nyu business: NYU'S Stern School of Business Abraham L. Gitlow, 1995-06-01 American business schools from their inception in the 1880's, have grown dramatically both in quality and in numbers. Regarded as late as the 1950's as essentially vocational schools whose role in academia was still to be resolved, they are now among the most respected professional schools in the university community. In recent decades, this increase in prestige has been matched by the growth of both Bachelor's and MBA programs. The forces and events shaping this dramatic rise in importance have been recounted by Dean Emeritus of New York University's Stern School of Business, Abraham L. Gitlow. He brings his 45 years of experience as a faculty member at the Stern School to bear as he analyzes the educational and philosophical issues and tensions that marked the history of the school, and of American higher education in general, in the twentieth century.

nyu business: Business Strategy in the Online Industry Christian Göttisch, 2012-12-06 The Internet is like a 201'00t tidal wave coming thousands of miles across the Pacific and we are in kayaks. Andi Grove In the course of the commercial distribution of Internet technology since the year 1995 new business models emerged and ultimately established the on-line industry as a distinct economic environment. The author defines this new marketplace as . . . a multi-layered industry consisting of five main layers: network, hosting, software, content and devices. Each layer consists

of sub-layers. Players from the converging industries telecommunications, computer hardware/software, media and consumer electronics conduct on-line business units offering a set of on-line services. (S. 17). Significance and growth of the on-line industry are enormous. The market for multimedia products and services represents approximately 10% of the US GOP already today. The industry volume is expected to double every 12 to 18 months. The increasing relevance of the on-line industry is driving the interest of academia in a theoretical foundation of the observed economic phenomena. The term network economics establishes a new scientific area. Due to the specific structure and logic of the industry traditional business concepts and strategy approaches can be translated only in a limited way. At this point the work of Christian Gottsch comes in play, which - by utilizing the theoretical concepts of net work economics and game theory - models the structure of the on-line industry and delivers a methodic set of instruments to develop marketing strategies.

nyu business: *The Wall Street Journal Guide to Business Schools* Harris Interactive, The Staff of the Wall Street Journal, 2001-04-30 Most people return to business school for an M.B.A. degree to increase their marketability in a highly competitive business environment. How well they achieve their goal depends in large measure on how the business world views the schools they attended. For the first time ever, The Wall Street Journal, the world's most respected business publication, along with Harris Interactive, the organization that created the well-known Harris poll, tells you what corporate recruiters from a wide variety of fields think about the M.B.A. programs they know so intimately. Nearly two years in the making, this is the only major survey that focuses exclusively on the opinions of recruiters -- the buyers of M.B.A. talent. Twenty-seven variables for each school were evaluated, variables that drive a recruiter to hire a particular graduate, such as their company's long-term success with a school's M.B.A. graduates and the students' communication and interpersonal skills, analytical and problem-solving abilities and leadership potential. This groundbreaking volume used the evaluations of more than sixteen hundred recruiters, appraising twenty-seven variables for more than two hundred schools in order to arrive at statistically valid ratings for fifty U.S. and international M.B.A. programs, as well as recruiters' observations on thirty-five more business schools and brief profiles on an additional seventy schools. In addition to the overall rankings, The Wall Street Journal Guide to Business Schools ranks the best public and private schools, the top schools by region, the top large and small schools, the top schools on top attributes, schools that are hidden gems and business schools by industry. Also evaluated are schools' academic excellence, the collegiality (and competitiveness) of each school and the most important school attributes. The corporate recruiters even list their personal favorites...and go on the record with extremely candid observations about both the business schools and their graduates. The first guide to business schools published exclusively as an e-book, The Wall Street Journal Guide to Business Schools will prove to be an invaluable resource for prospective students, school faculty and administrators -- and recruiters themselves.

nyu business: Nothing Succeeds Like Failure Steven Conn, 2019-10-15 Do business schools actually make good on their promises of innovative, outside-the-box thinking to train business leaders who will put society ahead of money-making? Do they help society by making better business leaders? No, they don't, Steven Conn asserts, and what's more they never have. In throwing down a gauntlet on the business of business schools, Conn's *Nothing Succeeds Like Failure* examines the frictions, conflicts, and contradictions at the heart of these enterprises and details the way business schools have failed to resolve them. Beginning with founding of the Wharton School in 1881, Conn measures these schools' aspirations against their actual accomplishments and tells the full and disappointing history of missed opportunities, unmet aspirations, and educational mistakes. Conn then poses a set of crucial questions about the role and function of American business schools. The results aren't pretty. Posing a set of crucial questions about the function of American business schools, *Nothing Succeeds Like Failure* is pugnacious and controversial. Deeply researched and fun to read, *Nothing Succeeds Like Failure* argues that the impressive façades of business school buildings resemble nothing so much as collegiate versions of Oz. Conn pulls back the curtain to reveal a story of failure to meet the expectations of the public, their missions, their graduates, and their own lofty aspirations of producing moral and ethical business leaders.

nyu business: The Emergence of Charismatic Business Leadership Richard S. Tedlow, 2021-09-14 The author of *Giants of Enterprise* examines the evolving role of business leaders in the 21st century—with essential lessons from today's trailblazers. In *The Emergence of Charismatic Business Leadership*, Harvard Business School Emeritus professor Richard S. Tedlow reveals how a handful of individuals have transformed modern-day leadership, making charisma essential to the role. He looks at leaders like Oprah Winfrey, Elon Musk, and Steve Jobs: three pioneers who found

success by innovating their management style and using their charisma to champion their vision. Through Tedlow's in-depth accounts of modern business history, we see how former outsiders attain power and influence, and how charismatic leadership enables the creation of revolutionary products like the battery electric vehicle and the smart phone. But Tedlow also considers the careers of people who used their charisma to mislead, such as Jeff Skilling of Enron and Elizabeth Holmes of Theranos. In this thorough examination, Tedlow shows how charisma, when combined with genuine character, can get you far.
