mpls st paul business journal: Twin Cities Then and Now Larry Millett, 1996 Twin Cities: Then and Now is an engaging, startling, and at times heartbreaking look at the dramatic evolution of landscapes in Minneapolis and St. Paul. Larry Millett, author of *Lost Twin Cities*, explores the changing appearances of Minneapolis and St. Paul from the vantage point of their relatively static streets. Seventy-two historic photographs taken from the 1880s to the late 1950s, are paired with Jerry Mathiason's elegant new black-and-white photographs to provide superb visual comparisons between then and now. Millett's lively and informative essays examine the often astonishing changes wrought by time and circumstance. Maps and detailed informational graphics provide orientation and identify hundreds of significant buildings and places in the photographs.

mpls st paul business journal: Somalis in the Twin Cities and Columbus Stefanie Chambers, 2017-03-03 In the early 1990s, Somali refugees arrived in Minneapolis and St. Paul, Minnesota. Later in the decade, an additional influx of immigrants arrived in a second destination of Columbus, Ohio. These refugees found low-skill jobs in warehouses and food processing plants and struggled as social "outsiders," often facing discrimination based on their religious traditions, dress, and misconceptions that they are terrorists. The immigrant youth also lacked access to quality educational opportunities. In *Somalis in the Twin Cities and Columbus*, Stefanie Chambers provides a cogent analysis of these refugees in Midwestern cities where new immigrant communities are growing. Her comparative study uses qualitative and quantitative data to assess the political, economic, and social variations between these urban areas. Chambers examines how culture and history influenced the incorporation of Somali immigrants in the U.S., and recommends policy changes that can advance rather than impede incorporation. Her robust investigation provides a better understanding of the reasons these refugees establish roots in these areas, as well as how these resettled immigrants struggle to thrive.

mpls st paul business journal: Minnesota 1900 Michael Conforti, 1994 This book examines advances in architecture, design, and painting in a region widely recognized for its contribution to

the Arts and Crafts and Prairie School movements. It features the work of many well-known American artists, including the architects Cass Gilbert, Harvey Ellis, Frank Lloyd Wright, Purcell and Elmslie, ceramicist and Arts and Crafts philosopher Ernest Batchelder, and the painters Homer Dodge Martin and Alexander Fournier. The six essays also focus on the ceramic and metalwork production of the Handicraft Guild of Minneapolis, the Craftshouse of John Bradstreet, and American Indian art and artifacts created both for native and white use at the time. Alan Lathrop discusses Minnesota architecture by combining his knowledge of architectural practitioners of the time with an awareness of international stylistic trends, particularly the tradition of the Ecole des Beaux-Arts, in this first overview of the state's architecture of the period ever published. Michael Conforti and Jennifer Komar link the development of retailing in the late nineteenth century to the interior design practice and Arts and Crafts production of John Bradstreet. Thomas O'Sullivan provides a study of Robert Koehler, one of the region's most respected painters, while he reviews the work of over two dozen of the state's other painters working at the time. The special communal nature of Minnesota's artistic life is emphasized in Marcia Anderson's contribution. Her study of the Handicraft Guild of Minneapolis presents years of archival research on the Guild which she presents in the context of the international Arts and Crafts movement. Mark Hammons provides the first monograph ever published on the architectural partnership of Purcell and Elmslie, the most commissioned architects of the Prairie School after Frank Lloyd Wright. Hammons analyzes the team-centered working process of the firm and relates their creative process and formal vocabulary to the contemporary metaphysical discourse that was the foundation of their architectural philosophy. Louise Lincoln and Paulette Molin study the nature of relationships between whites and the Chippewa and Dakota Indians in their discussion of native material culture. Lincoln and Molin decode a complex, nuanced cultural interchange embodying both traditional and assimilationist trends. Their essay is the first in-depth examination of the range of American Indian art from this region; one that considers both objects crafted for native use and those produced for the tourist market.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. mpls st paul business journal: Energizing Neoliberalism Caleb Wellum, 2023-10-17 How the 1970s energy crisis facilitated a neoliberal shift in US political culture. In *Energizing Neoliberalism*, Caleb Wellum offers a provocative account of how the 1970s energy crisis helped to recreate postwar America. Rather than think of the crisis as the obvious outcome of the decade's oil shocks, Wellum unpacks the cultural construction of a crisis of energy across different sectors of society, from presidents, policy experts, and environmentalists to filmmakers, economists, and oil futures traders. He shows how the dominant meanings ascribed to the 1970s energy crisis helped to energize neoliberal visions of renewed abundance and power through free market values and approaches to energy. Deeply researched in federal archives, expert discourse, and popular culture, *Energizing Neoliberalism* demonstrates the central role that energy crisis narratives played in America's neoliberal turn. Wellum traces the roots of the crisis to the consumption practices and cultural narratives spawned by the petrocultural politics of Cold War capitalism. In a series of illuminating case studies—including 1970s energy conservation debates, popular car films, and the creation of oil futures trading—Wellum chronicles the consolidation of a neoliberal capitalist order in the United States through an energy politics marked by anxious futurity, petro-populist sentiment, and financialized energy markets. He shows how experiences of energy shortages and fears of future energy crises unsettled American national identity and power yet also informed Reagan-era confidence in free markets and US global leadership. In taking a cultural approach to the 1970s energy crisis, Wellum offers a challenging meditation on the status of crisis in modern history, contemporary life, and critical thought and how we rely on crises to make sense of the world.
