international business courses online: *The Routledge Companion to International Management Education* Denise Tsang, Hamid H. Kazeroony, Guy Ellis, 2013-06-19 Crises and scandals in the world of international management have brought a new spotlight onto how the subject is taught, studied and understood. There has been a plethora of literature on international management, but a lack of focus on how international management education (IME) can be shaped to respond to existing and future global business challenges. The Routledge Companion to International Management Education gathers together contributors from academia, industry and university administration involved in IME, to: introduce the domain of IME; describe the emerging state in new geographical areas; discuss the major issues and debates revolving around IME; explore the linkage of technology and international management, and shed light on the future of IME. The diverse background of the contributors provides a global perspective that challenges the dominant Anglo-American view, with up-to-date specific insights originating from their indigenous view points, which has often been neglected and inadequately covered. The volume answers important questions, such as: Do we need a vision in IME? What is the current state of IME? How has IME grown in emerging market segments? What roles does technology play in its recent development? The volume provides thought-provoking reading for educators, administrators, policy makers, human resources professionals and researchers. It will also give future international management students a glimpse of IME from a global inside-out perspective.

international business courses online: Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment Chatham, Daniel, 2021-01-08 The current learning environment is substantially different than what existed for most of the 20th century. Learners and teachers today must navigate in perpetually changing contexts where education is influenced by technological advancement and obsolescence, economic barriers, a changing employment landscape, and even international politics. Studies indicate that employers seek to hire graduates with strong skills in areas coalescing around international awareness, creativity, communication, leadership, and teamwork. Skills and experiences in these areas are necessary preparation for the current economy and to pursue jobs that do not exist yet, while providing some insulation against the obsolescence of industries that lack these characteristics. These interpersonal skills are not often the subject of students' degrees, yet there are opportunities in online education to cultivate them. With increased interest in new career options comes the need to reconsider how to teach subjects in the increasingly online environment. Advancing Online Course Design and Pedagogy for the 21st Century Learning Environment is a critical reference book that navigates today's dynamic education requirements and provides examples of how online learning can foster growth in skill areas necessary for career advancement through effective course design. Moreover, it helps educators gain insight into online pedagogy and course design for the 21st century learner and prepares them to convert traditional courses and enhance existing online courses, thereby supporting students' growth and development in the highly dynamic online learning environment. international business courses online: Teaching in the Global Business Classroom Carol Dalglish, Peter Evans, 2010-01-01 This book is an excellent resource for university lecturers facing the challenges of working in multicultural classrooms as it examines all aspects raised from the different perspectives of the stakeholders. This book adds both research and practical examples to an already established approach to learning both in schools and universities. Whilst aimed at university business lecturers, secondary teachers and trainee teachers would also gain from the reflection of the impact of international students in relation to teaching and learning. Carole Marshall, Professional Development in Education The text is succinct, easy to follow, and broken up with helpful subtitles. . . this book is recommended for all new higher education teachers and demonstrators and as a resource for both lecturer-training and for continuing professional development purposes. Barbara Chandler, Studies in Higher Education One of the great challenges for teachers in many tertiary institutions is to effectively understand the complex multicultural classroom, both as a consequence of increasing international student mobility and as a result of the raised cultural diversity of domestic populations. Even more important is the need to devise practical

and effective strategies that aid learning in growing international contexts. Carol Dalglish and Peter Evans, in *Teaching in the Global Business Classroom*, provide both and have written an excellent and invaluable guide that will help to avoid the mono-culturalism and Anglo-Americanism of many current approaches which act as barriers both to more effective learning and enhanced performance in the global business environment. Roger King, Open University and formerly of University of Lincoln, UK Dalglish and Evans text *Teaching in the Global Business Classroom* draws our attention to the possibilities of enriching the experience of the global business classroom for all parties. The contributors to the volume achieve this ambitious aim by delivering a highly accessible text, which offers a useful guide for teachers of global business classrooms. I certainly would like to have read this book in my early years of teaching as the volume provides a much needed injection of accessibility and evidence based recommendations and practical suggestions to a literature which has so far remained anaemic in these regards. Mustafa Özbilgin, University of East Anglia, UK The rise in international student numbers means that teachers face unique challenges arising from language and cultural differences in understanding. *Teaching in the Global Business Classroom* presents an educational framework for effective teaching and learning in the global classroom. It provides practical tools for teachers through suggestions for innovative curriculum design, lecture techniques, group work and participation activities, as well as the use of case studies and assessment methods. This book is an essential resource for teachers and lecturers looking to provide the best possible teaching experience for their students, but who may be unsure how to address the issues raised by the rise in ethnic diversity. It will also be of great interest to student teachers at both undergraduate and postgraduate levels.
