costco business center ohio: *Social Sustainability for Business* Jerry A. Carbo, Viet T. Dao, Steven J. Haase, M. Blake Hargrove, Ian M. Langella, 2017-08-16 Social Sustainability for Business demonstrates the need for a transformational change to the way businesses across the globe operate. What has become the standard, accepted business model, with a focus on corporate profit, shareholder wealth maximization, and GDP growth, is no longer a sustainable business model for workers, consumers, communities, society, the planet, or any of its inhabitants and ecosystems. The authors argue that the current commercial system depletes natural resources, denigrates human rights, and inhibits positive social and technological innovation. To address these issues, they focus on societal goals—such as a sustainable planet, meeting human rights of workers, and safe products for consumers—and outline steps that organizations and individuals must take to achieve them. Readers will gain insight into the psychological barriers to and influences on sustainable behavior. They will also learn how reconsidering corporate social responsibility and business ethics can stop and reverse the destruction of a profit-based approach. Cases on modern examples of sustainability or lack thereof explain how establishing and maintaining a socially sustainable business system can protect the environment, meet the rights of its people, and ensure that their needs are met tomorrow. End-of-chapter and end-of-case discussion questions will help students in sustainability classes to think critically about the practical impact of the topics discussed.

costco business center ohio: *Creating Good Jobs* Paul Osterman, 2020-01-28 Experts discuss improving job quality in low-wage industries including retail, residential construction, hospitals and long-term healthcare, restaurants, manufacturing, and long-haul trucking. Americans work harder and longer than our counterparts in other industrialized nations. Yet prosperity remains elusive to many. Workers in such low-wage industries as retail, restaurants, and home construction live from paycheck to paycheck, juggling multiple jobs with variable schedules, few benefits, and limited prospects for advancement. These bad outcomes are produced by a range of industry-specific factors, including intense competition, outsourcing and subcontracting, failure to enforce employment standards, overt discrimination, outmoded production and management systems, and inadequate worker voice. In this volume, experts look for ways to improve job quality in the low-wage sector. They offer in-depth examinations of specific industries—long-term healthcare, hospitals and outpatient care, retail, residential construction, restaurants, manufacturing, and long-haul trucking—that together account for more than half of all low-wage jobs. The book's sector view allows the contributors to address industry-specific variations that shape operational choices about work. Drawing on deep industry knowledge, they consider important distinctions within and between these industries; the financial, institutional, and structural incentives that shape the choices employers make; and what it would take to make more jobs better jobs. Contributors Eileen Appelbaum, Rosemary Batt, Dale Belman, Julie Brockman, Françoise Carré, Susan Helper, Matt Hinkel, Tashlin Lakhani, JaeEun Lee, Raphael Martins, Russell Ormiston, Paul Osterman, Can Ouyang, Chris Tilly, Steve Viscelli

One pathway is decorated with signs and institutions that will lead public education towards a destination of collective obligation, accountability, and responsibility that is student-centered, community-based, and driven by educators and parents working in the best interest of students, families, communities, and the broader society. The other pathway is littered with pamphlets, flyers, and electronic billboards falsely advertising the merits of school "choice." The direction American public schools appear to have taken over the past few decades is increasingly dotted with charter schools operated by for-profit multinational corporations, and themed public schools. Increasingly, efforts to reform public education in America resemble the business model made popular by the founder of Wal-Mart, Sam Walton. *Big Box Schools: Race, Education, and the Danger of the Wal-Martization of Public Schools in America* examines the dangers of the Wal-Martization of American public schools and highlights efforts to challenge policies and practices which place greater emphasis on profits than on pupils.
