Introduction to IBM Cloud Pak for Business Automation

IBM Cloud Pak for Business Automation is a robust platform that integrates various automation tools to facilitate operational efficiency in businesses. By combining artificial intelligence, machine learning, and process automation, it empowers organizations to optimize their workflows and improve service delivery. This solution is particularly beneficial for enterprises looking to enhance their agility and responsiveness in today's fast-paced business environment.

The platform consists of several components, including business process management, decision management, workflow automation, and content management. These components work together to ensure seamless integration and collaboration across different business functions. The flexibility of IBM Cloud Pak for Business Automation allows organizations to tailor the solution to their specific needs, addressing unique challenges and goals.

Key Features of IBM Cloud Pak for Business Automation

IBM Cloud Pak for Business Automation is packed with essential features that cater to various aspects of business operations. These features include:

Workflow Automation

Workflow automation allows organizations to design, execute, and monitor workflows without the need for manual intervention. By automating routine tasks, businesses can reduce errors and enhance productivity. The intuitive interface enables users to create workflows visually, making it accessible for users with varying technical expertise.

Business Process Management

Business process management (BPM) is at the core of IBM Cloud Pak for Business Automation. This feature enables organizations to analyze and improve their processes continuously. By providing tools for modeling, execution, and monitoring, BPM helps identify bottlenecks and inefficiencies, leading to improved performance and customer satisfaction.

Decision Management

Decision management leverages AI and machine learning to make informed decisions based on data analysis. This feature enables organizations to automate complex decision-making processes, ensuring consistency and accuracy. By integrating decision management with existing business rules, organizations can adapt quickly to changing market conditions.

Content Management

Content management capabilities within IBM Cloud Pak for Business Automation facilitate the organization, storage, and retrieval of business documents. This ensures that crucial information is readily accessible and can be effectively utilized in decision-making processes. The integration of content management with workflow automation streamlines document-centric processes, enhancing overall efficiency.

Benefits of Implementing IBM Cloud Pak for Business Automation

The implementation of IBM Cloud Pak for Business Automation offers numerous benefits that

contribute to the overall success of an organization. These benefits include:

Increased Efficiency

By automating repetitive tasks, organizations can significantly reduce the time spent on manual processes. This allows employees to focus on more strategic activities, leading to enhanced productivity and operational efficiency.

Cost Reduction

Automation leads to cost savings by minimizing the need for manual labor and reducing errors that can result in financial losses. Organizations can allocate resources more effectively, ultimately lowering operational costs.

Enhanced Agility

IBM Cloud Pak for Business Automation enables organizations to respond quickly to market changes and customer demands. The ability to adapt processes and workflows in real time ensures that businesses remain competitive in their respective industries.

Improved Data-Driven Decision Making

With integrated analytics and AI capabilities, organizations can make informed decisions based on real-time data insights. This leads to better strategic planning and execution, ultimately driving business growth.

Use Cases for IBM Cloud Pak for Business Automation

IBM Cloud Pak for Business Automation can be applied across various industries and business functions. Some common use cases include:

Financial Services

In the financial sector, organizations can utilize IBM Cloud Pak for Business Automation to streamline loan processing, compliance checks, and customer onboarding. Automation helps reduce processing times and improve customer experiences.

Healthcare

Healthcare providers can automate patient intake processes, appointment scheduling, and medical record management. This improves operational efficiency and enhances patient care by ensuring timely access to information.

Manufacturing

Manufacturers can benefit from automating supply chain processes, inventory management, and quality control. By optimizing these processes, organizations can reduce waste and improve product quality.

Retail

Retail businesses can leverage IBM Cloud Pak for Business Automation to enhance order fulfillment, customer service, and inventory management. Automation ensures timely responses to customer inquiries and efficient management of stock levels.

Getting Started with IBM Cloud Pak for Business Automation

Implementing IBM Cloud Pak for Business Automation involves several key steps that organizations should follow to ensure a successful deployment.

Assessment of Needs

The first step is to assess the specific needs of the organization. Understanding the current processes, pain points, and goals will help in tailoring the implementation strategy.

Planning and Design

Once the needs are identified, organizations should develop a comprehensive plan that outlines the design of workflows and processes to be automated. This includes selecting the appropriate components of IBM Cloud Pak for Business Automation that align with the organization's objectives.

Deployment and Training

After planning, the next step is deploying the solution. It is essential to provide training to employees

to ensure they are equipped to utilize the platform effectively. Training helps in maximizing the benefits of automation and fosters user adoption.

Monitoring and Optimization

Post-deployment, organizations should continuously monitor the performance of automated processes. Regular analysis and optimization ensure that the solution evolves with changing business needs and continues to deliver value.

Conclusion

IBM Cloud Pak for Business Automation stands out as a transformative solution for organizations seeking to enhance their operational efficiency and agility. By integrating various automation capabilities, it enables businesses to streamline processes, reduce costs, and make data-driven decisions. As organizations continue to navigate the complexities of the modern business landscape, the adoption of IBM Cloud Pak for Business Automation will play a crucial role in their digital transformation journey.

Q: What is IBM Cloud Pak for Business Automation?

A: IBM Cloud Pak for Business Automation is a comprehensive platform that integrates various automation tools to enhance business efficiency by streamlining processes, improving agility, and leveraging artificial intelligence for data-driven decision-making.

Q: What are the main features of IBM Cloud Pak for Business Automation?

A: Key features include workflow automation, business process management, decision management, and content management, all designed to improve operational efficiency and decision-making.

Q: How can businesses benefit from IBM Cloud Pak for Business Automation?

A: Businesses can experience increased efficiency, cost reduction, enhanced agility, and improved data-driven decision-making by implementing IBM Cloud Pak for Business Automation.

Q: In which industries can IBM Cloud Pak for Business Automation be applied?

A: It can be applied across various industries including financial services, healthcare, manufacturing, and retail to automate processes and improve service delivery.

Q: What steps are involved in getting started with IBM Cloud Pak for Business Automation?

A: Getting started involves assessing needs, planning and design, deployment and training, and continuous monitoring and optimization of workflows.

Q: Is IBM Cloud Pak for Business Automation suitable for small businesses?

A: Yes, IBM Cloud Pak for Business Automation can be tailored to meet the needs of small businesses, helping them to improve efficiency and reduce costs.

Q: How does IBM Cloud Pak for Business Automation enhance decision-making?

A: It enhances decision-making by using AI and machine learning to analyze data, allowing organizations to automate complex decisions and ensure accuracy.

Q: Can IBM Cloud Pak for Business Automation integrate with existing systems?

A: Yes, it is designed to integrate seamlessly with existing enterprise systems, enabling organizations to enhance their automation capabilities without disrupting current operations.

Q: What kind of training is required for users of IBM Cloud Pak for Business Automation?

A: Training typically includes understanding the platform's features, how to design workflows, and best practices for utilizing automation effectively within the organization.

Q: How does IBM Cloud Pak for Business Automation support digital transformation?

A: It supports digital transformation by providing tools that enable organizations to automate processes, improve efficiency, and leverage data for strategic decision-making, thus facilitating a more agile and responsive business model.

Several of these businesses have also recognized the need to make these changes within days as opposed to months or weeks. This has resulted in an unprecedented pace of digital transformation; and success, in many cases, depends on how quickly an organization can react to real-time decisions. This book begins by introducing you to IBM Cloud Pak for Business Automation, providing a hands-on approach to project implementation. As you progress through the chapters, you'll learn to take on business problems and identify the relevant technology and starting point. Next, you'll find out how to engage both the business and IT community to better understand business problems, as well as explore practical ways to start implementing your first automation project. In addition, the book will show you how to create task automation, interactive chatbots, workflow automation, and document processing. Finally, you'll discover deployment best practices that'll help you support highly available and resilient solutions. By the end of this book, you'll have a firm grasp on the types of business problems that can be solved with IBM Cloud Pak for Business Automation. What you will learnUnderstand key IBM automation technologies and learn how to apply them Cover the end-to-end journey of creating an automation solution from concept to deploymentUnderstand the features and capabilities of workflow, decisions, RPA, business applications, and document processing with AIAnalyze your business processes and discover automation opportunities with process miningSet up content management solutions that meet business, regulatory, and compliance needsUnderstand deployment environments supported by IBM Cloud Pak for Business AutomationWho this book is for This book is for robotic process automation (RPA) professionals and automation consultants who want to accelerate the digital transformation of their businesses using IBM automation. This book is also useful for solutions architects or enterprise architects looking for best practices to build resilient and scalable AI-driven automation solutions. A basic understanding of business processes, low-code visual modeling techniques, RPA, and AI concepts is assumed.

ibm cloud pak for business automation: *IBM Solution Architect Cloud Pak for Applications:* 350 Practice Questions & Detailed Explanations CloudRoar Consulting Services, 2025-08-15 The IBM Solution Architect Cloud Pak for Applications certification is a distinguished credential that validates a professional's expertise in designing, developing, and deploying IBM' S Cloud Pak solutions. This certification targets those who have a solid understanding of application management and the ability to architect solutions that leverage IBM' S cutting-edge technology. The exam tests candidates on their proficiency in cloud-native principles, middleware, and the integration of various applications to meet complex business needs. Achieving this certification signifies a deep understanding of IBM' S cloud offerings and an ability to drive innovation through technology. In today' S rapidly evolving technology landscape, cloud solutions are pivotal to digital transformation. This certification is tailored for IT professionals, solution architects, and developers who aim to excel in the cloud domain, particularly with IBM' S robust Cloud Pak for Applications. Professionals pursue this certification to distinguish themselves in a competitive job market, demonstrating their ability to optimize and streamline cloud applications. As organizations increasingly adopt cloud technologies, there is a growing demand for skilled architects who can

deliver scalable and efficient solutions. This certification not only acknowledges a candidate's technical skills but also their strategic understanding of how cloud technologies serve organizational goals. Within this comprehensive guide, learners will discover 350 meticulously crafted practice questions that mirror the exam's structure and complexity. These questions are designed to cover all critical exam domains, offering realistic scenarios that challenge the candidate's problem-solving abilities and decision-making skills. Each question is accompanied by detailed explanations, helping learners understand the reasoning behind correct answers and reinforcing their knowledge. This resource is invaluable for those seeking to move beyond mere memorization, fostering a deep and practical understanding of the subject matter that prepares candidates to tackle real-world challenges confidently. Embarking on the journey to earn the IBM Solution Architect Cloud Pak for Applications certification can significantly elevate your career. This certification not only enhances your professional credibility but also opens doors to advanced roles and responsibilities. It is a testament to your expertise and commitment to staying at the forefront of technology innovations. With this resource in hand, you are well-equipped to achieve certification success, ultimately contributing to your growth as a trusted and skilled expert in the field of cloud solutions.

ibm cloud pak for business automation: Installation and Configuration of IBM FileNet Information Management Software Alan Bluck, 2023-07-26 The definitive guide to installing and configuring IBM FileNet Information Management software KEY FEATURES ● Get guidance on installation and configuration, including troubleshooting. • Prepare thoroughly for installation to ensure a smooth and successful deployment. • Install or upgrade Case Manager, Content Search, Case Analyzer, Monitor Dashboard, and WebSphere. DESCRIPTION Whether you're a beginner or an experienced administrator, this book will help you master the installation and configuration of IBM FileNet Information Management software. This book provides detailed instructions and practical techniques for preparing, configuring, and deploying IBM software products. From IBM BAW 18.0 and IBM Security Directory Suite 8.x to IBM Content Search Services 5.5.x and Oracle 12C, this book covers the essential prerequisites and installation processes for each system platform. You'll also learn about setting up supporting systems like IBM Case Manager and IBM Workflow Center and integrating components like WebSphere, IBM Content Navigator, and Case Monitor Dashboard. By the end of the book, you will have acquired the necessary knowledge and skills to effectively prepare, configure, and deploy different IBM software products. WHAT YOU WILL LEARN • Learn how to access the comprehensive list of IBM Resources and Technical References. • Understand the procedures for IBM Installation downloads and using the Software Compatibility Matrix. • Get familiar with the tools available for system monitoring, such as the IBM SCout tool for System Sizing. ● Download, prepare, and successfully install IBM Fix Packs, IBM Cloud systems, and RedHat OpenShift. • Know how to install and set up IBM Directory Services Security for Users and Groups. ibm cloud pak for business automation: Cloud Computing A Beginner's Guide to Expertise Manish Soni, 2024-11-26 This book, Cloud Computing: A Beginner's Guide to Expertise, is designed to demystify cloud computing and provide a comprehensive introduction to this transformative technology. Whether you are a student, a professional looking to upskill, or simply someone curious about the cloud, this guide will take you from the basics to a deeper understanding of cloud architecture, services, and deployment models. We begin with an overview of the fundamental concepts, including the definition of cloud computing, its history, and the key players in the industry. As we progress, you will learn about different cloud service models—Infrastructure as a Service (IaaS), Platform as a Service (PaaS), and Software as a Service (SaaS)—and how they can be leveraged to meet various business needs. Practical examples and real-world case studies are included to help you see how cloud computing is applied in different industries. You will also find hands-on exercises to practice your skills and deepen your understanding. By the end of this book, you will not only have a solid grasp of cloud computing fundamentals but also be equipped with the knowledge to explore more advanced topics and certifications.

ibm cloud pak for business automation: Digital Technology: The World Of Our Own Binayaka Mishra, 2022-05-12 Digital Transformation often referred as DX or DT. IT modernisation (for example, cloud computing) to digital optimization to the creation of new digital business models are all examples of digital transformation. In general, it refers to the use of digital technology to significantly enhance or create new business processes. So, what exactly is digital transformation for businesses? It is the process of understanding consumer needs and using technology to enhance the end-user experience. End users may be either customers or workers, and many businesses must consider both. In the marketing department, for example, digital transformation may generate more high-quality leads and help firms get closer to their customers while spending less money than traditional analogue marketing tactics. Aside from experimenting with new technology, digital transformation entails rethinking your current approach to common challenges. A transition does not always have a clear finish since it is an evolution. When it comes to the topic what is digital transformation, the MIT Sloan Management Review, a journal that focuses on management transformations, noted, Digital transformation is best viewed of as continuing adaptation to a constantly changing environment. This implies that businesses must always seek methods to enhance the end-user experience. This might be accomplished via increasing on-demand training, migrating data to cloud services, using artificial intelligence, and other methods.

ibm cloud pak for business automation: Red Hat OpenShift V4.3 on IBM Power Systems Reference Guide Dino Quintero, Daniel Casali, Alain Fisher, Federico Fros, Miguel Gomez Gonzalez, Felix Gonzalez, Paulo Sergio Lemes Queiroz, Sudipto Pal, Bogdan Savu, Richard Wale, IBM Redbooks, 2020-09-10 This IBM® Redpaper publication describes how to deploy Red Hat OpenShift V4.3 on IBM Power Systems servers. This book presents reference architectures for deployment, initial sizing guidelines for server, storage, and IBM Cloud® Paks. Moreover, this publication delivers information about initial supported Power System configurations for Red Hat OpenShift V4.3 deployment (bare metal, IBM PowerVM® LE LPARs, and others). This book serves as a guide for how to deploy Red Hat OpenShift V4.3 and provide start guidelines and recommended practices for implementing it on Power Systems and completing it with the supported IBM Cloud Paks. The publication addresses topics for developers, IT architects, IT specialists, sellers, and anyone who wants to implement a Red Hat OpenShift V4.3 and IBM Cloud Paks on IBM Power Systems. This book also provides technical content to transfer how-to skills to the support teams, and solution guidance to the sales team. This book compliments the documentation that is available at IBM Knowledge Center, and also aligns with the educational offerings that are provided by the IBM Systems Technical Education (SSE).

ibm cloud pak for business automation: Artificial Intelligence and Playable Media Eric Freedman, 2022-09-02 This book introduces readers to artificial intelligence (AI) through the lens of playable media and explores the impact of such software on everyday life. From video games to robotic companions to digital twins, artificial intelligence drives large sectors of the culture industry where play, media and machine learning coexist. This book illustrates how playable media contribute to our sense of self, while also harnessing our data, tightening our bonds with computation and realigning play with the demands of network logic. Author Eric Freedman examines a number of popular media forms - from the Sony AIBO robotic dog, video game developer Naughty Dog's Uncharted and The Last of Us franchises, to Peloton's connected fitness equipment to lay bare the computational processes that undergird playable media, and addresses the social, cultural, technological and economic forces that continue to shape user-centered experience and design. The case studies are drawn from a number of related research fields, including science and technology studies, media studies and software studies. This book is ideal for media studies students, scholars and practitioners interested in understanding how applied artificial intelligence works in popular, public and visual culture.

ibm cloud pak for business automation: Using the IBM Block Storage CSI Driver in a Red Hat OpenShift Environment Detlef Helmbrecht, Simon Casey, Mathias Defiebre, Bert Dufrasne, Michael Schaefer, Harald Seipp, Ralf Wohlfarth, IBM Redbooks, 2021-05-12 RedHat OpenShift container platform is one of the leading enterprise-grade container orchestration platforms. It is designed for rapid deployment of web applications, databases, and microservices. Categorized as a container orchestration Platform as a Service (PaaS), it is based on open industry standards, such as the Container Runtime Interface - Open (CRI-O) and Kubernetes. OpenShift allow developers to focus on the code, while the platform manages the complex IT operations and processes. Although open-source, community-driven container orchestration platforms are available, such as OKD and Kubernetes, this IBM® Redpaper® publication focuses on Red Hat OpenShift. It describes the basic concepts of OpenShift persistent storage architecture and its integration into IBM Cloud® Paks. The deployment of the IBM block storage CSI driver also is discussed. This publication also describes the concepts, technology and current working practices for installing the Container Storage Interface (CSI) plug-in for Kubernetes to use IBM Enterprise Storage platforms for persistent storage coupled with Red Hat OpenShift Container Platform (OCP). This publication also provides an overview of containers, Kubernetes, and Openshift for context (it is expected that the reader has a working knowledge of these underlying technologies). It also includes architectural examples of the orchestration platform will be given. This paper serves as a guide about how to

deploy the CSI driver for block storage by using the DS8000@ and Spectrum Virtualize platforms as persistent storage in a Red Hat OpenShift platform. The publication is intended for storage administrators, IT architects, OpenShift technical specialists and anyone who wants to integrate IBM Enterprise storage on OpenShift V4.3/4.4/4.5 on IBM Power, IBM Z@, and x86 systems.

ibm cloud pak for business automation: IBM Cloud Pak for Data Hemanth Manda, Sriram Srinivasan, Deepak Rangarao, 2021-11-24 Build end-to-end AI solutions with IBM Cloud Pak for Data to operationalize AI on a secure platform based on cloud-native reliability, cost-effective multitenancy, and efficient resource management Key Features Explore data virtualization by accessing data in real time without moving itUnify the data and AI experience with the integrated end-to-end platformExplore the AI life cycle and learn to build, experiment, and operationalize trusted AI at scaleBook Description Cloud Pak for Data is IBM's modern data and AI platform that includes strategic offerings from its data and AI portfolio delivered in a cloud-native fashion with the flexibility of deployment on any cloud. The platform offers a unique approach to addressing modern challenges with an integrated mix of proprietary, open-source, and third-party services. You'll begin by getting to grips with key concepts in modern data management and artificial intelligence (AI), reviewing real-life use cases, and developing an appreciation of the AI Ladder principle. Once you've gotten to grips with the basics, you will explore how Cloud Pak for Data helps in the elegant implementation of the AI Ladder practice to collect, organize, analyze, and infuse data and trustworthy AI across your business. As you advance, you'll discover the capabilities of the platform and extension services, including how they are packaged and priced. With the help of examples present throughout the book, you will gain a deep understanding of the platform, from its rich capabilities and technical architecture to its ecosystem and key go-to-market aspects. By the end of this IBM book, you'll be able to apply IBM Cloud Pak for Data's prescriptive practices and leverage its capabilities to build a trusted data foundation and accelerate AI adoption in your enterprise. What you will learnUnderstand the importance of digital transformations and the role of data and AI platformsGet to grips with data architecture and its relevance in driving AI adoption using IBM's AI LadderUnderstand Cloud Pak for Data, its value proposition, capabilities, and unique differentiatorsDelve into the pricing, packaging, key use cases, and competitors of Cloud Pak for DataUse the Cloud Pak for Data ecosystem with premium IBM and third-party servicesDiscover IBM's vibrant ecosystem of proprietary, open-source, and third-party offerings from over 35 ISVsWho this book is for This book is for data scientists, data stewards, developers, and data-focused business executives interested in learning about IBM's Cloud Pak for Data. Knowledge of technical concepts related to data science and familiarity with data analytics and AI initiatives at various levels of maturity are required to make the most of this book.

ibm cloud pak for business automation: From Code to Cloud: A Complete Guide to Modern DevOps and Infrastructure Engineering Pathik Bavadiya, 2025-05-23 The path from creating code to deploying scalable and resilient applications on the cloud has become an essential component of modern software engineering. This is because the technological landscape is quickly growing in which we currently find ourselves. From Code to Cloud: A Complete Guide to Modern DevOps and Infrastructure Engineering is intended to serve as a comprehensive roadmap for developers, operations engineers, architects, and technology leaders who are interested in mastering the principles, tools, and practices that drive modern DevOps and infrastructure at scale. The book is titled From Code to Cloud. "By examining the ways in which automation, continuous integration and deployment (CI/CD), cloud-native architecture, containerization, Infrastructure as Code (IaC), and Site Reliability Engineering (SRE) collaborate to deliver dependable and high-performing software, this book helps to bridge the gap that exists between development and operations. Rather than only gaining an understanding of the individual components, the objective is to acquire an understanding of how these components interact with one another to produce a coherent ecosystem that fosters innovation while preserving organizational excellence. This guide provides you with practical insights, real-world examples, and best practices to assist you in navigating the full lifecycle of software delivery, beginning with a single line of code and ending with a globally distributed cloud infrastructure. It is applicable whether you are currently in the process of modernizing legacy systems or building cloud native applications from the ground up.

ibm cloud pak for business automation: Practical Cloud-Native Java Development with MicroProfile Emily Jiang, Andrew McCright, John Alcorn, David Chan, Alasdair Nottingham, Eric Herness, 2021-09-22 Written by leading MicroProfile experts, this book provides you with best practices for building enterprise-grade cloud-native applications using MicroProfile 4.1 and running them on Open Liberty with Docker, Kubernetes, and Istio Key FeaturesApply your knowledge of MicroProfile APIs to develop cloud-native applications Use MicroProfile Health to provide the startup, liveness, and readiness status of your enterprise applicationBuild an end-to-end stock trader project and containerize it to deploy to the cloud with Istio interactionBook Description In this cloud-native era, most applications are deployed in a cloud environment that is public, private, or a combination of both. To ensure that your application performs well in the cloud, you need to build an application that is cloud native. MicroProfile is one of the most popular frameworks for building cloud-native applications, and fits well with Kubernetes. As an open standard technology, MicroProfile helps improve application portability across all of MicroProfile's implementations. Practical Cloud-Native Java Development with MicroProfile is a comprehensive guide that helps you explore the advanced features and use cases of a variety of Jakarta and MicroProfile specifications. You'll start by learning how to develop a real-world stock trader application, and then move on to enhancing the application and adding day-2 operation considerations. You'll gradually advance to packaging and deploying the application. The book demonstrates the complete process of development through to deployment and concludes by showing you how to monitor the application's performance in the cloud. By the end of this book, you will master MicroProfile's latest features and be able to build fast and efficient cloud-native applications. What you will learn Understand best practices for applying the 12-Factor methodology while building cloud-native applicationsCreate client-server architecture using MicroProfile Rest Client and JAX-RSConfigure your cloud-native application using MicroProfile ConfigSecure your cloud-native application with MicroProfile JWTBecome well-versed with running your cloud-native applications in Open LibertyGrasp MicroProfile Open Tracing and learn how to use Jaeger to view trace spansDeploy Docker containers to Kubernetes and understand how to use ConfigMap and Secrets from KubernetesWho this book is for This book is for Java application developers and architects looking to build efficient applications using an open standard framework that performs well in the cloud. DevOps engineers who want to understand how cloud-native applications work will also find this book useful. A basic understanding of Java, Docker, Kubernetes, and cloud is needed to get the most out of this book.

ibm cloud pak for business automation: IBM Cloud Pak for Data with IBM Spectrum Scale Container Native Gero Schmidt, Tara Astigarraga, Paulina Acevedo, JJ Miller, Dessa Simpson, Austen Stewart, Todd Tosseth, Jayson Tsingine, Israel Andres Vizcarra Godinez, IBM Redbooks, 2021-12-17 This IBM® Redpaper® publication describes configuration guidelines and best practices when IBM Spectrum® Scale Container Native Storage Access is used as a storage provider for IBM Cloud® Pak for Data on Red Hat OpenShift Container Platform. It also provides the steps to install IBM Db2® and several assemblies within IBM Cloud Pak® for Data, including Watson Knowledge Catalog, Watson Studio, IBM DataStage®, Db2 Warehouse, Watson Machine Learning, Watson OpenScale, Data Virtualization, Data Management Console, and Apache Spark. This IBM Redpaper publication was written for IT architects, IT specialists, developers, and others who are interested in installing IBM Cloud Pak for Data with IBM Spectrum Scale Container Native.
