Since the 1990s, government at all levels is under increasing pressure to do more with less. However, despite the U.S. government spending about 15 to 20 percent of its GDP on contracts for goods and services, there is a paucity of reference books for public procurement officials and very few textbooks for courses on the subject. Filling this void, the *International Handbook of Public Procurement* provides the knowledge necessary to understand how procurement works and how to improve the cost-effectiveness of procurement systems. Taking a multidisciplinary approach, the book focuses on the managerial, economic, political, and legal aspects of this topic. It begins with a conceptual framework and highlights various reforms occurring in certain countries. By examining these improvements, readers are able to apply this knowledge to their own strategies. The next section presents selected cases that illustrate the public procurement process, examining systems in various nations including Germany, China, South Africa, Cambodia, Uganda, and Estonia. The book also discusses the rise of electronic procurement systems (E-procurement) and reviews the benefits of these efficient systems. Other topics presented in this comprehensive volume include practical discussions on contract negotiations, bidding, price strategies and cost analysis, and an insightful chapter on the market's response to contract award announcements. A virtual encyclopedia from numerous international experts, this book was assembled by Khi V. Thai, Professor at Florida Atlantic University and Editor of the *Journal of Public Procurement*. Dr. Thai has provided technical assistance in the area of public procurement to governments across the world. Empowering those on all sides of the issue, this volume dispenses advice valuable to government officials and contractors, as well as providing a comprehensive text for public administration students.

fau business major: **The Best Transportation System in the World** Mark H. Rose, Bruce

Edsall Seely, Paul F. Barrett, 2006 From 1920 to the mid-1990s, American transportation in the form of railroads, trucks, and airlines was simply a creature of politics and public policy. In brief, the markets for rail, truck, and airlines were not natural entities, but had been created through hard-fought political contests, full-time lobbying, and unceasing litigation. Between 1940 and the late 1970s, moreover, leaders of rail, truck, and airline firms lobbied and litigated to protect the workings of this regulatory regime. In the mid-1950s, President Eisenhower asked Congress to award railroad executives authority to modify prices and service. Eisenhower was concerned about a railroad industry in decline. During the 1960s, President Johnson sought broad deregulation of rail, trucks, and airline firms. Johnson wanted another device to fine tune the economy. In the 1970s, Presidents Nixon, Ford, and Carter sought to deregulate transportation with a view toward reversing stagflation. Between 1978 and 1980, Congress and President Carter approved deregulation of airlines, trucking, and railroads. Carter aide Mary Schuman played a crucial role in bringing about airline deregulation. For all the market talk that surrounded transportation politics before and after 1980, however, officials of the American state had been and remained the principal agents creating those markets.--BOOK JACKET.
