job for international business major: Rethinking Education Across Borders Uttam Gaulee, Shyam Sharma, Krishna Bista, 2020-02-14 This book focuses on critical issues and perspectives concerning globally mobile students, aspects that have grown in importance thanks to major geopolitical, economic, and technological changes around the globe (i.e., in and across major origins and destinations of international students). Over the past few decades, the field of international higher education and scholarship has developed robust areas of research that guide current policy, programs, and pedagogy. However, many of the established narratives and wisdoms that dominate research agendas, scope, and foci have become somewhat ossified and are unable to reflect recent political upheavals and other changes (e.g. the Brexit, Trump era, and Belt and Road Initiative) that have disrupted a number of areas including mobility patterns and recruitment practices,

understanding and supporting students, engagement of global mobile students with their local counterparts, and the political economy of international education at large. By re-assessing established issues and perspectives in light of the emerging global/local situations, the contributing authors – all experts on international education – share insights on policies and practices that can help adapt to emerging challenges and opportunities for institutions, scholars, and other stakeholders in international higher education. Including theoretical, empirical, and practitioner-based methods and perspectives provided by scholars from around the world, the book offers a unique and intriguing resource.
