

is tigerdirect still in business

is tigerdirect still in business is a question that has been on the minds of many consumers and tech enthusiasts alike. TigerDirect, once a prominent player in the online computer and electronics retail space, has experienced various changes over the years, leading to confusion about its current status. In this article, we will explore the history of TigerDirect, its current business operations, and the factors that contribute to its relevance in today's market. We will also discuss its product offerings, customer service, and how it compares to competitors. By the end, readers will have a clear understanding of whether TigerDirect is still in business and the implications of that for consumers.

- Introduction
- History of TigerDirect
- Current Business Operations
- Product Offerings
- Customer Service
- Market Position and Competition
- Future Outlook
- Conclusion
- FAQ

History of TigerDirect

TigerDirect was founded in 1987 by Gilbert Fiorentino and quickly became known for its vast selection of computer components, hardware, and electronics. Over the years, it expanded its product offerings to include laptops, desktops, and various accessories, catering especially to tech-savvy consumers and businesses. The company gained significant traction during the dot-com boom in the late 1990s and early 2000s, thanks to its competitive pricing and extensive inventory.

However, the retail landscape began to change with the rise of online shopping giants like Amazon. In 2015, TigerDirect was acquired by Systemax, which also included a range of other technology brands. This acquisition led to a shift in the operational focus of TigerDirect, and although it remained

a recognizable name, its market presence diminished compared to its peak years.

Current Business Operations

As of 2023, the question “is TigerDirect still in business” can be answered affirmatively, but with some caveats. TigerDirect operates primarily as an online retailer. The company has streamlined its operations, focusing on e-commerce rather than maintaining a physical retail presence. This shift aligns with broader trends in the retail sector, as more consumers prefer the convenience of online shopping.

Despite its reduced visibility, TigerDirect continues to offer a range of products, albeit with a more limited selection compared to its heyday. The website is functional, and orders can be placed directly through it. The company has also aligned its operations to cater to both individual consumers and business clients, providing bulk purchasing options for enterprises.

Product Offerings

TigerDirect offers a variety of products that primarily include computer hardware, peripherals, and consumer electronics. The current catalog reflects a focus on essential tech products, which can be categorized as follows:

- **Computer Components:** CPUs, motherboards, graphic cards, and storage devices.
- **Consumer Electronics:** TVs, audio equipment, and smart home devices.
- **Office Supplies:** Printers, office furniture, and other business essentials.
- **Networking Equipment:** Routers, switches, and wireless devices.
- **Laptops and Desktops:** A range of brands and configurations for different needs.

While the product selection is still robust, it may not match the exhaustive inventory of competitors like Amazon or Newegg. However, TigerDirect often provides competitive pricing on specific items, making it a viable option for savvy shoppers looking for deals.

Customer Service

The quality of customer service is a crucial aspect of any business, especially in the online retail space. TigerDirect has made efforts to enhance its customer service experience. The company provides several support channels for customers, including:

- Live chat support for quick inquiries.
- Email support for detailed questions and concerns.
- Telephone support for direct interaction with customer service representatives.

While responses can vary, many customers report positive experiences, especially regarding order fulfillment and product quality. However, some users have noted delays in shipping and response times during peak shopping seasons, which is not uncommon in the e-commerce industry.

Market Position and Competition

TigerDirect operates in a highly competitive market. Its primary competitors include major online retailers like Amazon, Newegg, and Best Buy. Each competitor has its strengths, with Amazon leading in product variety and customer loyalty. Newegg, on the other hand, focuses heavily on computer hardware and gaming, catering specifically to tech enthusiasts.

TigerDirect differentiates itself by offering unique deals and discounts on specific products, which can attract price-sensitive consumers. However, its marketing presence has diminished over the years, which may affect brand recognition and customer loyalty compared to its competitors.

Future Outlook

The future of TigerDirect appears cautiously optimistic. With the ongoing evolution of e-commerce, the company has the potential to recapture market share by focusing on niche products and providing exceptional customer service. As technology continues to advance, there will always be a demand for computer components and electronics, which TigerDirect is well-positioned to supply.

Investment in marketing efforts and improving the online shopping experience could further enhance its visibility and appeal. Additionally, forming partnerships with emerging tech brands might provide new opportunities for

growth and diversification of their product offerings.

Conclusion

In summary, TigerDirect is indeed still in business, operating primarily as an online retailer with a focus on computers and electronics. While it may not be as dominant as it once was, the company still provides valuable products and services to its customers. As the e-commerce landscape continues to evolve, TigerDirect's ability to adapt and innovate will play a critical role in its long-term success and relevance in the market.

Q: Is TigerDirect still in business?

A: Yes, TigerDirect is still in business, primarily operating as an online retailer of computer hardware and electronics.

Q: What types of products does TigerDirect offer?

A: TigerDirect offers a variety of products, including computer components, consumer electronics, office supplies, and networking equipment.

Q: How is TigerDirect's customer service?

A: TigerDirect provides several support channels, including live chat, email, and telephone support, with generally positive reviews from customers.

Q: How does TigerDirect compare to its competitors?

A: TigerDirect competes with major retailers like Amazon and Newegg but differentiates itself with unique deals and a focus on specific tech products.

Q: What is the future outlook for TigerDirect?

A: The future outlook for TigerDirect is cautiously optimistic, with potential for growth if it invests in marketing and enhances its online shopping experience.

Q: Can businesses purchase in bulk from TigerDirect?

A: Yes, TigerDirect offers bulk purchasing options for businesses, making it a suitable choice for enterprise clients.

Q: Does TigerDirect still have physical stores?

A: No, TigerDirect has shifted its focus entirely to e-commerce and does not operate physical retail stores.

Q: Are the prices at TigerDirect competitive?

A: TigerDirect often provides competitive pricing on various products, making it a viable option for budget-conscious shoppers.

Q: What should I do if I have an issue with my order from TigerDirect?

A: If you have an issue with your order, you can reach out to TigerDirect's customer service through live chat, email, or telephone for assistance.

Q: Is TigerDirect still relevant in today's market?

A: While its visibility has diminished, TigerDirect remains relevant by offering a selection of tech products and competitive pricing for consumers looking for specific deals.

is tigerdirect still in business: International Brand Management of Chinese Companies

Sandra Bell, 2008-03-29 China is certainly doing its best to keep the world mesmerized by its economic achievements. The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those “economic miracles” which have brought Germany, Japan, and the South East Asian Tigers into the top-league of the industrialized world. The rapid expansion of the Chinese economy has gone along with a fledged re-integration of China into the global economic system. In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence. In recent years, the Chinese economy seems to have reached an important threshold line of economic development and global integration. In the first quarter century of reform and global opening, Chinese enterprises have been largely confined to a ‘passive’ role in the global division of labor. Foreign enterprises as the proprietors of greatly superior business models, production technologies, management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations. Lacking the necessary production technologies, products as well as marketing knowledge to successfully address OECD-consumers, Chinese enterprises have been hardly able to enter the global markets without such guidance. Now, this constellation is changing.

is tigerdirect still in business: The Peep Diaries Hal Niedzviecki, 2009-06-01 We have entered the age of peep culture: a tell-all, show-all, know-all digital phenomenon that is dramatically altering notions of privacy, individuality, security and even humanity. Peep culture is reality TV, YouTube, MySpace, Facebook, Twitter, over-the-counter spy gear, blogs, chat rooms, amateur porn,

surveillance technology, Dr. Phil, Borat, cell phone photos of your drunk friend making out with her ex-boyfriend, and more. In the age of peep, core values and rights we once took for granted are rapidly being renegotiated, often without our even noticing. With hilarious, exasperated acuity, social critic Hal Niedzviecki dives into peep, starting his own video blog, joining every social network that will have him, monitoring the movements of his toddler, selling his secrets on Craigslist, hiring a private detective to investigate him, spying on his neighbors, trying out for reality TV shows and stripping for the pleasure of a web audience he isn't even sure exists. Part travelogue, part diary, part meditation and social history, *The Peep Diaries* explores a rapidly emerging digital phenomenon that is radically changing not just the entertainment landscape, but also the firmaments of our culture and society. *The Peep Diaries* introduces the arrival of the age of peep culture and explores its implications for entertainment, society, sex, politics and everyday life. Mixing first-rate reporting with sociological observations culled from the latest research, this book captures the shift from pop to peep and the way technology is turning gossip into documentary and Peeping Toms into entertainment journalists. Packed with stranger-than-fiction true-life characters and scenarios, *The Peep Diaries* reflects the aspirations and confusions of the growing number of people willing to trade the details of their private lives for catharsis, attention and notoriety. Hal Niedzviecki is the founder of Broken Pencil magazine and has published numerous works of social commentary and fiction, including *Hello I'm Special: How Individuality Became the New Conformity* and *Look Down, This Is Where It Must Have Happened*, which is also published by City Lights Publishers.
