japan airlines review business class: Blue Ocean Strategy with Harvard Business Review Classic Article "Blue Ocean Leadership" (2 Books) W. Chan Kim, Renée A. Mauborgne, 2017-06-27 Chart a path to creating uncontested market space and winning the future. This collection of work by globally preeminent management thinkers W. Chan Kim and Renée Mauborgne brings together their perennial bestseller book Blue Ocean Strategy with their classic article "Blue Ocean Leadership." Blue Ocean Strategy, the global phenomenon that has sold over 4 million copies and is recognized as one of the most iconic and impactful strategy books ever written, argues that cutthroat competition results in nothing but a bloody red ocean of rivals fighting over a shrinking profit pool. Based on a study of 150 strategic moves (spanning more than 100 years across 30 industries), Kim and Mauborgne argue that lasting success comes not from battling competitors but from creating "blue oceans"—untapped new market spaces ripe for growth. The book presents a systematic approach to making competition irrelevant and outlines principles and tools any organization can use to create and capture their own blue oceans. In the article "Blue Ocean Leadership," the authors apply their concepts and tools to what is perhaps the greatest challenge of leadership: closing the gulf between the potential and realized talent and energy of employees. The authors offer a systematic method for uncovering, at every level of the organization, which leadership acts and activities will inspire employees to give it their all and a process for getting managers throughout the company to undertake these tasks.

japan airlines review business class: *East Asian Business in the New World* Shaomin Li, 2016-09-08 *East Asian Business in the New World: Helping Old Economies Revitalize* discusses how to conduct business in East Asia. The main objective of the book is to help American workers and businesses gain competitive advantages in a global marketplace in which the emerging Asian economies are rapidly becoming major players. The American economy appears to be on decline, especially relative to the rapidly rising economies in places such as China. To revitalize the American economy and those of the 'old world', we must pay close attention to the economies with which America competes. The objective of this book is two-fold, with an initial focus on the opportunities and challenges of doing business in East Asia that includes tactics that will help readers understand Asian economies and business practices so that they can compete more successfully in the region. Secondly, the book seeks to teach readers how the U.S. can learn from East Asia in revitalizing its own economy. This is what sets the book apart as it analyzes the social institutions in major Asian countries, including the political, economic, and cultural institutions, and then compares them with the institutions in the U.S., identifying the strengths and weaknesses of U.S. institutions and providing strategic and policy recommendations that may help the U.S. economy and American firms compete in the global marketplace. - Discuss how America and older economies can learn from Asia - Provides a theoretical framework of rule-based vs. relation-based governance to help readers understand the differences in doing business in Asia vs. doing business in mature economies - Offers business insights based on the author's business experience in Asia - Approaches the topic from a comparative perspective
