Written by leading industry expert, Rigas Doganis, this book is an indispensable guide to the inner workings of this exciting industry. Providing a complete, practical introduction to the fundamentals of airline economics and marketing, it explores the structure of the market, the nature of airline costs, issues around pricing and demand, and the latest developments in e-commerce. It includes much new material on airline alliances, long-haul low-cost airlines, new pricing policies and ancillary revenues in order to present

a compelling account of the current state of the airline industry. delta business class airbus a330: Buying the Big Jets Paul Clark, 2017-07-14 Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. *Buying the Big Jets* has been published since 2001 to provide expert guidance to all those involved in aircraft selection strategies. This third edition brings the picture fully up to date, representing the latest developments in aircraft products and best practice in airline fleet planning techniques. It features a new section that addresses the passenger experience and, for the first time, includes regional jet manufacturers who are now extending their product families into the 100-plus seating category. Overall, the third edition looks at a broader selection of analytical approaches than previously and considers how fleet planning for cost-leader airlines differs from that of network carriers. *Buying the Big Jets* is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. It is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital.

delta business class airbus a330: Northwest Airlines Geoff Jones, 2005-08-24 Since flying its first mail flight on October 1, 1926, Northwest Airways, now known as Northwest Airlines, has grown to become one of the worlds leading airlines. Northwest's legacy of leadership in the aviation industry began with its foundation in the Twin Cities and extended to its pioneering work as part of the U.S. war effort in Alaska, the establishment of the first U.S. commercial air links to Japan and the Orient, and its groundbreaking 1992 alliance and award of anti-trust immunity with KLM/Royal Dutch Airlines. Northwest is now Americas oldest air carrier with continuous name identification. In celebration of the airlines 80th anniversary in 2006, this book chronicles the remarkable years during which Northwest became an institutional backbone of both American and worldwide air transport history. This diverse historical tribute relies heavily on the authors own photo archive along with images supplied by the exceptional Northwest History Centre Inc., established in October 2002 to preserve the airlines rich heritage. The rare photographs seen in these pages, accompanied by a detailed and informative narrative, bring together for the first time all of the elements of the Northwest family, which includes Hughes Air West and Republic airlines and other predecessors.
