lyft business code: *Uberland* Alex Rosenblat, 2018-10-23 Silicon Valley technology is transforming the way we work, and Uber is leading the charge. An American startup that promised to deliver entrepreneurship for the masses through its technology, Uber instead built a new template for employment using algorithms and Internet platforms. Upending our understanding of work in the digital age, Uberland paints a future where any of us might be managed by a faceless boss. The neutral language of technology masks the powerful influence algorithms have across the New Economy. Uberland chronicles the stories of drivers in more than twenty-five cities in the United States and Canada over four years, shedding light on their working conditions and providing a window into how they feel behind the wheel. The book also explores Uber's outsized influence around the world: the billion-dollar company is now influencing everything from debates about sexual harassment and transportation regulations to racial equality campaigns and labor rights initiatives. Based on award-winning technology ethnographer Alex Rosenblat's firsthand experience of riding over 5,000 miles with Uber drivers, daily visits to online forums, and face-to-face discussions with senior Uber employees, Uberland goes beyond the headlines to reveal the complicated politics of popular technologies that are manipulating both workers and consumers.

lyft business code: *The Law and Governance of Decentralised Business Models* Roger M Barker, Iris H-Y Chiu, 2020-12-30 This book draws together themes in business model developments in relation to decentralised business models (DBMs), sometimes referred to as the 'sharing' economy, to systematically analyse the challenges to corporate and organisational law and governance. DBMs include business networks, the global supply chain, public-private partnerships, the platform economy and blockchain-based enterprises. The law of organisational forms and governance has been slow in responding to changes, and reliance has been placed on innovations in contract law to support the business model developments. The authors argue that the law of organisations and governance can respond to changes in the phenomenon of decentralised business models driven by transformative technology and new socio-economic dynamics. They argue that principles underlying the law of organisations and governance, such as corporate governance, are crucial to constituting, facilitating and enabling reciprocity, mutuality, governance and redress in relation to these business models, the wealth-creation of which subscribes to neither a firm nor market system, is neither hierarchical nor totally decentralised, and incorporates socio-economic elements that are often enmeshed with incentives and relations. Of interest to academics, policymakers and legal practitioners, this book offers proposals for new thinking in the law of organisation and governance to advance the possibilities of a new socio-economic future.

lyft business code: *Ethics and Business* Paul C. Godfrey, Laura E. Jacobus, 2022-12-15 Ethics &

Business: An Integrated Approach for Business and Personal Success, 1st Edition, International Adaptation gives students the practical knowledge and skills to identify ethical dilemmas, understand ethical behavior in themselves and others, and advocate for ethical behavior within their organization. The course focuses on three ethical questions: the individual, the organization, and the societal perspective. These questions and views explore different areas of business ethics, such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Most business ethics courses are based on a single point of view. Depending on the viewpoint, this might be based on philosophical theory, organizational behavior, or a legal and regulatory compliance approach. As an author team, we combine and integrate these points of view into a unified whole by incorporating unique content, original videos, and adaptable case studies to assist students in making ethical decisions in their professional and personal lives. This International Adaptation explores different areas of business ethics, such as the use and abuse of power, challenges to honesty and integrity, and participation in ethical interventions such as reporting, repair, forgiveness, and reconciliation. Every chapter now includes new questions to help readers test their understanding of the subject. There is also new mini cases that are contemporary and more relevant to the global scenario.

lyft business code: Disrupting D.C. Katie J. Wells, Kafui Attoh, Declan Cullen, 2025-10-28 A panoramic account of the urban politics and deep social divisions that gave rise to Uber The first city to fight back against Uber, Washington, D.C., was also the first city where such resistance was defeated. It was here that the company created a playbook for how to deal with intransigent regulators and to win in the realm of local politics. The city already serves as the nation's capital. Now, D.C. is also the blueprint for how Uber conquered cities around the world—and explains why so many embraced the company with open arms. Drawing on interviews with gig workers, policymakers, Uber lobbyists, and community organizers, *Disrupting D.C.* demonstrates that many share the blame for lowering the nation's hopes and dreams for what its cities could be. In a sea of broken transit, underemployment, and racial polarization, Uber offered a lifeline. But at what cost? This is not the story of one company and one city. Instead, *Disrupting D.C.* offers a 360-degree view of an urban America in crisis. Uber arrived promising a new future for workers, residents, policymakers, and others. Ultimately, Uber's success and growth was never a sign of urban strength or innovation but a sign of urban weakness and low expectations about what city politics can achieve. Understanding why Uber rose reveals just how far the rest of us have fallen.

lyft business code: Transforming Urban Transport Diane E. Davis, Alan A. Altshuler, 2019 Transforming Urban Transport brings into focus the origins and implementation pathways of significant urban transport innovations that have recently been adopted in major, democratically governed world cities that are seeking to advance sustainability aims. It documents how proponents of new transportation initiatives confronted a range of administrative, environmental, fiscal, and political obstacles by using a range of leadership skills, technical resources, and negotiation capacities to move a good idea from the drawing board to implementation. The book's eight case studies focus on cities of great interest across the globe--Los Angeles, Mexico City, New York, Paris, San Francisco, Seoul, Stockholm, and Vienna--many of which are known for significant mayor leadership and efforts to rescale power from the nation to the city. The cases highlight innovations likely to be of interest to transport policy makers from all corners, such as strengthening public transportation services, vehicle and traffic management measures, repurposing roads and other urban spaces away from their initial function as vehicle travel corridors, and turning sidewalks and city streets into more pedestrian-friendly places for walking, cycling, and leisure. Aside from their transformative impacts in transportation terms, many of the policy innovations examined here have altered planning institutions, public-private sector relations, civil society commitments, and governance mandates in the course of implementation. In bringing these cases to the fore, Transforming Urban Transport advances understanding of the conditions under which policy interventions can expand institutional capacities and governance mandates, particularly linked to urban sustainability. As such, it is an essential contribution to larger debates about what it takes to make cities more environmentally sustainable and the types of strategies and tactics that best advance progress on these fronts in both the short- and the long-term.

lyft business code: Feminist Judgments: Corporate Law Rewritten Anne M. Choike, Usha R. Rodrigues, Kelli Alces Williams, 2023-01-05 Corporate law has traditionally assumed that men organize business, men profit from it, and men bring cases in front of male judges when disputes arise. It overlooks or forgets that women are dealmakers, shareholders, stakeholders, and businesspeople too. This lack of inclusivity in corporate law has profound effects on all of society, not only on women's lives and livelihoods. This volume takes up the challenge to imagine how corporate law might look if we valued not only women and other marginalized groups, but also a feminist perspective emphasizing the importance of power dynamics, equity, community, and diversity in corporate law. Prominent lawyers and legal scholars rewrite foundational corporate law cases, and also provide accompanying commentary that situates each opinion in context, explains the feminist theories applied, and explores the impact the rewritten opinion might have had on the

development of corporate law, business, and society.
