neo business email: Exploring Politeness in Business Emails Vera Freytag, 2019-10-11

Exploring Politeness in Business Emails explores the contextual complexities of workplace emails by comparing British English and Peninsular Spanish directive speech events and systematically assessing the impact of contextual factors. Through a combination of qualitative and quantitative methods of data collection and analysis, and the inclusion of metapragmatic insights in the interpretation of the results, the book offers an innovative approach to the study of politeness. The book partially contradicts previous assumptions about English and Spanish directives and provides new insights into the role of politeness in the workplace. By offering a meticulous account of the linguistic choices made by the English and Spanish first language users and the contextual factors influencing these choices, the book suggests far-reaching implications for future research in cross-cultural pragmatics and business discourse, as well as practical implications relevant for academics, postgraduate students and practitioners interested in these fields.

neo business email: The Civil Wars in U.S. Labor Steve Early, 2011-03-15

“Should be required reading for all workers’ rights advocates.” —Bernie Sanders Between 2008 and 2010, the progressive wing of the US labor movement tore itself apart in a series of internecine struggles. More than \$140 million was expended, by all sides, on organizing conflicts that tarnished union reputations and undermined the campaign for real health care and labor law reform. Campus and community allies, along with many rank-and-file union members, were left angered and dismayed. In this incisive book, labor journalist Steve Early draws on scores of interviews and on his own union organizing experience to explain why and how these labor civil wars occurred. He examines the bitter disputes about union structure, membership rights, organizing strategy, and contract standards that enveloped SEIU, UNITE HERE, the California Nurses Association, and independent organizations like the Federación de Maestros de Puerto Rico and the new National Union of Healthcare Workers in California. Along the way, we meet rank-and-file activists, local union officers, national leaders, and concerned friends of labor who were drawn into the fray, as Early considers the quest to stem the tide of the labor movement’s long decline.

neo business email: *Doing Academic Careers Differently* Sarah Robinson, Alexandra Bristow, Olivier Ratle, 2023-07-28 Should academic careers always unfold in exactly the same way? Is there one best way of being an academic? This book says no. Assumptions about who academics are and what they should do are becoming increasingly narrow and focused on achieving so-called 'excellence' in teaching and research above anything else. This book problematises this and explores the scope for doing academic careers differently. Authors paint individual or group portraits of their academic careers, working with metaphors which challenge the dominant discourses of how academic careers should be led. From rejecting the pressure to focus on 'one big thing', to prioritising nurture and care, transcending disciplinary boundaries, reshaping own daily practice, connecting with communities, and being academics outside academia, the chapters in this book offer those considering, starting, or developing an academic career a treasure trove of many alternative possibilities. Presented as a portrait gallery through which readers are encouraged to meander at will, this compilation of insights into alternative academic lives will help to inspire and encourage current academics to re-think and take ownership of their careers in their own terms, according to their own strengths, weaknesses, and circumstances.
