golf business management: Golf Business and Management Tim Breitbarth, Sebastian Kaiser-Jovy, Geoff Dickson, 2017-07-20 Golf is big business around the world. With high profile series such as the PGA, LPGA and European tours to the re-introduction of golf to the Olympics at Rio 2016, golf occupies a prominent place in the global sport community. This is the first book to introduce the fundamentals of golf business and management from a truly international perspective, covering key topics such as media, club management, sponsorship and retail, at elite and non-elite levels. With sections exploring the development of golf on every continent, including North America, South America, Europe, the Middle East, Africa and Asia, this book presents the latest thinking on current issues in golf, ranging from sustainability and innovation to global governance. Each chapter incorporates helpful features for students including learning objectives, discussion questions, guides to further reading, recommended websites and insights from industry voices. golf business management: Golf Course Business Management James Graham Prusa, 2023 This second book in this book series focuses on the physical management of the golf course and cost efficacy. This book will assist not only the golf course superintendent, but also owners, golf professionals, professional tour players, club boards, and operations managers as well. The topics I've chosen to illustrate in this book are a real-world litany of the most common failures and real successes that I have confronted firsthand over decades of my actual business experience. Through many years I have turned to my writing for sheer survival - for myself, colleagues, and employers. I have used the written word as a substantial tool in order to teach and convince others about how to stop failing and to inspire achieving success on golf courses. I've drawn every topic from actual business occurrences that have been observed or managed over my career of turning around failures into achievements and successful golf course businesses. Successfully learning to control costs and increase profits on the golf course. The demanding maintenance methods and practices used for

high-performance military aircraft are exactly transferable for successful golf course management. There are fundamental reasons that golf and turfgrass management employ generally archaic technology - changing from the archaic will provides better service and profits. Going forward, golf will only its full prosperity if the archaic, traditional compartmentalization of redundant management job positions can be tossed aside to allow individuals with multiple skill sets to be unloosed allowing businesses to profit. Today golf courses in every geographic region of the world absolutely need to employee fewer staff as developed nations depopulate and labor scarcity increases. Managers must also be individuals - simultaneously capable of wearing many professional hats with high proficiency.--Amazon description.

golf business management: Golf Operations Business Management James Graham Prusa, 2023 This book series should help anyone with talent who is honest, hardworking, and sincere to more readily, not necessarily easier, actually achieve great golf course playing conditions and profitable golf course business operations. The topics I've chosen to illustrate in this book are a real-world litany of the most common failures and real successes that I have confronted firsthand over decades of my actual business experience. Through many years I have turned to my writing for sheer survival - for myself, colleagues, and employers. I've drawn every topic from actual business occurrences that have been observed or managed over my career of turning around failures into achievements and successful golf course businesses. Successfully learning to control costs and increase profits in food and beverage will also prepare you to directly manage control of the subtle facets of fertilizer costs for the golf course - and vice versa. The demanding maintenance methods and practices used for high-performance military aircraft are exactly transferable for successful golf course management. There exists considerable crossover in both the sciences and arts that must be applied to golf course business management, including physics and chemistry, as well as the arts and concepts of design. One can learn and apply management information from scuba diving and corporate management to food & beverage, and to golf course management. There are fundamental reasons that golf and turfgrass management employ generally archaic technology - changing from the archaic will provides better service and profits. There are logical reasons why perpetual, continuing education, and staff training will then require much less management oversight. Going forward, golf will only its full prosperity if the archaic, traditional compartmentalization of redundant management job positions can be tossed aside to allow individuals with multiple skill sets to be unloosed allowing businesses to profit.
