garuda indonesia airlines business class: Management Practices in Asia Christiane Prange, Ralph Kattenbach, 2019-08-20 Asia is a continent of contradictions and boundaries; it offers exciting business opportunities, but is also characterized by unpredictability and conflict. While flexibility and creativity are in the DNA of many startups in China, major players like Xiaomi and Alibaba have also emerged as global giants, challenging established global competitors. The authors of this book show that these companies are crossing various boundaries – between cultures, mindsets, and perspectives. At the same time, Western companies entering Asian markets face challenges that are very different from those on their home turf. This book addresses the needs of current and future managers doing business in Asia, who need to understand the individual, social and business challenges that can arise from crossing boundaries. The respective case studies provide essential insights on how several Asian companies have made impressive strides towards becoming established players; how the revival of local brands and growing pride in local products has become a major challenge for global competition; how the need to actively practice corporate social responsibility in Asian markets is currently challenging many companies; and how the need for individual and team coaching among the members of management to support a company's development has grown tremendously, calling for new solutions.

It's like an eye-opening TED Talk on travel that you can flip through at your own pace. Jason Cochran, author and editor for Frommer's guides, described it this way: It's not really just about travel. It's about exploding every stereotype, fear, and expectation you have about the rest of the world and your place in it. Once you start flipping through, you'll be consuming little knowledge bombs like potato chips. Good luck stopping. And good luck seeing things the same way ever again." Mike Carter, a contributor to The Observer and The Guardian wrote: "Turns on its head just about everything we thought we knew about how to get the best out of our travels, gloriously debunking the myths and exposing the clichés along the way."

garuda indonesia airlines business class: Designing Future-Oriented Airline Businesses Nawal K. Taneja, 2016-04-22 Designing Future-Oriented Airline Businesses is the eighth Ashgate book by Nawal K. Taneja to address the ongoing challenges and opportunities facing all generations of airlines. Firstly, it challenges and encourages airline managements to take a deeper dive into new ways of doing business. Secondly, it provides a framework for identifying and developing strategies and capabilities, as well as executing them efficiently and effectively, to change the focus from cost reduction to revenue enhancement and from competitive advantage to comparative advantage. Based on the author's own extensive experience and ongoing work in the global airline industry, as well as through a synthesis of leading business practices both inside and outside of the industry, Designing Future-Oriented Airline Businesses sets out to demystify numerous concepts being discussed within the airline industry and to facilitate managements to identify and articulate the boundaries of their business models. It provides material from which managements can set about answering the key questions, especially with respect to strategies, capabilities and execution, and pursue an effective redesign of their business. As with the author's previous books, the primary audience is senior-level practitioners of differing generations of airlines worldwide as well as related businesses. The material presented continues to be at a pragmatic level, not an academic exercise, to lead managements to ask themselves and their teams some critical thought-provoking questions.

garuda indonesia airlines business class: The Global Commercial Aviation Industry Sören Eriksson, Harm-Jan Steenhuis, 2015-07-16 This book provides a state-of-the-art overview of the changes and development of the civil international aircraft/aviation industry. It offers a fully up-to-date account of the international developments and structure in the aircraft and aviation industries from a number of perspectives, which include economic, geographical, political and technological points of view. The aircraft industry is characterized by very complex, high technology products produced in relatively small quantities. The high-technology requirements necessitate a high level of R&D. In no other industry is it more of inter-dependence and cross-fertilisation of advanced technology. Consequently, most of the world's large aircraft companies and technology leaders have been located in Europe and North America. During the last few decades many developing countries have tried to build up an internationally competitive aircraft industry. The authors study a number of important issues including the political economy of the aircraft industry, globalization in this industry, innovation, newly industrializing economies and the aircraft industry. This book also explores regional and large aircraft, transformation of the aviation industry in Central and Eastern Europe, including engines, airlines, airports and airline safety. It will be of great value to students and to researchers seeking information on the aircraft industry and its development in different regions.

garuda indonesia airlines business class: *Havayollarında hizmet: konfor, faaliyet ve performans ilişkisinin değerlendirilmesi* Dr. Tüzün Tolga İNAN, 2019-10-20 17 Aralık 1903 tarihinde Wright Kardeşlerin ilk başarılı motorlu uçuş denemesiyle başlayan sivil havacılık tarihi günümüzde dünyanın en büyük endüstrilerinden biri haline gelmiştir. Her ne kadar 2003 yılına kadar ülkemiz için sivil havacılık büyük bir aşama kaydetmese de, 2003 yılından sonra milat niteliğinde gelişmeler gerçekleşmiştir. Doktor ünvanını aldığım halen sivil havacılık alanında lisanslandırmaya sahip tek Üniversite olan Anadolu Üniversitesi ile başlayan sivil havacılık alanında ihtisas veren Üniversite ve Meslek Yüksekokulları, özellikle 2011 yılından itibaren sayıca üst limitlere ulaşmıştır. Ancak unutmamak gerekir ki, havacılık bir nevi aşkla ifa edilmesi gereken bir meslektir. İçerisinde pilotaj, hat ve bakım teknisyenliği, uçuş hareket yöneticiliği (dispeçerlik), uçuş ve misafir kontrol uzmanlığı, kabin, hareket, yolcu hizmetleri ve kargo memurluğu olmak üzere birçok iş tanımı bulundurmaktadır. Kendim için düşündüğüm zaman bana havacılığı sevdiren kişi babam olmuştur. Özellikle sektörel olarak 30 yılın üzerinde Türk Hava Yolları tecrübesinin bulunması ve beni havacılık alanında doktora yapmaya itmesi kariyerim için en önemli adımlardan bir tanesi oldu. Tabii herşey burada anlatmak istediğim kadar güllük gülistanlık olmamakla birlikte, vardiyalı çalışma düzeni ve yoğun tempo havacılığın olmazsa olmazıdır. Bu nedenle öğrencilere ve bu alanda kariyer yapmak isteyenlere tavsiyem, havacılığın para için yapılacak bir meslek olmadığını bilincinde olmaları gerektiğidir. Bu kitabı yayımlama sebeplerimden bir tanesi de kamuoyu tarafından bilinmeyen ya da bilindiği zannedilen bu endüstride hizmet-konfor ve performans parametrelerinin ne olduğunun ve bir havayolu şirketini hangi ölçüde etkilediğini göstermek istememdir. Bu kitap umarım hem akademik hem de sektörel camiada tüm havacılık çalışanlarına ve havacılık sevdalılarına faydalı olacak bir eser olacaktır. Unutmamak gerekir ki burada önemli olan konu 5 yıllık değerler ile 2016 yılında hangi verilerin elde edildiği değil, bu verilerin havacılık şirketleri için öneminin farkına varılması olacaktır.

However, for decades airlines have been collapsing around the globe as the business of managing airline operations has become stressed due to price competition. This is detrimental to air carriers since air transport products and services are the same. Moreover, it impacts other industries such as tourism, hotels, and restaurants, which contribute to the derailment of economic and social activities. Thus, it is essential to determine new practices and strategies that can allow air transport management to be enriched and to flourish. *Global Air Transport Management and Reshaping Business Models for the New Era* provides a comprehensive collection of knowledge on the new era of business management on air transport.
