emirates airways business class: The End of Airports Christopher Schaberg, 2015-11-19 If air travel was once the bold future, it has now settled into a mundane, on-going present. We no longer expect romantic experiences or sublime views, but just hope that we get from here to there with minimal hassle. In *The End of Airports*, Christopher Schaberg suggests that even as the epoch of flight approaches a threshold of banality, there are still mysteries to be unraveled around our aircraft and airfields. Drawing from his own experiences working at an airport, as well as interpreting these spaces from the perspective of a cultural critic, Schaberg explores the secret lives of jet bridges, seating areas, concourses, and tarmac vehicles, showing how the ordinary objects of flight call for wonder and inquiry. *The End of Airports* is not an obituary-it's more like an ode to terminals in the digital age.

emirates airways business class: The Airline Industry - A Comprehensive Overview John Frankie O'Connell, 2025-09-30 In recent years, airlines have faced unprecedented financial and operational uncertainties, not only in the wake of COVID-19 but across the industry. Their responses provide valuable lessons for the future - for airlines, for related industries, and for all sectors that

find unexpected upheaval suddenly in their path. As a truly global business, the airline industry offers countless lessons in navigating uncertainty and the necessity of continual business transformation. *The Airline Industry – A Comprehensive Overview: Dynamic Trends and Transformations* is an up-to-date ‘state of the nation’ perspective on the airline industry. Its dedicated and detailed focus on airlines makes the book an invaluable tool in deciphering how airlines have been run and managed to date and provides a roadmap for the future evolution of the industry. The author has interviewed countless airline and related industry professionals in their respective fields of expertise, which adds layers of real-world insight to every chapter. Written in a lively and accessible style that will appeal to readers whether they are in academia or the airline industry, *The Airline Industry – A Comprehensive Overview: Dynamic Trends and Transformations* is essential reading for airline employees and undergraduate and postgraduate students and a vital point of reference for lecturers and researchers, economists, and business analysts looking for a thorough and commercial guide to the airline industry.

emirates airways business class: *Up in the Air* Greg J. Bamber, Jody Hoffer Gittell, Thomas A. Kochan, Andrew Von Nordenflycht, 2013-07-15 And you thought the passengers were mad. Airline employees are fed up, too—with pay cuts, increased workloads and management's miserly ways, which leave workers to explain to often-enraged passengers why flying has become such a miserable experience.—New York Times, December 22, 2007 When both an industry's workers and its customers report high and rising frustration with the way they are being treated, something is fundamentally wrong. In response to these conditions, many of the world's airlines have made ever-deeper cuts in services and their workforces. Is it too much to expect airlines, or any other enterprise, to provide a fair return to investors, high-quality reliable service to their customers, and good jobs for their employees? Measured against these three expectations, the airline industry is failing. In the first five years of the twenty-first century alone, U.S. airlines lost a total of \$30 billion while shedding 100,000 jobs, forcing the remaining workers to give up over \$15 billion in wages and benefits. Combined with plummeting employee morale, shortages of air traffic controllers, and increased congestion and flight delays, a total collapse of the industry may be coming. Is this state of affairs inevitable? Or is it possible to design a more sustainable, less volatile industry that better balances the objectives of customers, investors, employees, and the wider society? Does deregulation imply total abrogation of government's responsibility to oversee an industry showing the clear signs of deterioration and increasing risk of a pending crisis? Greg J. Bamber, Jody Hoffer Gittell, Thomas A. Kochan, and Andrew von Nordenflycht explore such questions in a well-informed and engaging way, using a mix of quantitative evidence and qualitative studies of airlines from North America, Asia, Australia, and Europe. *Up in the Air* provides clear and realistic strategies for achieving a better, more equitable balance among the interests of customers, employees, and shareholders. Specifically, the authors recommend that firms learn from the innovations of companies like Southwest and Continental Airlines in order to build a positive workplace culture that fosters coordination and commitment to high-quality service, labor relations policies that avoid long drawn-out conflicts in negotiating new agreements, and business strategies that can sustain investor, employee, and customer support through the ups and downs of business cycles.

emirates airways business class: Designing Future-Oriented Airline Businesses Nawal K. Taneja, 2016-04-22 Designing Future-Oriented Airline Businesses is the eighth Ashgate book by Nawal K. Taneja to address the ongoing challenges and opportunities facing all generations of airlines. Firstly, it challenges and encourages airline managements to take a deeper dive into new ways of doing business. Secondly, it provides a framework for identifying and developing strategies and capabilities, as well as executing them efficiently and effectively, to change the focus from cost reduction to revenue enhancement and from competitive advantage to comparative advantage. Based on the author's own extensive experience and ongoing work in the global airline industry, as well as through a synthesis of leading business practices both inside and outside of the industry, Designing Future-Oriented Airline Businesses sets out to demystify numerous concepts being discussed within the airline industry and to facilitate managements to identify and articulate the boundaries of their business models. It provides material from which managements can set about answering the key questions, especially with respect to strategies, capabilities and execution, and pursue an effective redesign of their business. As with the author's previous books, the primary audience is senior-level practitioners of differing generations of airlines worldwide as well as related businesses. The material presented continues to be at a pragmatic level, not an academic exercise, to lead managements to ask themselves and their teams some critical thought-provoking questions.

emirates airways business class: The Geographies of Air Transport Andrew R. Goetz, Lucy Budd, 2016-03-09 Making a detailed contribution to geographies of air transport and aeromobility, this book examines the practices and processes that produce particular patterns of air transport provision both regionally and globally. In so doing, it updates the seminal contributions of Eva Taylor (1945), Kenneth Sealy (1957), Brian Graham (1995) and others to the study of air transport geography. Leading scholars in the field offer a unique insight into the key developments that have occurred in the field and the implications that these developments have had for geography, geographers, and global patterns of past, present and future air transport. Although globalization and liberalization processes have greatly expanded the demand for air transport over the last two decades, the industry has experienced several major setbacks due to economic, security, and environmental concerns. Many of these impacts have been much more pronounced in some regions, such as North America and Europe while others, such as Asia-Pacific have not been as adversely affected. Accordingly, there is a clear need to examine these recent economic and geopolitical changes from a geographical perspective given the differentiated pattern of effects from global processes. Addressing this need, this volume opens with thematic chapters covering key topics such as the historical geographies, socio-cultural mobilities, environmental externalities, urban geographies, and sustainability of the global air transport industry, followed by regional analysis of the industry in Asia-Pacific, Latin America, Greater Middle East and Africa as well as North America and Europe.

emirates airways business class: The A380neo Business Case Dr Addison M Schonland, Mr Ernest S Arvai, 2015-01-15 There is significant market pressure coming from Emirates for Airbus to offer an A380neo. Airbus cannot ignore this pressure, because the A380 program is in need of more sales, and currently Emirates represents the shortest path to such orders. An A380neo should be attractive to other A380 operators as well as other airlines considering VLAs. The VLA segment as a niche but is also valid market.
