**online associate degree business administration: Learning Online** Barbara Means, Marianne Bakia, Robert Murphy, 2014-04-03 At a time when more and more of what people learn both in formal courses and in everyday life is mediated by technology, *Learning Online* provides a much-needed guide to different forms and applications of online learning. This book describes how online learning is being used in both K-12 and higher education settings as well as in learning outside of school. Particular online learning technologies, such as MOOCs (massive open online courses), multi-player games, learning analytics, and adaptive online practice environments, are described in terms of design principles, implementation, and contexts of use. *Learning Online* synthesizes research findings on the effectiveness of different types of online learning, but a major message of the book is that student outcomes arise from the joint influence of implementation, context, and learner characteristics interacting with technology--not from technology alone. The book describes available research about how best to implement different forms of online learning for specific kinds of students, subject areas, and contexts. Building on available evidence regarding practices that make online and blended learning more effective in different contexts, *Learning Online* draws implications for institutional and state policies that would promote judicious uses of online learning and effective implementation models. This in-depth research work concludes with a call for an online learning implementation research agenda, combining education institutions and research partners in a collaborative effort to generate and share evidence on effective practices.

**online associate degree business administration: Managing the Big Picture in Colleges and Universities** Richard L. Alfred, 2005-11-30 This book is intended to serve as a road map for strategy creation and execution for leaders and decision makers who, by choice or by necessity, are looking to use strategy to optimize the development of their institutions. It is the first book of its kind to focus exclusively on strategy as it applies to postsecondary education. As the authors explain, strategy is a systematic way of positioning an institution within a context of community stakeholders. In today's competitive environment, higher education leaders must become adept at differentiating their institutions from competitors to obtain the resources necessary for growth and sustainable advantage. The book begins by explaining the concept of strategy and its application. The authors describe the evolution of modern strategy and how it has been applied and developed by strategy theorists and practitioners. The book also explores how strategy is shaped by critical factors related to the mission, control and culture of the institution. For example, strategy that is appropriate in a liberal arts college may be completely inappropriate for community college or a teaching university. Real-world cases are employed to illustrate the applications of strategy in three different settings: a private liberal arts college, a comprehensive public institution, and a special purpose institution. The last section moves to the hands-on world of strategy formulation and implementation inside the institution. The authors end with an outline of key concepts for building a plan for implementing strategy and provide a framework for evaluating its impact.
