costco business center riverside: The Retail Revolution Nelson Lichtenstein, 2009-07-21 The

definitive account of how a small Ozarks company upended the world of business and what that change means Wal-Mart, the world's largest company, roared out of the rural South to change the way business is done. Deploying computer-age technology, Reagan-era politics, and Protestant evangelism, Sam Walton's firm became a byword for cheap goods and low-paid workers, famed for the ruthless efficiency of its global network of stores and factories. But the revolution has gone further: Sam's protégés have created a new economic order which puts thousands of manufacturers, indeed whole regions, in thrall to a retail royalty. Like the Pennsylvania Railroad and General Motors in their heyday, Wal-Mart sets the commercial model for a huge swath of the global economy. In this lively, probing investigation, historian Nelson Lichtenstein deepens and expands our knowledge of the merchandising giant. He shows that Wal-Mart's rise was closely linked to the cultural and religious values of Bible Belt America as well as to the imperial politics, deregulatory economics, and laissez-faire globalization of Ronald Reagan and his heirs. He explains how the company's success has transformed American politics, and he anticipates a day of reckoning, when challenges to the Wal-Mart way, at home and abroad, are likely to change the far-flung empire. Insightful, original, and steeped in the culture of retail life, *The Retail Revolution* draws on first hand reporting from coastal China to rural Arkansas to give a fresh and necessary understanding of the phenomenon that has transformed international commerce.

costco business center riverside: Directory of Business Information Lawrence Rasie, 1995-06-02 It is one of the great ironies of the Information Age: we know a vast ocean of information now lies open to us, but it's all 'out there' somewhere; in fact, information often seems less accessible than ever before. And in business, where important judgments, decisions, and opportunities ride on timely access to crucial information, the irony becomes painful. Now, with the *Directory of Business Information*, businesspeople can access the vital information they need quickly and directly. Written by business journalist Lawrence Rasie, this valuable guide describes thousands of sources of information—and then links them directly to business databanks. It includes a framework of information on major industries and companies to help you narrow your search to the specific data you need. It also provides a network of sources for business research in any part of the country—without leaving your home, office, or school. The *Directory of Business Information* is divided into four major parts: Part 1 describes general sources of business information, including printed sources, online databases, CD ROM databases, microfilm, and telephone sources. Here you'll find a wealth of good starting points for your research: broad indexes to business news and trends, comprehensive directories for industries and companies, yearbooks, business newspapers and periodicals, major business broadcasts, and major business databases. Part 2 helps you focus in on three essential business topics: the economy, industries, and leading companies. In this part, which in itself would be worth the price of the book, the author summarizes the current status and future prospects of 350 major industries and the top 2,500 companies in those industries—complete with addresses, phone numbers, and approximate sales levels. Sources for further research include specialized indexes, periodicals, trade associations, and more. Part 3 opens up sources on specific business topics and functions, including new and small businesses, international business, and the federal government, among others. Part 4 shows you how to get valuable state and regional information, including—for each state—a description of its economy, key government offices, data centers and libraries, local publications, and a list of its largest companies and largest in-state employers. To make it even easier to use, the *Directory of Business Information* is supported by thorough, carefully prepared indexes, and by the inclusion of thousands of phone numbers of business experts in government, corporations, industry associations, publications, and libraries. For anyone involved with business in the United States—executives, investors, salespeople, librarians, and researchers—the *Directory of Business Information* is indispensable: it's the first place to look. Quick Access to All the Business Information You Need Lawrence Rasie's *Directory of Business*

Information gives anyone doing business research quick and direct access to vast amounts of information in all media. Based on sources developed during the author's twelve years as a business journalist, the Directory: Describes major sources of business information in the United States, including online databases, CD ROM sources, periodicals, newspapers, and broadcasts, and shows you how to access them easily Summarizes the current status and future prospects of 2,500 top companies in 350 industries—complete with names, addresses, phone numbers, and sales levels. Over 10,000 sources in all Opens new sources of information for specialized topics, such as new and small businesses, international business, and the federal government Provides key information and sources for each of the 50 states—allows you to research state and regional business environments without having to travel there Is thoroughly and carefully indexed for greater efficiency—a feature not found in many other, more expensive business reference books Business executives, market researchers, investors, librarians, entrepreneurs, students, and other professionals—anyone who needs immediate access to business information will find the Directory of Business Information an indispensable time and money-saving resource.

costco business center riverside: Chicagoland at 45 RPM George Plasketes, 2024-10-31 The greater Chicagoland area of the Midwest--Illinois, Indiana, Wisconsin, Michigan, and Iowa--well represented the profuse pop rock playlist of the mid-1960s. This prolific area produced a significant soundtrack from late 1965 into 1972 that reverberated across the country. The vibrant suburban scene produced nearly 40 singles that reached the record charts locally and regionally, with several of the 45s placing on the national listings. Some of the Chicagoland hits include Kind of a Drag, Vehicle, Bend Me, Shape Me, and Gloria, recorded by the Buckinghams, Ides of March, American Breed, and Shadows of Knight. This book, a geomusicultural chronicle, documents a multitude of Chicagoland bands and their music. They sounded across neighborhoods, thriving teen clubs, television dance and variety shows, renowned recording studios, local independent and major record labels--and through the pervasive AM airwaves of two 50,000-watt downtown radio stations, WLS and WCFL, featuring lineups of dynamic disc jockeys. This period piece portrays a momentous mark within that toddlin' town's rich music heritage.
