field business: With a Royal Engineers Field Company in France & Italy V.F. Eberle, 2020-03-30 A memoir of the First World War from the rare perspective of an engineer. VF Eberle MC joined up upon the outbreak of the war in No 2 Field Company Royal Engineers, 48th (South Midland) Division, the same company as his brother, who was a captain. He was commissioned before sailing for France at the end of March 1915 and remained with it for the rest of the war. In that time he saw action on the Somme and in the Advance to the Hindenburg Line before his Division took part for most of the Battle of Third Ypres (Passchendaele). Transferred to Italy at the end of 1917, he took part in the final stages of the war, including the Battle of Asiago. Besides his eloquent description of the work of a field company RE, he spends some time in outlining his role in the development of the Bangalore Torpedo. Based on his wartime letters, diaries, and records—which can now be consulted in the Imperial War Museum—this book gives a detailed picture of the employment of a field company in war, during both periods of both relative tranquility and major offensives. There are relatively few memoirs of Royal Engineers' officers, especially of those in his position, so close to the line. The memoirs benefit from his key eye for observation and his skillful use of the material available to him, making this a fine addition to the literature of the Great War.

field business: Cases in the Environment of Business David W. Conklin, 2006 The Ivey Casebooks Series is a co-publishing partnership between SAGE Publications and the Richard Ivey School of Business at The University of Western Ontario. Due to their popularity in more than 60 countries, approximately 200 new cases are added to the Ivey School of Business library each year. Each of the casebooks comes equipped with instructor's resources on CD-ROM. These affordable collections will not only help students connect to real-world situations, but will benefit corporations seeking continued education in the field as well. Broadening the scope of environmental forces to a global rather than a domestic context leads to cross-country comparisons that add complexity to the

subject matter, enrich analytical theories, and heighten the interest of students. Students gain an appreciation for the many ways in which environmental forces interact, creating a set of risks and opportunities that is unique in each country and that must be evaluated in formulating trade and investment decisions. Cases in the Environment of Business offers an outstanding collection of relevant, classroom-tested cases. In discussing the cases, students will participate in managerial decisions in an international context. Most cases deal with a variety of environmental forces, but generally a single set of forces plays a predominant role. The instructor's resources on CD-ROM includes detailed 6-10 page casenotes for each case, preparation questions for students to review before class, discussion questions, and suggested further readings. Cases in the Environment of Business addresses the following five sets of environmental forces: Industry Structure Responses to strategies of customers, suppliers, and competitors, ; dependence of profitability on unique value-added attributes and the shift of certain activities to low-wage countries Macroeconomic Variables Income levels and growth rates, foreign exchange rates, inflation rates, interest rates, and unemployment rates Political Variables Regulations, financial incentives, taxation, foreign investment restrictions, and international trade and investment agreements Societal Variables Labor and environmental practices, ethics, corporate social responsibility, boards of directors, and demographics Technological Variables Technological infrastructure and the pace and direction of technological changes, including, in particular, the Internet and e-business.
