Plunkett, 2006-11 Covers the business of insurance and risk management, and is a tool for market research, strategic planning, competitive intelligence or employment searches. costco business centers in california: **The Retail Revolution** Nelson Lichtenstein,

2009-07-21 The definitive account of how a small Ozarks company upended the world of business and what that change means Wal-Mart, the world's largest company, roared out of the rural South to change the way business is done. Deploying computer-age technology, Reagan-era politics, and Protestant evangelism, Sam Walton's firm became a byword for cheap goods and low-paid workers, famed for the ruthless efficiency of its global network of stores and factories. But the revolution has gone further: Sam's protégés have created a new economic order which puts thousands of manufacturers, indeed whole regions, in thrall to a retail royalty. Like the Pennsylvania Railroad and General Motors in their heyday, Wal-Mart sets the commercial model for a huge swath of the global economy. In this lively, probing investigation, historian Nelson Lichtenstein deepens and expands our knowledge of the merchandising giant. He shows that Wal-Mart's rise was closely linked to the cultural and religious values of Bible Belt America as well as to the imperial politics, deregulatory economics, and laissez-faire globalization of Ronald Reagan and his heirs. He explains how the company's success has transformed American politics, and he anticipates a day of reckoning, when challenges to the Wal-Mart way, at home and abroad, are likely to change the far-flung empire. Insightful, original, and steeped in the culture of retail life, *The Retail Revolution* draws on first hand reporting from coastal China to rural Arkansas to give a fresh and necessary understanding of the phenomenon that has transformed international commerce.

costco business centers in california: **Creating Good Jobs** Paul Osterman, 2020-01-28

Experts discuss improving job quality in low-wage industries including retail, residential construction, hospitals and long-term healthcare, restaurants, manufacturing, and long-haul trucking. Americans work harder and longer than our counterparts in other industrialized nations. Yet prosperity remains elusive to many. Workers in such low-wage industries as retail, restaurants, and home construction live from paycheck to paycheck, juggling multiple jobs with variable schedules, few benefits, and limited prospects for advancement. These bad outcomes are produced by a range of industry-specific factors, including intense competition, outsourcing and subcontracting, failure to enforce employment standards, overt discrimination, outmoded production and management systems, and inadequate worker voice. In this volume, experts look for ways to improve job quality in the low-wage sector. They offer in-depth examinations of specific industries—long-term healthcare, hospitals and outpatient care, retail, residential construction, restaurants, manufacturing, and long-haul trucking—that together account for more than half of all low-wage jobs. The book's sector view allows the contributors to address industry-specific variations that shape operational choices about work. Drawing on deep industry knowledge, they consider important distinctions within and between these industries; the financial, institutional, and structural incentives that shape the choices employers make; and what it would take to make more jobs better jobs. Contributors Eileen Appelbaum, Rosemary Batt, Dale Belman, Julie Brockman, Françoise Carré, Susan Helper, Matt Hinkel, Tashlin Lakhani, JaeEun Lee, Raphael Martins, Russell Ormiston, Paul Osterman, Can Ouyang, Chris Tilly, Steve Viscelli
