense of community ownership and responsibility. As consumers become more conscious of their purchasing

This book is addressed predominantly to the academic community – academics, scholars and upper-level students – in international marketing, international business and consumer behaviour.

cob business meaning: *Black Market Business* Christina Elizabeth Firpo, 2020-12-15 Black Market Business is a grassroots social history of the clandestine market for sex in colonial Tonkin. Lively and well told, it explores the ways in which sex workers, managers, and clients evaded the colonial regulation system in the turbulent economy of the interwar years. Christina Elizabeth Firpo argues that the confluence of economic, demographic, and cultural changes sweeping late colonial Tonkin created spaces of tension in which the interwar black market sex industry thrived. The clandestine sex industry flourished in sites of legal inconsistency, cultural changes, economic disparity, rural-urban division, and demographic shifts. As a nexus of the many tensions besetting late colonial Tonkin, the black market sex industry serves as a useful lens through which to examine these tensions and the ways they affected marginalized populations. More specifically, an investigation of this black market shows how a particular population of impoverished women—a group regrettably understudied by historians—experienced the tensions. Drawing on an astonishingly diverse and multilingual source base, Black Market Business includes detailed cases of juvenile prostitution, human trafficking, and debt bondage arrangements in sex work, as well as

cases in Tonkin's bars, hotels, singing houses, and dance clubs. Using GIS technology and big data sets to track individual actors in history, it serves as a model for teaching new methodological approaches to conducting social histories of women and marginalized people.
