fashion business majors: The A to Z of the Fashion Industry Francesca Sterlacci, Joanne Arbuckle, 2009-10-26 The history of clothing begins with the origin of man, and fashionable dress can be traced as far back as 25,000 years ago. Recent scientific explorations have uncovered graves in northern Russia with skeletons covered in beads made of mammoth ivory that once adorned clothing made of animal skin. The Ancient Egyptians, Greeks, and Romans each made major contributions to fashion's legacy from their textile innovations, unique clothing designs and their early use of accessories, cosmetics, and jewelry. During the Middle Ages, fashion trends emerged as trade and commerce thrived allowing the merchant class to afford to emulate the fashions worn by royals. However, it is widely believed that fashion didn't become an industry until the industrial and commercial revolution during the latter part of the 18th century. Since then, the industry has grown exponentially. Today, fashion is one of the biggest businesses in the world, with hundreds of billions of dollars in turnover and employing tens of millions of workers. It is both a profession, an industry, and in the eyes of many, an art. The A to Z of the Fashion Industry examines the origins and history of this billion-dollar industry. This is done through a chronology, an introductory essay, a bibliography, and hundreds of cross-referenced entries on designers, models, couture houses, significant articles of apparel and fabrics, trade unions, and the international trade organizations.

fashion business majors: *The Chinese Fashion Industry* Jianhua Zhao, 2013-08-15 Less than three decades ago, when the Chinese bought cloth or clothes, they would have had to use a government-issued coupon. Today the Chinese fashion industry is one of the most dynamic in the world - it not only supplies fashions to the increasingly discerning domestic market, but also provides one-third of the clothing sold in the global market. How did this phenomenal transition come about? What can the growth of the Chinese fashion industry tell us about the post-Mao China? What roles do the local and the global play in the dramatic changes? This book offers a historically informed, ethnographically grounded and interpretive analysis of contemporary Chinese fashion and the fashion industry. It examines the interplay of state politics, market forces, local social and cultural factors, and the global political economy, both in the rise of the Chinese fashion industry and in the life and work of Chinese fashion professionals. As the first ethnographic account of the Chinese fashion industry in the post-Mao era, *The Chinese Fashion Industry* combines first-hand accounts with sophisticated cultural analysis to offer new insights, and will be of interest to students and scholars of fashion, anthropology and China.

From the role of government and regulatory bodies to the power of local innovation, the volume provides a timely and strategic assessment of how Nigeria's creative economy is shaping a new narrative for growth. As Africa's most populous country, Nigeria boasts a rich cultural mosaic and a growing generation of dynamic creatives making waves both locally and globally. With Nollywood, Afrobeats, and indigenous fashion now commanding international attention, creative output is fast overtaking oil as Nigeria's most influential export. Through sector-specific case studies, the book critically examines this shift, highlighting high-impact sectors like film, fashion, music, and visual arts, while also shining a light

on underexplored industries such as publishing, advertising, and hospitality. It asks bold questions about whether the right structures are in place to truly harness Nigeria's soft power for economic and social impact.
