interesting ideas for business: *Lives of the Laureates, fifth edition* William Breit, Barry T. Hirsch, 2009-02-06 Autobiographical accounts by twenty-three Nobel laureates give a picture of the richness of contemporary economic thought and insights into the creative process. *Lives of the Laureates* offers readers an informal history of modern economic thought as told through autobiographical essays by twenty-three winners of the Nobel Prize in Economics. The essays not only provide unique insights into major economic ideas of our time but also shed light on the processes of intellectual discovery and creativity. This fifth edition adds five recent Nobel laureates to its list of contributors: Vernon L. Smith (2002), Clive W. J. Granger (2003), Edward C. Prescott (2004), Thomas C. Schelling (2005) and Edmund S. Phelps (2006). Also included is the editors' revised afterword, "Lessons from the Laureates." *Lives of the Laureates* grows out of a continuing lecture series at Trinity University in San Antonio, which invites Nobelists from American universities to describe their evolution as economists in personal as well as technical terms. Each laureate achieves the goal of clarity without sacrificing inherently difficult content: Kenneth Arrow makes grasping the essentials of his "impossibility theorem" painless; Lawrence Klein clearly presents what goes into econometric "model building"; George Stigler masterfully describes his "information theory"; and so on. These lectures demonstrate the richness and diversity of contemporary economic thought. The reader will find that paths cross in unexpected ways—that disparate thinkers were often influenced by the same teachers—and that luck as well as hard work plays a role in the process of scientific discovery.

interesting ideas for business: *The Invisible Organization* Neil Farmer, 2017-03-02 Despite valiant efforts and the advent of techniques such as delegation, career development, performance management, key performance indicators, programme and project management, social network analysis, and employee engagement, most organizations struggle to beat the 70 per cent failure rule for profound, people-disruptive business change. Surveys show that most employees are still disengaged from their work. Innovation is sluggish and agility elusive. Harnessing the hidden potential of your workforce can be a slow, often painful process. Neil Farmer's *The Invisible Organization* explains how to adapt your organization's design to the informal networks that form most of the basis for communication between managers and employees. The book explores five key themes: ¢ Executive leadership - a little autocracy and a lot of collaboration; how senior managers can enable and facilitate change; ¢ Effective first-line management - in most organizations up to 60 per cent need to be replaced and women need to occupy far more significant roles; ¢ HR Managers - a key role, but most don't make the transition from 'command and control' towards the effective use of key influencers and informal network which allows HR people to contribute to the future of their business; ¢ The value of local influencers and those with extensive personal networks - how to identify them and increase their roles across all forms of business change; ¢ Radical changes to white-collar outsourcing - to an in-house outsourcing service. This is an important, if somewhat

painful, call to arms for leaders and HR specialists across all organizations.
